GENERAL INFORMATION

REGISTRATION

Registration is in the Upper Exhibition Hall (Fourth Floor) of the Palmer House Hotel and open during the following hours:

Friday, June 9	6:00 p.m. — 10:00 p.m.
Saturday, June 10	7:00 a.m. — 7:30 p.m.
Sunday, June 11	7:30 a.m. — 7:00 p.m.
Monday, June 12	7:30 a.m. — 6:00 p.m.
Tuesday, June 13	8:00 a.m. — 4:30 p.m.
Wednesday, June 14	8:00 a.m. — 4:00 p.m.
Thursday, June 15	8:00 a.m. — 2:00 p.m.

TICKET SALES

Tickets to the special events are on sale in the Registration Area up to twenty-four hours before the event, subject to availability.

EXHIBITS

Exhibits are open during the following hours:

Monday, June 12	7:00 p.m. — 8:30 p.m.
Tuesday, June 13	10:00 a.m. — 4:30 p.m.
Wednesday, June 14	10:00 a.m. — 4:00 p.m.
Thursday, June 15	10:00 a.m. — 2:00 p.m.

HOSPITALITY

Welcome to Chicago and the Land of Lincoln! The Hospitality Center is located in Private Dining Room 11 (PDR.11) on the Third Floor of the Palmer House Hotel and is open during the following hours:

Friday, June 9	6:00 p.m. — 9:00 p.m.
Saturday, June 10	8:00 a.m. — 8:00 p.m.
Sunday, June 11	8:00 a.m. — 6:00 p.m.
Monday, June 12	8:00 a.m. — 6:00 p.m.
Tuesday, June 13	8:00 a.m. — 6:00 p.m.
Wednesday, June 14	8:00 a.m. — 6:00 p.m.
Thursday, June 15	12:00 Noon — 6:00 p.m.

Four knowledgeable persons are on hand at all scheduled times to answer your questions and to assist you in making local arrangements. A collection of literature about Chicago and the surrounding areas is available for your use.

RECEPTION

A new feature this year—members of the Reception Committee are available at traffic points in the hotel to expedite your registration, to help you find your way, to direct you to the right places to get information, etc. Members are identifiable by a wide green ribbon sash, and are carrying MLA clipboards.

MLA SCHOLARSHIP BOOTH

The Scholarship Booth is open during the following hours:

Monday, June 12	7:00 p.m. — 8:30 p.m.
Tuesday, June 13	10:00 a.m. — 4:30 p.m.
Wednesday, June 14	10:00 a.m. — 4:00 p.m.
Thursday, June 15	10:00 a.m. — 2:00 p.m.

MLA BOOTH

Information on membership, careers, education, certification, publications and the Association is available. The booth is open during the same hours as the exhibits.

PLACEMENT SERVICE

The Placement Service includes listings of both available positions and personnel. Provisions have been made for scheduling interviews during the period of the meeting.

The Placement Service is located in Private Dining Room 18 (PDR 18) on the Club (Fifth) Floor of the Palmer House Hotel. The Service will be open during the following hours:

Friday, June 9	7:00 p.m. — 10:00 p.m.
Saturday, June 10	7:30 a.m. — 9:00 a.m. 4:30 p.m. — 8:00 p.m.
Sunday, June 11	7:30 a.m. — 9:00 a.m. 4:30 p.m. — 9:00 p.m.
Monday, June 12	8:00 a.m. — 6:00 p.m.
Tuesday, June 13	8:00 a.m. — 6:00 p.m.
Wednesday, June 14	8:00 a.m. — 6:00 p.m.
Thursday, June 15	8:00 a.m. — 6:00 p.m.

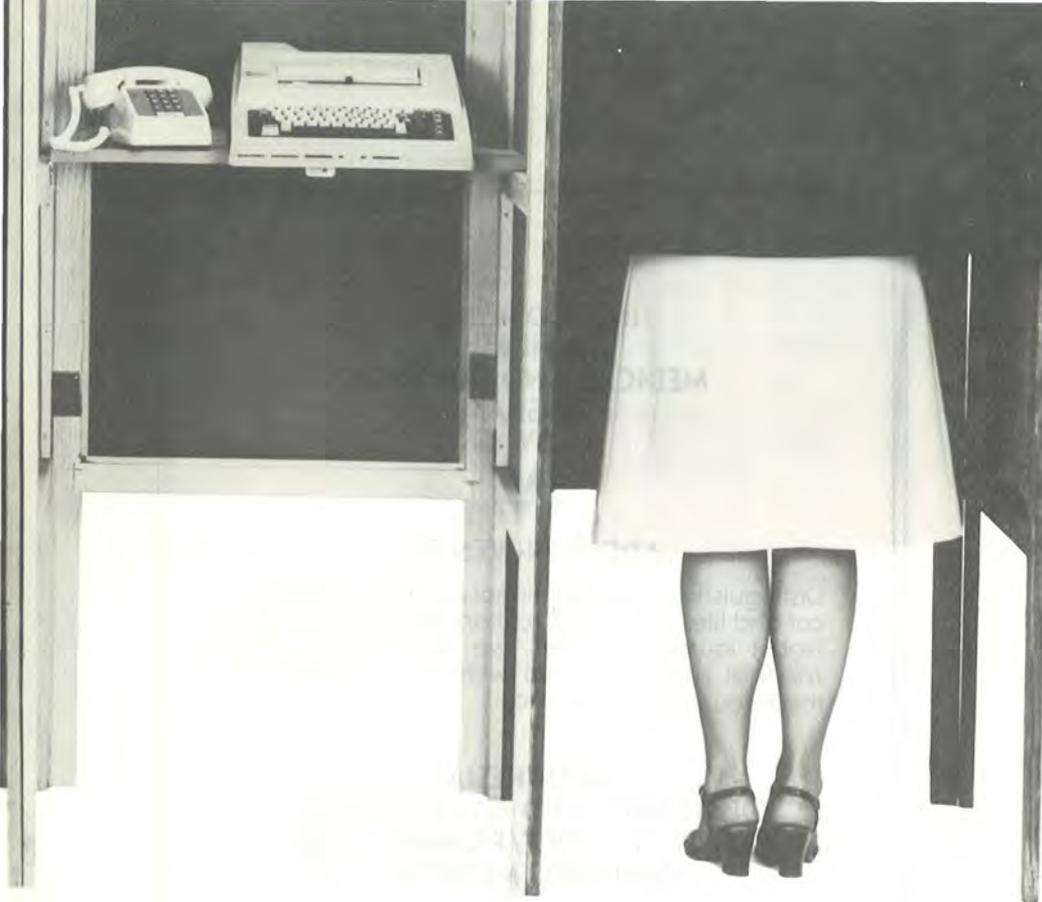

DAILY NEWSPAPER

The meeting's daily newspaper, the *Chicago Breeze*, is issued on Monday, Tuesday, Wednesday, and Thursday. Copies are available at the Registration Desk, the Hospitality Center, and in the Exhibit Hall. Copy for the next day's issue must be submitted by 5:00 p.m. to the Press Room.

CONVENTION RIBBONS

Ribbons are used to identify participants as follows:

WHITE	Officers and Board Members
RED	Hospitality
GOLD	Members from outside the U.S. and Canada
GREEN SASH	Reception Committee
GREEN BUTTONS	New members are provided with green buttons Please help to give them a special welcome!

Cast Your Vote

When you dial a data base vendor for your patron, we know it's your image that's on the "line." Your client expects results, and a search that doesn't produce them—at any price—is expensive.

That's why at SDC Search Service we emphasize:

- Innovative products and services
- Quality data bases and handling
- Free training time on new data bases
- Consultation on search strategy development
- Accountability in product delivery

Call us to discuss your search needs or visit us at MLA Booth No. 55.

**INTRODUCING
A NEW
MEDICAL AND NURSING
PROGRAM
BY**

ADDISON-WESLEY.

Distinguished as international publishers of physical and life science publications with over twenty Nobel laureate authors, we have entered the medical publishing field with an initial focus in these four important areas:

**ANESTHESIA
OBSTETRICS AND GYNECOLOGY
FAMILY PRACTICE/PRIMARY CARE
GERIATRIC MEDICINE**

We look forward to seeing you at our booth 61 to introduce our new publications to you. Messrs. Benjamin M. Schragger, Director, Library Services Department; William M. Burgower, Senior Medical Editor; and Nick Keefe, Marketing Manager, will be there to help you personally with your specific medical/nursing library needs. We thank you in advance for receiving these new books as well as our publications in the life sciences.

RULES FOR MLA BUSINESS MEETINGS*

ARTICLE II. Meetings

Section 5. *Quorum*

A quorum of five per cent of the voting members shall be required for the transaction of business. For purposes of determining a quorum, a person eligible to cast two votes shall be counted as two voting members.

Section 6. *Voting*

To facilitate the counting of votes, the Executive Director shall provide easily seen voter identification to all eligible voters attending the meeting.

Section 7. *Order of business*

The order of business at the business meetings of the Annual Meeting shall be at the discretion of the presiding officer, but the business shall include:

Approval of the minutes of the Annual Meeting and of any special meetings of the membership held in the preceding year, but not necessarily of earlier meetings of the current session.

Reception of the reports of the Board of Directors, the Executive Director, the several other appointed officers, and the several committees and representatives.

Action on amendments to the Bylaws (if notice thereof has been given).

Announcement of the election of Officers and the Nominating Committee.

New business.

Section 8. *Resolutions*

A voting member may offer at the Annual Meeting a complex motion introducing a new item of business only if written copies have been distributed at or before the meeting to each voting member present or by the unanimous consent of voting members present.

ARTICLE XI. Parliamentary Authority

Section 1. *Rules*

The rules contained in the current edition of *Roberts Rules of Order Newly Revised* shall govern the Association in all cases to which they are applicable and in which they are not inconsistent with these Bylaws and any special rules of order the Association may adopt.

*Excerpted from the Bylaws, June 1976.

PARLIAMENTARY KNOW-HOW

- To *introduce business*: move to main motion
- To *approve action*: move to accept, adopt or ratify
- To *modify or change*: move to amend or refer to a committee
- To *defer action*: move to postpone to a definite time, refer to a committee or lay on table
- To *limit discussion*: move to limit debate
- To *stop discussion*: move the previous question
- To *determine correctness of an announced voice vote*: move for division of the assembly
- To *suppress a question*: object to consideration, move to postpone indefinitely, or lay on table
- To *object to decision of the chair*: move an appeal from the decision
- To *make a request*: call for point of information, rise to parliamentary inquiry, or raise question of privileges
- To *consider a second time*: move to take from the table, reconsider or rescind
- To *repeal action*: move to rescind

Motions grouped according to the purpose to be accomplished. Based on *Robert's Rules of Order, Newly Revised* (1970 Edition) (pp.48-68)

MOST USED MOTIONS

Reference: *Robert's Rules of Order, Newly Revised*, (1970 Edition)

Main Motion: Proposal for action or for expression of certain views. Only *one* main motion may be on the floor at a time. (p. 52)

Subsidiary Motions: Motions to modify or delay action on the main motion. *In order* when the main motion is being discussed: (pp. 52-56)

To Amend: (Or to modify)—five methods to amend: 1—to strike; 2—to insert; 3—to strike and insert; 4—to add at end of sentence; 5—to substitute. (pp. 108-135). Substitution generally is used only for an entire paragraph or section; strike and insert is quicker, easier, and accomplishes the same purpose. (pp. 112-113)

Refer to Committee—for information, for appropriate recommendations and/or to carry out recommendations. (p. 140)

Postpone to a Certain Time—Defer further consideration of the main question until a definitely stated time. (p. 150)

Previous Question—to close debate on current question. Affirmative vote (two-thirds without discussion) closes debate and orders immediate vote on pending question. The call "Question" may be ignored by the chair. (p. 166)

Lay on Table—Set aside temporarily. Majority vote and no discussion. Motion may not be modified. If definite time is desired, *postpone* should be employed. (p. 177)

Incidental Motions: These arise from pending question and must be decided before the question. (p. 58)

Request for Information (p. 245)

Point of Order (p. 212)

Appeal (p. 218)

Division of Assembly (p. 237)

No recognition required. Division is used by the chair or assembly when the outcome of a vote is uncertain. A standing vote need *not* be counted unless the outcome is still uncertain or a record of the vote is required. (pp. 42-43)

Reconsider: Must be made by one who voted on the prevailing side: in order *only* on the same day or the next succeeding day. If reconsideration carries, the motion to which it applies is again before the assembly. (pp. 265-281)

Rescind—Or cancel: May be called for by anyone when it is too late for reconsideration, if action is not under way. Two-thirds vote without notice required, majority if notice to rescind has been given. (pp. 256-260)

Adjourn: May be accomplished by general consent or by motion. (pp. 199-206)

The F. W. Faxon Company is pleased to invite you to visit the Faxon display at the MLA conference in Chicago, IL, June 12 - 15. Faxon has led the field of periodicals subscriptions for almost one hundred years.

Library business is still our only business — since 1881.

SPECIAL INTEREST GROUP SPONSORED
PROGRAMS AND BUSINESS MEETINGS

DENTAL LIBRARIES GROUP Parlor G
Presiding: Aletha Kowitz, Acting Chairman
Secondary Information Services in Dentistry
Henry M. Koehler, Editor, *Oral Research Abstracts*

In the tradition of leading learned societies around the world, the American Dental Association long ago recognized an obligation to provide a secondary information service to dental researchers and educators. The ADA's program at present consists of four components. *The Index to Dental Literature*, *Dental Abstracts*, *Oral Research Abstracts*, and the "Update" series. Each of these publications is intended to meet the information needs of a defined group. Some possibilities for future development of this service, and the relationship between the ADA's secondary publications and other information retrieval systems will be discussed.

Monday, June 12

HEALTH SCIENCES AUDIOVISUAL GROUP

Room #779

Presiding: Janette S. Closurdo, Ph.D., Chairman

The Instructor as Playwright: Using Written Simulations to Teach

Philip Bashook, Ed.D.

Associate Director, Educational Development Unit Office
Michael Reese Hospital, Chicago

The presentation will 1) provide attendees the opportunity to complete a simulation designed to assist faculty in determining criteria for the evaluation of audio-visuals; 2) provide a description of the written simulation, including design and production techniques for the simulation; 3) discuss the uses of simulation in education; and 4) allow for a discussion period.

HISTORY OF MEDICINE

Room #786

Presiding: Judith Overmier, Chairman

Medical Archives: Acquisition, Preservation and Use

Moderator: Judith Overmier

Wangensteen Historical Library of Biology and Medicine
Bio-Medical Library, University of Minnesota, Minneapolis

Archives

Walter L. Necker, Biomedical Librarian
University of Chicago and MLA Archivist

Deacidification: Past, Present and Future

Richard Daniel Smith, Ph.D., P.E., President,

Wei T'o Associates, Inc.

Park Forest, Illinois

Methods of retarding the aging of library materials are discussed in terms of air conditioning (temperature and relative humidity control) and deacidification. The status and development of current aqueous, nonaqueous, and gaseous manual and mechanized deacidification techniques are reported. Potentially feasible deacidification and allied preservation techniques are described.

What Will They Do With It?

William K. Beatty, Professor

Chicago

HOSPITAL LIBRARIES INTEREST GROUP

Red Lacquer Room

Presiding: Judith Messerle, Chairman

NLM and Hospital Libraries: Roles and Relationships

Arthur Broering

Deputy Associate Director, Extramural Programs

National Library of Medicine

Bethesda, Maryland

A report will be given on the results of a meeting held on January 30-31, 1978 at the National Library of Medicine, of a group of hospital librarians from around the United States with officials of NLM. Present NLM services will be examined in light of the needs of the

Monday, June 12

hospital-based health science community. Topics discussed were on-line services to hospitals, scope of the NLM data bases in coverage of hospital-related literature, locator tools such as SERLINE, Consortium Improvement Grant Program, training needs of hospital librarians, the impact of the new copyright law, and others. A panel of participating hospital librarians will join in the presentation, and time will be allowed for questions from the floor.

MEDICAL LIBRARY EDUCATION GROUP

Parlor B

Presiding: Gwendolyn S. Cruzat, Chairman

*On-Line Data Base Education Responsibility:
Four Perspectives*

Moderator: Ruth M. Taylor

Associate Director

Wayne State University Medical Library

Detroit

*User Education—A Continuous Development of Online
Information Retrieval Vendors*

Robert Donati

Senior Eastern Representative

Lockheed Information Systems, New York, New York

More effective user training continues to evolve as experience with online information retrieval services broadens. Current training practices of the major on-line vendors (e.g., Lockheed DIALOG) and novel and interesting methods are reviewed. Primary responsibilities of the retrieval services are discussed, and areas of overlap with data base suppliers, library schools, and the individual users are examined. Data base instruction that is retrieval-service oriented is especially vital, despite rapid growth in training programs developed by the abstracting and indexing services. While many of the newer approaches may provide more efficient techniques for introducing novices to online searching, none reduces the responsibility of the individual user for continuous, serious study and practice.

On-Line Data Base Education—Institutional Use

Doris Bolef, Professor and Assistant Dean

for Learning Resources

Janet Fisher, Assistant Professor

and Assistant Librarian

East Tennessee State University College of Medicine

Johnson City, Tennessee

Almost daily increase in the number and subject coverage of on-line data bases has resulted in heightened interest in their use by biomedical scientists and the libraries that serve them. Now that such a quantity of information is readily available, the time has come for refinement, standardization and improved training. To facilitate the training of librarians as analysts, the problems to be examined are: misrepresentation in marketing; duplication and overlap of data bases; lack of standardization for both input and retrieval. It is hoped that the producers and vendors will now address these issues for full utilization of this vast national resource.

*Ethical and Legal Issues in the Dissemination of Health
Information to the Health Care Consumer*

Moderator: Ellen Gartenfeld

Coordinator of Community Health Information Network
Mt. Auburn Hospital, Cambridge, Massachusetts

The consumer's movement, the freedom of information act, the patient bill of rights, and the constantly increasing cost of health care have resulted in increased pressure on health care institutions to provide health education information to patients, their families and interested individuals from the community. More and more, lay consumers are coming to health science libraries and requesting materials from the professional literature. The complexity of medical bibliography and its terminology means that these users will require assistance in finding information and understanding it. The question is whether health sciences librarians should provide such assistance; and, if so, what skills will we have to develop to deal with this new group of users? What types of materials must we now begin to collect; and how are we to select from the mass of materials being produced today for the health care consumer?

Even before we begin to consider these more technical points, other questions must be addressed: how do you distinguish, with any degree of certainty, between the provision of medical information and the giving of medical advice? What is the librarians' legal liability in providing information to the non-professional? How will this new function impact, not only on the library, but on the health care institution of which it is a part?

Panelists: William A. Overholt, Ph.D.
Dean of Student Affairs and Professor
Health Management Resources

University of Illinois at the Medical Center, Chicago

Freedom of access to information is an ethical principle derivative from the concept that persons should be encouraged to manage their own lives with due regard for social norms. Limitations of resources may dictate restrictions of service in the medical school library and some material may be reserved from children but in the latter case, the same guidelines would apply that are used with non-medical material. A second ethical concern is the risk that information will be misused for self-diagnosis. Such risks are comparable to finding formulas for explosives in chemistry books or

Monday, June 12

accidents resulting from electrical or mechanical procedures found in *Popular Mechanics*! Knowledge may be dangerous but ignorance is infinitely worse. Thirdly, the acquisition of medical information by the lay public may change the relation of patient to physician. Insofar as the patient population is now substantially better educated than it was a generation ago, the patient/physician relationship has already changed from reliance upon prime authority to a sort of mutuality. The trend will continue and deserves to expand.

William D. Walker
Head, Information Services Department and
Assistant Professor, Library of the Health Sciences
University of Illinois at the Medical Center, Chicago

The consumer health movement has exerted pressure on the health care system to re-examine professional-patient interface and the right of the public to participate in the decision-making processes for personal health care. Access to information is vital to the emergence of a health consumer who is capable of objectively evaluating the alternatives. All too frequently, medical librarians have based service policy on unconscious ethical principles or imagined legal restraints. Health science librarians need to analyze their role as disseminators of health information as related to the library profession, their responsibilities to parent institutions, acceptable primary and secondary participatory roles, and the ability to maintain high standards in providing information to the public. Members of the Medical Library Association must become more assertive in initiating the development of a code of ethics and a formal statement of standards.

Henry B. Betts, M.D.
Medical Director
Rehabilitation Institute of Chicago
Northwestern University Medical School

The "consumer movement" rightfully demands more in the way of information about disease, disability and subsequent treatment. Physicians are called upon to fully educate their patients and this seems to be an appropriate pursuit. Concomitant with this, more patients will seek to educate themselves apart from their physicians. In the long range, this trend seems beneficial.

David M. Stahl
Counselor-at-Law
Isham, Lincoln and Beale
Chicago, Illinois

As a theoretical matter, the broader dissemination of information would appear to increase the exposure of medical librarians to civil litigation and possible resultant damage awards. Indeed, such increased exposure would follow the recently-emerged trend of broader responsibility of professionals generally—not only physicians, but architects, engineers, accountants, investment brokers, and attorneys. This analogy fails, however, and the exposure to liability is commensurately decreased, to the extent that a librarian does not disseminate information in a manner which represents the exercise of that librarian's individual judgment, or implies that certain information should be given more credence than other.

Monday, June 12

Any person bringing suit against a librarian based upon the mere dissemination of information without any representation or implication would, to be successful, have to show at a minimum that damage or injury was suffered as the direct result of a librarian's failure to perform in accordance with standards generally accepted in the profession. At the present time the risk of such litigation resulting in a determination adverse to a librarian is, as a practical matter, minimal.

Creating A Union List of Serials

Monday, June 12

Jean Miller

Director, Medical Library Center of New York

All aspects of the planning, data collection, editing, and methods of production of a union list are discussed. The paper is aimed at assisting the Group to decide whether to publish such a list of nursing serials with special emphasis on foreign journals and the publications of state nurses' associations.

RESEARCH LIBRARIES GROUP

Private Dining Room #5

Presiding: Ann Hutchinson, Chairman

Cancer Information Services of the International Cancer Research Data Bank (ICRDB), Program

John H. Schneider, Ph.D.

Program Director, ICRDB Program

Office of International Affairs

National Cancer Institute

Bethesda, Maryland

A variety of publications and computer data bases for on-line retrieval of cancer research information will be described. The data bases are: **CANCERLIT**, containing more than 100,000 abstracts of published cancer literature; **CANCERPROJ**, containing descriptions of more than 16,000 cancer research projects; **CLINPROT**, containing summaries of approximately 1,000 experimental protocols currently being tested for the treatment of cancer. ICRDB publications include **CANCERGRAMS**, **Special Listings of Current Cancer Research Projects**, and **Oncology Overviews**. There are 60 different **CANCERGRAMS**, each containing abstracts of published literature in a specific cancer research area. These monthly current awareness bulletins are a specialized type of group SDI service. In addition, each year approximately 60 different **Special Listings** are published, each containing descriptions of ongoing research in a different area of cancer research. The **Oncology Overviews** are retrospective bibliographies with abstracts of published papers and selective cancer research topics.

VETERINARY MEDICAL LIBRARIES GROUP

Parlor C

Presiding: Sally Peterson, Chairman

AVMA Publications, Practices and Procedures

Arthur Freeman, D.V.M.

Editor-in-Chief

Journal of the American Veterinary Medical Association

and the *American Journal of Veterinary Research*

American Veterinary Medical Association

Schaumburg, Illinois

AVMA publishes two journals, the **Journal of the American Veterinary Medical Association** and the **American Journal of Veterinary Research**. The **JAVMA** is published 24 times a year, the **AJVR** 12 times a year. The scientific articles for both are subjected to editing by full-time professional staff editors to assure high quality of literary as well as scientific presentation. Because the **JAVMA** contains a variety of features and advertisements, varied administrative procedures are employed.

Chapel Hill

This paper presents a review of the current situation in library school education for medical librarianship in the United States. Information included in the paper is based on a questionnaire sent to teachers of courses in medical librarianship in accredited library schools. Possibilities for specialization in medical librarianship are examined. Course content is reviewed. Implications of the MLA certification examination for library school courses are explored.

Training at the Post-Graduate Level for Medical Librarians

Maxine Hanke
Collection Control Officer, Library Operations
National Library of Medicine
Bethesda, Maryland

Post-graduate education for medical librarians is approachable from several perspectives including internships, certificate programs, and continuing education programs. The diverse population of medical library personnel calls for a varied, yet coordinated system involving MLA, regional medical libraries, library schools and NLM in addition to active participation from all librarians in the health science field. Basic philosophies for each of the major types of programs are discussed in the context of their historical perspective and recommendations for training of health science librarians for the future are mentioned.

Consumer Education

John J. Witte, M.D.
Deputy Director, National Clearinghouse for Smoking
and Health, Bureau of Health Education,
Center for Disease Control
Atlanta, Georgia

At the present time, the major causes of death and disability in the United States are best prevented or controlled through effective health education programs aimed at the general public. For adults, the leading causes of death are heart disease, cancer, stroke and accidents. All of these are more amenable to prevention than to care after the fact. More than 300,000 Americans die each year as a direct

Tuesday, June 13

consequence of cigarette smoking. This includes deaths from cardiovascular disease, lung and other cancers as well as bronchitis and emphysema. Consumer education encourages persons to stop smoking or, better, not to take up the habit and can prevent untold premature death and disability. Similarly, education about other aspects of our lifestyle including exercise, diet, alcohol consumption, and stress reduction should be an integral part of all preventive medicine programs. At the same time, let us not forget to continue our consumer education programs about more traditional public health programs such as childhood immunizations and hypertension control.

State of the Art of Patient Education

Jo Ann Flair

Coordinator, Patient Education Center
The North Carolina Memorial Hospital
Chapel Hill

The Patient Education Center at The North Carolina Memorial Hospital was conceived in October 1972. In attempting to find a model for the new organization only one other "Center" was found; it was unique to a specific setting and not an appropriate model. Today over forty hospitals have a teaching center for patients and their families. An additional two hundred and ten educational centers serve patients in facilities where health professionals also receive continuing education, and countless other hospitals focus on education of patients in specific departments or services. The American Hospital Association and other professional groups have endeavored to develop guidelines for establishing patient education materials. These and other activities are indicative of the widespread movement to establish patient education as an integral part of organized health care.

SESSION ONE Grand Ballroom
Moderator: Martha Jane K. Zachert, D.L.S.
Professor of Library Science
College of Librarianship, Davis College
University of South Carolina, Columbia

9:05 a.m.

1. Elizabeth K. Eaton
Associate Director of Public Services
Moody Medical Library
The University of Texas Medical Branch, Galveston

Library Staff Development Course

The Moody Medical Library at the University of Texas Medical Branch plans, presents and regularly evaluates a Staff Development Program for all employees, librarians, clerical and technical staff. The purpose of this Staff Development Program is to fulfill a continuing education need for library staff members with the following goals: to provide information concerning specific library services and programs, to illustrate the interrelationship of the Departments and divisions, to develop a sense of teamwork and loyalty and to develop job pride. Staff members volunteer to teach courses. Participants give the majority of courses an effectiveness rating of 90% or above.

9:22 a.m.

2. Edna Lee Jolliff
Associate Librarian
Harper Hospital Division
Harper-Grace Hospitals
Detroit, Michigan

*Continuing Education for Library Staff:
The Unit-Dose Curriculum*

This paper describes in detail a curriculum design for the on-going training of both professional and non-professional library staff in a hospital setting. It is offered as one hospital library's answer to the problems of new and/or untrained personnel, rapid staff turnover, the need for interchangeability of staff roles, smooth work flow, and staff morale. Sample goals are isolated and delineated. Typical exercises are shown by means of visual transparencies. Suggested areas for expansion of the curriculum are projected. The staff numbers four professionals and eight non-professionals.

Wednesday, June 14

9:39 a.m.

3. Dorothy A. Mueller
Assistant to the Vice-President for
Research and Graduate Studies
The University of Alabama in Birmingham
Birmingham

*Equal Opportunity and Affirmative Action Legislation—
Implications for Medical Libraries*

During the last decade a number of pieces of legislation have been passed dealing with equal employment and educational opportunities in institutions of higher education. Many times affirmative action is required in addition to basic compliance with these laws and regulations. Health sciences libraries can be affected in a number of ways by this legislation.

As employers and as employees, we as individuals need to be aware of the basic requirements of each of these pieces of legislation and their implications for our particular situation. The institutions for which we work have certain requirements, goals and timetables that they must meet. The library, both as an employment component and as an educational component of these institutions has certain obligations it must fulfill in order that its institution be in compliance with these regulations.

Basic information about each regulation and how it can affect the health science library are presented.

9:56 a.m.

4. Linda Milgrom
Health Education Resources Coordinator
Health Sciences Learning Resources Center
University of Washington
Seattle

On-Line Retrieval of Clinical Slides

The description, organization and retrieval of individual 35mm clinical slides have long been problems for libraries, media centers, hospitals and faculty members. This presentation outlines the Physical Diagnosis Slide Bank, a collaborative project of the University of Washington and the University of California at San Diego, which utilizes an on-line, interactive computer program to access a collection of over 800 teaching slides.

SESSION TWO

Texas A&M Health Sciences Library
College Station, Texas

Wednesday, June 14

Emma Jean McKinan
Head, Public Services
University of Missouri-Columbia Medical Library
Columbia

A Pilot Project for a CML Program

This is a report of a pilot project which placed a clinical medical librarian in a medical community to whom the CML concept was brand new. The purposes of the project were two-fold: 1) to introduce the concept to the community which will be serving as clinical site for the Texas A&M College of Medicine; and 2) to aid in the assessment of the collections available to clinicians there. The methods used, the statistical findings, and the tools of the project are presented, as well as the observations and conclusions of the investigators.

9:22 a.m.

2. Joanne Gard Marshall
Clinical Librarian
McMaster University Medical Center
Hamilton, Ontario

*The Clinical Librarian and the Patient:
Report of a Project at McMaster University Medical Center*

In June 1975 a clinical librarian project was initiated in the Gastroenterology Programme of the McMaster University Health Sciences Centre. The objectives of the project were to assist patients in participating more knowledgeably in their own health care and to assist health professionals in applying the latest information from the biomedical literature to patient care. The implementation and development of the service are described, including the use of feedback from patients and health professionals to assess the impact of the librarians' participation in clinical settings.

9:39 a.m.

3. Carolyn Anne Reid
Senior Clinical Medical Librarian
University of Missouri—Kansas City School of Medicine
Kansas City

*Clinical Medical Librarianship at the University of
Missouri-Kansas City School of Medicine:
Results of Research and Continuing Activities*

From May 1972-February 1977 the National Library of Medicine sponsored research conducted at the University of Missouri—Kansas City School of Medicine and the UMKC Medical Library on the addition of biomedical librarians to multidisciplinary patient care teams. The results of four and one-half years of research on Clinical Medical Librarians (CMLs) working with teams in several services revealed several major findings: 1) CMLs identify and state the information needs of their users with a 90% or greater accuracy; 2) a high degree of correlation exists between the judgment of the CML and that of the user as to the pertinence of the information selected by the CML; 3) a limited number of journals produce most of the documents pertinent to the user's information needs and documents

Wednesday, June 14

appear in a different set of journals for each category of user; 4) the CMLs developed a Clinical Document Citation File that proves useful in a variety of clinical settings.

9:56 a.m.

4. Donald J. Morton, Ph.D., D. Arts.
Library Director
Medical Center Library
University of Massachusetts, Worcester

*Views of Scientific and Medical Societies on Approaches
Designed to Legally Avoid Copyright Restrictions
on Photocopying Scientific Journal Articles*

The new copyright legislation restricts the numbers of photocopied journal articles that can be distributed through interlibrary loans. However, authors of scientific journal articles can collectively avoid such limitations by publishing only in journals that have acceptable photocopying policies.

A survey of 241 societies with 1,000 or more members was made to determine whether scientific society membership favored this type of approach. Sixty-four responses were received. Opinions ranged from societies with large publishing interests wanting complete copyright protection to other groups that strongly favor unrestricted photocopying.

10:13 a.m.

5. Gertrude Lamb, Ph.D.
Hartford Hospital Health Science Libraries
Hartford, Connecticut

Clinical Librarianship as a Continuum

The University of Connecticut/Hartford Hospital Clinical Librarian Program begun in September 1974, and the two new clinical librarian programs instituted in the Spring of 1977, asked "can the librarian as a part of the patient care team help to bridge the gap between available medical knowledge and its application to patient care?" Our experience proved that a librarian can bridge the information gap and identified the process through which a successful program develops. An analysis of this process showed that clinical librarianship develops along a continuum. The continuum of clinical librarianship as we see it, is a linear progression of events. Our progression has been 1) acceptance 2) impact on patient care 3) influence on the information seeking behavior of other health professionals. In the fourth stage of the continuum, elements from the first three stages could be combined to produce a body of knowledge about clinical librarianship which can be utilized to evaluate and extend the program.

SESSION THREE

Monroe Room

Moderator: Ann Hodge Macomber
Professor of Medical Bibliography
Louisiana State University Medical Center Library
New Orleans

9:05 a.m.

1. Jean Lynn Barnard
Reference Librarian
Medical Center Library
University of Michigan
Ann Arbor

On Being a Bibliographical Bloodhound

In spite of modern bibliographical tools and on-line services, there is still a need for old-fashioned bibliographical expertise and perseverance. This is demonstrated by examples from the author's experience, culminating in a successful modification of a heart operation based on an old German experiment the author had succeeded in unearthing. Various types of problems encountered along the way and sometimes unconventional approaches to solving them are described.

9:22 a.m.

2. Robert Bellanti
Head, Interlibrary Loan Service
Cecil N. Widdifield
Library Assistant
Biomedical Library
University of California
Los Angeles

*Interlibrary Lending Cost Analysis,
UCLA Biomedical Library; Preliminary Report*

(To be read by Phyllis S. Mirsky, Associate Director,
Pacific Southwest Regional Medical Library Service,
Biomedical Library, University of California, Los Angeles)

In March 1976, a cost study was carried out in the Interlibrary Loan Section of the UCLA Biomedical Library to determine the costs of processing ILL requests, regardless of their source of funding. A full departmental task analysis was performed and 31 separate activities were identified. Unit costs, based on an average monthly volume of 5000 requests, were calculated by means of a computer program developed for this study. Cumulative functional costs were then calculated to determine labor costs for requests sent in the original, requests filled with photocopies, unfilled requests, referrals and an average transaction cost. Non-labor costs and costs incurred outside of the ILL section were added to the derived labor costs. The average transaction cost for an ILL request was determined to be \$1.90. The methodology employed in this study may be of use to other libraries which are attempting to determine ILL costs and charges.

Wednesday, June 14

9:39 a.m.

3. Joanne C. Callard
Assistant Coordinator
Extension Library Services
University of Oklahoma Health Sciences Center Library
Oklahoma City

The Medical Librarian as Adjunct Faculty Member of a College Within a Health Sciences Center

Appintment of a librarian as an adjunct faculty member of one of the colleges in a Health Sciences Center is a new concept of librarianship and faculty cooperation at the University of Oklahoma Health Sciences Center.

The plan calls for the medical librarian to lecture to students on library materials and ways of accessing information. The librarian is a member of the Education and Resources Committee of the College of Pharmacy so that she can determine the curriculum and research needs of the College of Pharmacy in relation to library materials.

Evaluation by students and faculty shows that the Health Sciences Center benefits from the interchange of experience and knowledge between the cooperating disciplines while at the same time an economic and educational advantage is realized from advance planning for resource needs.

9:56 a.m.

4. Katherine M. Markee
Data Bases Librarian
Assistant Professor Library Science

Ottawa, Ontario

9:05 a.m.

1. Joan Ash
Associate Director of Libraries
University of Oregon Health Sciences Center Library
Portland

Management by Objectives in a Health Sciences Library

The University of Oregon Health Sciences Libraries have used management by objectives techniques for the past year with both clerical and professional staff. A formal mechanism has been developed to update job descriptions, conduct performance appraisals and formulate work plans. The result has been increased communication, job switching based on proven capabilities and interests, and a greater emphasis on developmental opportunities.

9:22 a.m.

2. Sylvia Feuer
Extramural Coordinator
Cleveland Health Sciences Library
Case Western Reserve University
Cleveland

*Effect of An Active Extramural Program
Upon a Resource Library*

NLM is discussing changing support from document delivery to extramural activities. What is the effect upon a resource library when a very active extramural program is developed? Based upon the experience of the Cleveland Health Science Library with its nine circuit librarians servicing 32 institutions and hospital departments, the demand upon the resources of the Regional Medical Library Participating Libraries can grow in an exponential manner.

9:39 a.m.

3. Margaret C. Hardy
Director of Libraries
Miami Valley Hospital
Dayton, Ohio

Raymond A. Palmer
Medical and Health Sciences Librarian
Health Sciences Library
Wright State University School of Medicine
Dayton, Ohio

Wednesday, June 14

*The Continuing Evolution of a Library System:
The Dayton Experience*

The activities of a unique and symbiotic health sciences library system now encompassing hospital libraries, a new medical school library, a Veterans Administration/medical school library, and two small research libraries are explored. Within this system, a courier service provides document delivery; a MEDLINE Consortium exists where institutions with terminals provide searches for other member institutions and individuals; a rational acquisition program assures quality collection development as well as cost containment; and the bane of every "small" librarian's life—cataloging—is being eliminated through the development of a technical processing center.

9:56 a.m.

4. Timothy C. Judkins
Associate Director for Technical
and Administrative Services

Charles W. Sargent, Ph.D.
Director, Library of the Health Sciences
Director
Educational Media Services and Chairperson
Health Communications Department
Texas Tech University
Lubbock

A Library Divided by 4

This paper describes the unique experience of planning three libraries at the same time. This includes planning collections, three libraries' facilities, and opening in three different locations within one year. The paper also describes the management and communications problems of this operation. The Texas Legislature in its enabling legislation established the Texas Tech University School of Medicine with the mandate to establish clinical teaching facilities in four locations. Three of those sites, Lubbock, Amarillo, and El Paso have buildings and programs with the fourth, Midland-Odessa, in the planning stages.

10:13 a.m.

5. Ruth W. Wender
Assistant Library Director for Extension Services
University of Oklahoma Health Sciences Center Library
Oklahoma City

*Effects of Charging on Selected Journal Title
Photocopying Requests*

The extension division of the University of Oklahoma Health Sciences Center Library completed a journal title analysis covering its requests from individual Oklahoma health professionals located where there is no adequate biomedical library and those at Oklahoma hospitals with libraries. One of the purposes of the study was to determine if charging for photocopies of articles of recent

Wednesday, June 14

publication date from a "restricted" list of common journal titles affected the number of requests for the four journal titles most requested in an earlier study, when no charge was made. It was found that for the two American published journals, the percentage of requests declined significantly with charging. The extension division also examined the most requested journal titles from the one class of users for whom it presently makes no charges for photocopying from the "restricted" list. Twelve of the fifteen journal titles most requested by this group were from the "restricted" list.

SESSION FIVE Private Dining Room #1
Moderator: David A. Kronick, Ph.D.

College of Medicine
East Tennessee State University
Johnson City, Tennessee

*Union Lists of Serials Compiled by
Health Sciences Libraries*

The new copyright law, decreased quotas for interlibrary loan reimbursement (or no reimbursement at all), and continued inflation are some factors generating interest in a higher percentage of local journal self-sufficiency. Union listings of serials are an essential element in any such program. The several ways consortia or groups of libraries can plan, implement and update such listings, and the respective merits of each, are delineated. The pitfalls to be avoided are not overlooked.

9:22 a.m.

2. Alison Bunting
Head, Consulting and Training Service
Pacific Southwest Regional Medical Library Services
Biomedical Library, University of California
Los Angeles

*Region XI Cooperative Serials Acquisition Program
(COSAP)*

The Region XI Cooperative Serials Acquisitions Program (COSAP) is a project funded by a National Library of Medicine Resource Project Grant administered by the Pacific Southwest Regional Medical Library Service. Fourteen Resource Libraries participated. The goals of the project are: (1) to insure an adequate collection of biomedical serials to support the diverse health professional

Wednesday, June 14

community in the states of Arizona, California, Hawaii and Nevada, while encouraging resource sharing and the limitation of duplication of titles among the major resource libraries of the region; (2) to effect a rational program of serials acquisitions and cancellations for Region XI; (3) to develop a regional plan utilizing the NLM SERLINE data base and the INQUIRE programs for rapid on-line communication of serials decisions. This paper describes the development of the COSAP data base, the training of serials personnel in the use of the SERLINE data base and the INQUIRE programs and the development of a regional program for serials acquisitions.

9:39 a.m.

3. Gary D. Byrd
Chief Medical Librarian
Medical Library
University of Missouri
Kansas City

Michael E. D. Koenig
Director, Development Department
Institute for Scientific Information
Philadelphia

*Systematic Serial Selection Analysis
in a Small Academic Health Science Library*

This paper describes the implementation of a very straightforward quantitative technique to analyze the serials collection at the Medical Library of the University of Missouri-Kansas City. The simplified operations research approach resulted in a savings of over \$1600 per year in subscription costs without reducing the net number of 700 titles or causing an imbalance in the subject distribution of our collection. By detailing both the rationale behind the process and the actual steps followed at UKMC in the summer of 1977, the authors demonstrate that operations research techniques can be used practically and successfully, even in small health science libraries. A more general and more rigorous operations research approach to the analysis of serials collections is also presented in a fashion that is as far as possible not mathematically forbidding.

9:56 a.m.

4. Millard F. Johnson, Jr.
Research Associate in Machine Methods
Washington University School of Medicine Library
St. Louis

*PHILSOM III Distributed Mini-Computer Based Network
for Serials Control*

The nature of change in medical libraries is discussed in relation to a computer-based serials control system that has been in continuous operation for 15 years. It is suggested that the technology affecting the architecture of library systems is advancing at an accelerated rate. Some considerations for library decision makers dealing with change are discussed.

Wednesday, June 14

9:22 a.m.

2. Anne Shannon Corner
Extramural Services Librarian
Medical Center Libraries
University of Cincinnati
Cincinnati

*Health Care in the United States:
The Medical Library Assistance Act in Context*

The Medical Library Assistance Act of 1965 is seen as part of a pattern of health care legislation which included Medicare/Medicaid and the Regional Medical Programs. Goals and objectives of the Act are compared to other programs begun that year.

Trends in the health care system from 1965 to the present are discussed.

The Medical Library Assistance Act and its programs and accomplishments are briefly reviewed with regard to the present and future of health care in the United States.

Fayetteville, North Carolina

Survey of Health Sciences Library Technicians

To facilitate the development of appropriate certification requirements for health sciences library technicians, this study was initiated by the MLA. Its purposes were twofold: to identify persons working in health sciences libraries in the United States and Canada who are health sciences library technicians, and to collect information about their employment, personal characteristics and educational background.

One questionnaire was sent to health sciences library directors in the U.S. and Canada asking them to identify the library technicians working in their libraries. A second questionnaire, collecting the desired information was sent to the identified library technicians.

*A Multipurpose Inventory of a Large Serials Collection:
Decision, Planning, Procedures, Progress*

The wisdom of conducting an inventory for collections of 100,000 or more volumes has been questioned. The Columbia University Health Sciences Library has well over 100,000 volumes with more than 12,000 titles in more than 70,000 square feet of space. This paper explains why it was impossible not to justify an inventory and describes the planning process, procedural principles (rather than specific steps), and progress of the multi-purpose inventory which began in March 1977.

SESSION SIX

State Ballroom

Moderator: Jess A. Martin
Director
Center for the Health Sciences Library
University of Tennessee
Memphis

9:05 a.m.

1. John C. Blair, Jr.
Librarian
William Carey College
School of Nursing Library
New Orleans

*Informational Needs of Student and
Beginning Health Science Librarians*

The author reviews efforts to gain input from library directors, deans and faculty of graduate schools of library science, and students or recent graduates regarding the needs of beginning medical librarians.

A brief summary is given of the first nationwide meeting concerning the role of the Association in orienting students and entry level people on an individual and group basis.

Proposals are made as to some of the services the Association could augment, modify or initiate for students and entry level people and a framework for evaluating any such services is presented for consideration by those interested in assessing the necessity and viability of such an effort.

Wednesday, June 14

*Management of a Learning Resource Center:
A Seven Year Study*

The authors discuss the evolutionary experience, management strategies and supporting utilization data for the twelve-year operation of the Learning Resource Center by the Visual Education Department at the Medical College of Virginia.

Management strategies which have evolved based on experience and utilization data are presented. The information presented includes production services, curriculum, collection, physical facilities, and staffing, and student usage.

10:13 a.m.

5. E. Ray Stinson
Cancer Information Specialist
Lister Hill Library of the Health Sciences
Dorothy A. Mueller
Assistant to the Vice President for Research
and Graduate Studies
The University of Alabama in Birmingham
Birmingham

*Survey of Health Professionals' Information Needs
Through Personal Interviews*

Between June 1976, and April 1977, the Lister Hill Library, under contract from the National Cancer Institute, conducted a survey of information needs of Alabama health professionals. The Cancer Information Specialist (CIS) interviewed 402 health professionals (including 309 physicians) who were randomly chosen from throughout the state. Included in the survey were a variety of health professionals from medical centers, urban areas, and semi-urban areas, as well as the many rural counties of Alabama.

During the interviews, health professionals were asked to respond to some 29 to 35 questions of three general types: (1) means by which the health professional currently obtains health care information, (2) other methods by which the health professional would like to be able to obtain this information, and (3) biographical information about the individual being interviewed (*e.g.*, specialty, hospital affiliations, types of practice, and professional age).

Using the coded responses on the questionnaires, the results of the survey were then computer-processed and a number of variables were crossmatched. The participation by all types of Alabama health professionals provided an overall picture of information-gathering habits and information needs. The crossmatching allowed the analysis of trends on specific subsets. Information from this survey is now being used to implement new cancer information services to health professionals in Alabama.

SESSION SEVEN

Wabash Parlor

Moderator: Michael J. Torrente

Assistant Director

Southeastern Regional Medical Library Program

A. W. Calhoun Medical Library

Emory University

Atlanta

Wednesday, June 14

9:05 a.m.

1. Jane McCarthy
Librarian
Muhlenberg Hospital
Plainfield, New Jersey

CHARGE—Hospital/Nursing Home Consortium

In January 1977 the Glass Memorial Library at Muhlenberg Hospital in Plainfield, New Jersey, funded by a project grant from the National Library of Medicine, started operation of a consortium with nine area nursing homes. The consortium was designed to provide audio-visual equipment and educational software to the staffs of the nursing homes as well as to the nursing staff of Muhlenberg Hospital and to the faculty and students of its nursing school. The framework for the consortium was inspired by recent and continuing unfavorable nursing home publicity in the Northeast.

"CHARGE CHATTER" is the consortium's newsletter. It is published frequently but irregularly. A catalog of the CHARGE software was distributed at the annual meeting. Supplements of new additions to the catalog are published with each issue of the newsletter.

CHARGE has been in operation now for nine months, and has lived up to expectations.

9:22 a.m.

2. Cheryl Newman
Medical Librarian
Riverview Hospital
Red Bank, New Jersey

Consortium Sans Argent

This is a description of the Monmouth Biomedical Information Consortium, organized in 1975, located in the New Jersey Shore area of New Jersey which is poor in library resources overall and remote from the two large medical collections in the state. Activities include document delivery, a union list, interlibrary loan of both print and media, a union card catalog of books as well as reference service and reference back-up as needed. Liaison is maintained with nonmedical libraries in the county through the Area-Wide Reference Council of the Monmouth County Library.

Wednesday, June 14

*Biomedical Information Services for Hospitals:
The California Experience*

The project was directed toward planning, developing and implementing a subregional biomedical information network among the 46 health care facilities (hospitals) of California RMP Area VI. The project coordinator directed by contacting administrators and health care professionals in the 46 institutions to present a plan for the network. The availability of specific information services was assured through contractual agreements. It was anticipated that the sub-regional network would be self-supporting after the 12-month project period. (Dec. 1, 1976 - Nov. 30, 1977). The working territory encompassed Mono, Inyo, Riverside and San Bernardino counties, the latter of which is the largest geographic county in the U.S. The project was funded by a grant from the National Library of Medicine.

9:56 a.m.

4. Helen Howe Saylor
Librarian
Presbyterian Hospital Medical Library
Albuquerque, New Mexico

Five Steps to Easier Record-Keeping

Record keeping is an integral part of the hospital medical librarian's responsibilities. Effectiveness and efficiency in maintaining an adequate system is, therefore, mandatory. The purpose of this paper is to explore five practical procedures to reduce time spent in keeping records.

Each procedure is discussed in terms of time spent setting up, expense, and usability. The procedures are adaptable to hospital, medical and nursing libraries of variable holdings and utilization.

Certification by Examination, 1975-76: A Survey
Dorothy H. Mims
Medical College of Georgia
Augusta

Wednesday, June 14

This presentation is based on a survey mailed to the 65 persons who took the MLA certification examination in 1975 and 1976. Using data from the 53 completed questionnaires, it reports on length and type of library experience, reasons for seeking MLA certification and for choosing the examination instead of taking an MLA-approved course. It also explores methods of preparation for the examination, including CE courses, and an evaluation of the tools studied and the courses for their relevance to the examination and to professional responsibilities.

Certification—A Changing Concept

Robert A. Berk, Ph.D.

Director, Division of Education

Medical Library Association

Chicago

This paper will deal briefly with the history of the certification program of the Medical Library Association. Topics to be discussed will include the rationale behind the current certification code, the Association's approach to the development of a competency-based examination, and the possible impact of the certification code on the profession. The concept of recertification will also be introduced.

*Measuring the Professional Competence
of Medical Librarians*

Richard P. Foley, Ph.D.

Associate Professor

The Center for Educational Development

University of Illinois at the Medical Center

Chicago

Professional certification examinations have been an important method for assessing competence within the health field. They have been criticized, however, and justly so, because of their lack of relevance to what professionals typically do on the job. Too often they test the recall of trivia rather than the competence expected of a health professional in the real world. To establish a certification examination more in line with day-to-day practice, the MLA conducted a six-phase process over a period of 22 months. The first task of the Certification Committee was to review the medical library field. This process resulted in dividing the field into three major functions: Public Services, Technical Services, and Administration. These major functions could be performed in five settings: a large or small academic library, a large or small hospital library, or a special library. Each function was next examined to determine relevant subfunctions. For example, within administration, "plans budget and oversees expenditures" was selected as a central sub-function. Twenty sub-functions were isolated within the three major areas. The committees then wrote situations which a medical librarian would typically encounter on the job. Situations were written for the twenty settings. The ensuing phase involved writing scenarios to delineate how the competent medical librarian would respond to each situation. This was followed by developing competency statements describing the skills required to perform what was outlined in the scenarios. A list of competencies was generated for each major function. These were then prioritized to determine what

Wednesday, June 14

proportion of the certification examination should be devoted to each. This blueprint provided the basis for writing the necessary number of examination items. This model was selected since it provided systematic data regarding actual practice in the field and resulted in an examination to test competence rather than the recall of random information.

Results of the April 14, 1978 Certification Examination

Jonathan Smilansky, Ph.D.

Assistant Professor

The Center for Educational Development

University of Illinois at the Medical Center

Chicago

Based on a list of competencies, a 300 multiple-choice item pool was developed and pre-tested as a basis for selecting the best 100 items for the certification examination. The pre-test was administered to a group of experienced medical librarians and to library school students with general library knowledge but no experience in medical libraries. The pre-test data made it possible to select items that discriminated between the two groups. The certification examination provided separate scores for performance in administration, public services and technical services. Within each of these areas scores were obtained for a total of 20 subfunctions including such things as preparing a budget, providing information to users on an individual basis and cataloging. This paper will report an analysis of data from the pre-test and certification examination.

HSA Information Needs and Their Use of Library Services
Winifred Sewell
Consultant
Cabin John, Maryland

The legislation, mission, and functions of Health System Agencies (HSAs) are discussed as they influence information needs. Data have been gathered on libraries in HSAs and services from other libraries which HSAs use. The health planning information system is examined, especially in relation to the medical library network. Recommendations are made as to how libraries can obtain help from and give help to HSAs.

*Standards for Health Practitioners and
their Impact on Libraries*

Leonard Fenninger, M.D.

Group Vice President, Medical Education

American Medical Association

Chicago

Activities relating to continued competence of physicians have, in recent years, become required by the federal government, state licensure agencies, and professional associations. Broadly speaking, there are three approaches that might assure that physicians keep abreast of medical knowledge: acquiring some specified number of hours in continuing education, practice audit and peer review, and examination. This paper reviews PSRO legislation, relicensure and recertification requirements and the potential role of health sciences libraries.

*Continuing Education for Health Professionals
and its Impact on Libraries*

Thomas F. Zimmerman, Ph.D.

Associate Vice Chancellor for Academic Affairs

University of Illinois at the Medical Center

Chicago

Continuing education for health professionals, once an elective activity, is now a requisite for practice. Multiple forces ranging from the expansion of knowledge to consumer malpractice concerns have led professional associations and states to make systematic continuing education participation a mandatory condition for maintenance of membership or renewal of licenses. Continuing education is expected to play a major part in assisting the professional in maintaining his or her practice competencies throughout a lifetime of learning. The anticipated impacts on libraries are seen to be focused toward five factors: (1) changing clientele, both in size and practice; (2) Increased needs and efforts to take the "book" to the learner rather than expecting the learner to come to the "book"; (3) Moving toward greater utilization of mediated instruction products; (4) Growing demand for rapid access and retrieval of information; (5) A potential role in stimulating broader interests and stimulating an avenue of entertainment. Each of these factors will play a part in influencing the size, shape and mode of operation of the medical library.

*Use of On-Line Reference Services in Health Science
Libraries in the United States and Canada*

Gloria Werner

Associate Biomedical Librarian for Public Services

UCLA Biomedical Library

Center for the Health Sciences

Los Angeles

The use of on-line bibliographic retrieval services has had a significant impact on health science libraries and their users. Based on analysis of a questionnaire sent to over 700 on-line search centers in the United States and Canada which utilize the National

*Extramural Grants Program of the
National Library of Medicine*
Ernest M. Allen, Sc.D.
Associate Director, Extramural Programs
National Library of Medicine
Bethesda, Maryland

Wednesday, June 14

The National Library of Medicine, National Institutes of Health, awards grants and contracts to assist medical libraries to develop improved health information services. The Medical Library Assistance Act of 1965 and its extensions provide the authority for several types of support pertinent to library needs and interests described briefly as follows: a. *Resource Improvement Grants* support the development of basic information collections either in a single institution or through a consortium of local health libraries that agree formally to share their basic health information collections. b. *Resource Project Grants* enable health science libraries to improve services to educators, students, researchers and practitioners. The grants provide support over and above normal operating expenses for periods up to three years provided the grantee can assure continuation beyond the grant period. c. *Research and Demonstration Grants* support investigations into more effective methods for processing and disseminating health information including biomedical librarianship and information science, biomedical communication, and continuing education. d. *Regional Medical Library Contracts* support a network structure that facilitates the exchange and provision of health information—NLM will continue to share the steadily increasing cost of document delivery as well as the regional network building functions and responsibilities.

*The Research Collections Program of the
National Endowment for the Humanities*

Margaret S. Child, Ph.D.

Assistant Director for the Research Collections
Division of Research Grants
National Endowment for the Humanities
Washington, D.C.

The Research Collections Program of the Division of Research Grants of NEH was set up to assist in making the raw materials of research more accessible to scholars in the humanities. Historians of science, technology and medicine are included in the constituency served by this program, and it has made a small number of grants dealing with research resources specific to those fields. It has also made several grants for projects which address national problems in the archival and library field and has supported pilot projects in systems development and library automation whose results are expected to expedite the research of scholars in every discipline. Dr. Child will describe both successful and unsuccessful applications in all these categories and will comment on the ways in which she perceives the programs might respond to the needs of medical libraries.

*Library Programs of the Office of Education and
Their Relevance to the Medical Library Profession*

Dick W. Hays

Associate Commissioner/Director
Office of Libraries and Learning Resources
U.S. Office of Education
Washington, D.C.

Wednesday, June 14

The programs that will be discussed are 1) The Library Services and Construction Act which supports public library services and networking among all libraries; 2) Title IV-B of the Elementary and Secondary Education Act for the acquisition of school library resources; 3) various programs under the Higher Education Act whose purposes include: Title II-A College Library Resources; Title VI-A Undergraduate Instructional Equipment; Title II-C Support for Major Research Libraries; Title II-B Research and Demonstration projects for all types of libraries and Title II-B Training, provides fellowships and institutes for the training and retraining of library professionals and paraprofessionals. While these programs do not directly relate to medical libraries, the discussion will focus on various ways to foster cooperation among all libraries.

Programs of the Council on Library Resources

Nancy E. Gwinn

Information and Publications Officer

Council on Library Resources

Washington, D.C.

The Council on Library Resources, Inc. (CLR), is a private operating foundation established in 1956 by the Ford Foundation. Its current program of funding gives priority to projects concerned with automation, networks, standards, national library services, preservation, micrographics, library management, professional development of individual librarians, improving library services to users, and international library cooperation. Although CLR focuses chiefly on academic and research libraries, many of the programs funded by CLR have relevance for all libraries including medical libraries, and, in particular, academic and research libraries. Several projects over the years have involved the National Library of Medicine, either as a grant recipient or co-sponsor. Among the Council's current programs, the CLR Fellowship Program and the new Health Sciences Library Management Intern Program are likely to interest medical and health sciences librarians.

*Report to the Membership —
MLA/NLM Liaison Committee —
Research in Medical Libraries*

Moderator: Priscilla M. Mayden

Director, Spencer S. Eccles Health Sciences Library
University of Utah, Salt Lake City

*Recommended Improvements in the Research Grants
Program of the NLM*

Martin M. Cummings, M.D.

Director, National Library of Medicine
Bethesda, Maryland

Although proud of the significant contribution made by several research grants, NLM was concerned with the small number of high quality research applications received. Differences of opinion of staff and others as to the reason for this problem led to the establishment of a Task Force on the Extramural Research Grant Program. The charge to the Task Force was to carefully evaluate current and past research projects, and make recommendations to assure submission of more high-quality applications. In particular, the Task Force was expected to determine whether investigators now exist to submit such proposals or whether some sort of research career development program needs to be mounted. The several important recommendations submitted by the Task Force will be discussed. These should have an influence on library and medical information systems long-range planning and development.

*Research in Natural Settings
as Applied to Medical Libraries*

Nancy Lorenzi

Director, Medical Center Libraries

and Special Assistant to the Senior Vice-President

University of Cincinnati

Cincinnati

Research to many practicing librarians connotes laboratory experimentation or very sophisticated experimental and quasi-experimental design, usually conducted in centers of higher education and usually at centers that have conducted similar research in the past. Another form of research is known as field experimentation. Field research occurs in natural settings, such as medical libraries, where the subject's behavior is natural. This talk focuses on field research and the possibilities within a medical library.

Pauline A. Atherton

Professor

Syracuse University School of Information Studies
Syracuse, New York

Thursday, June 15

Medical Librarianship as practiced in formal library settings has not been researched as much as medical library systems development. This review will outline some areas that should receive attention and study. Known research which have some impact will be highlighted.

You Need Only One.

When selecting an acquisitions agent or changing from your current agent, what are your needs and who should you be looking for?

Does your library need . . . ?

- 1. Economical programs specially designed to aid library budgets.
- 2. Complete U.S. and European sales/service staffs and fulfillment centers.
- 3. Periodicals, continuations, and monographs, domestic and foreign.
- 4. Frequent bibliographic and service publications.
- 5. Coordinated programs for conversion from "direct ordering" or other agents.
- 6. Worldwide resources.

If these are your needs, then Stechert Macmillan, Inc. is your one source — one service acquisitions agency!

With over 100 years of acquisitions experience, Stechert's tradition of excellence (started way back in 1872 by

Stechert-Hafner) offers you a total, comprehensive service, whether your library is large or small; academic, public or special; domestic or foreign.

Coupling these six Stechert Macmillan services with our annual "Holdings Renewal List" and quarterly claims report for periodicals, "Standing Order" program for continuations; Publisher Relations Program; and BOPFA (Blanket Order Program for French Acquisitions) and PONTA (Popular New Titles From Abroad) plans — it's easy to see why, when you select Stechert Macmillan, "You Need Only One!"

Why not write our Sales Promotion Manager today for information about the complete line of Stechert Macmillan services!

SPEAKER'S INDEX

Ernest M. Allen, Sc.D.	June 14	8:00 p.m. - 10:00 p.m.
Pauline A. Atherton	June 15	10:00 a.m. - 11:00 a.m.
Philip Bashook, Ed.D.	June 12	2:15 p.m. - 5:15 p.m.
William K. Beatty	June 12	2:15 p.m. - 5:15 p.m.
Robert A. Berk, Ph.D.	June 14	11:00 a.m. - 12:00 Noon
Albert M. Berkowitz	June 12	2:15 p.m. - 5:15 p.m.
Henry M. Betts, M.D.	June 12	2:15 p.m. - 5:15 p.m.
Doris Bolef	June 12	2:15 p.m. - 5:15 p.m.
Arthur Broering	June 12	2:15 p.m. - 5:15 p.m.
Margaret S. Child, Ph.D.	June 14	8:00 p.m. - 10:00 p.m.
Gilbert J. Clausman	June 12	9:00 a.m. - 9:45 a.m.
Susan Y. Crawford, Ph.D.	June 14	2:15 p.m. - 4:30 p.m.
Martin M. Cummings, M.D.	June 15	10:00 a.m. - 11:00 a.m.
Robert Donati	June 12	2:15 p.m. - 5:15 p.m.
Ann L. Farren	June 12	2:15 p.m. - 5:15 p.m.
Leonard Fenninger, M.D.	June 14	2:15 p.m. - 4:30 p.m.
Janet Fisher	June 12	2:15 p.m. - 5:15 p.m.
Jo Ann Flair	June 13	2:00 p.m. - 4:00 p.m.
Richard P. Foley, Ph.D.	June 14	11:00 a.m. - 12:00 Noon
Arthur Freeman, D.V.M.	June 12	2:15 p.m. - 5:15 p.m.
Ellen Gartenfeld	June 12	2:15 p.m. - 5:15 p.m.
Nancy E. Gwinn	June 14	8:00 p.m. - 10:00 p.m.
Maxine Hanke	June 13	2:00 p.m. - 4:00 p.m.
Dick W. Hays	June 14	8:00 p.m. - 10:00 p.m.
C. K. Huang	June 12	8:00 a.m. - 8:50 a.m.
Henry M. Koehler	June 12	2:15 p.m. - 5:15 p.m.
Miriam H. Libbey	June 12	9:00 a.m. - 9:45 a.m.
Nancy Lorenzi	June 15	10:00 a.m. - 11:00 a.m.
Erika Love	June 15	11:30 a.m. - 12:00 Noon
Dale R. Middleton	June 12	2:15 p.m. - 5:15 p.m.
Jean Miller	June 12	2:15 p.m. - 5:15 p.m.
Dorothy H. Mims	June 14	2:00 p.m. - 4:00 p.m.
Walter L. Necker	June 12	2:15 p.m. - 5:15 p.m.
William A. Overholt, Ph.D.	June 12	2:15 p.m. - 5:15 p.m.
Irwin H. Pizer	June 12	9:00 a.m. - 9:45 a.m.
Grace R. Plummer	June 12	2:15 p.m. - 5:15 p.m.
Fred W. Roper, Ph.D.	June 13	2:00 p.m. - 4:00 p.m.
John H. Schneider, Ph.D.	June 12	2:15 p.m. - 5:15 p.m.
Winifred Sewell	June 14	2:15 p.m. - 4:30 p.m.
Jonathan Smilansky, Ph.D.	June 14	11:00 a.m. - 12:00 Noon
David Stahl	June 12	2:15 p.m. - 5:15 p.m.
Richard Daniel Smith, Ph.D.	June 12	2:15 p.m. - 5:15 p.m.
Pauline Vaillancourt, D.L.S.	June 12	2:15 p.m. - 5:15 p.m.
William D. Walker	June 12	2:15 p.m. - 5:15 p.m.
Gloria Werner	June 14	2:15 p.m. - 4:30 p.m.
John J. Witte, M.D.	June 13	2:00 p.m. - 4:00 p.m.
Martha Jane Zachert, D.L.S.	June 12	11:15 a.m. - 12:15 p.m.
Thomas F. Zimmerman, Ph.D.	June 14	2:15 p.m. - 4:30 p.m.

Core list of journals- for medical libraries world-wide

British Medical Journal

A comprehensive general medical journal. Essential for every medical man or student who wishes to keep informed of research in medical science, of trends in clinical medicine, and of professional activities. Published weekly. Annual Subscription \$56.00

Specialist Journals associated with the BMJ

JOURNAL OF CLINICAL PATHOLOGY
Published monthly. Annual Subscription \$70.50

ARCHIVES OF DISEASE IN CHILDHOOD
Published monthly. Annual Subscription \$65.50

BRITISH HEART JOURNAL
Published monthly. Annual Subscription \$65.50

CARDIOVASCULAR RESEARCH
Published monthly. Annual Subscription \$60.00
(Combined Annual Subscription to Brit. Heart J. and Cardiovasc. Res., \$108.00)

GUT—Journal of the British Society of Gastroenterology
Published monthly. Annual Subscription \$65.50

JOURNAL OF NEUROLOGY, NEUROSURGERY AND PSYCHIATRY
Published monthly. Annual Subscription \$65.60

BRITISH JOURNAL OF OPHTHALMOLOGY
Published monthly. Annual Subscription \$65.60

THORAX
Annual Subscription (six issues) \$49.00

ANNALS OF THE RHEUMATIC DISEASES
Annual Subscription (six issues) \$49.00

BRITISH JOURNAL OF VENEREAL DISEASES
Annual Subscription (six issues) \$49.00

JOURNAL OF MEDICAL GENETICS
Annual Subscription (six issues) \$49.00

BRITISH JOURNAL OF INDUSTRIAL MEDICINE
Published quarterly. Annual Subscription \$32.00

JOURNAL OF EPIDEMIOLOGY AND COMMUNITY HEALTH
Published quarterly. Annual Subscription \$32.00

The BMJ & Professional and Scientific Publications

Beside its own list of Journals the BMJ publishes a growing list of other journals, on an agency basis. Some are published under the B.M.A. imprint, others under the imprint of Professional and Scientific Publications—a Registered Bureau Name of the B.M.A.

ANNALS OF CLINICAL BIOCHEMISTRY
The Journal of the Association of Clinical Biochemists.
Annual Subscription (six issues) \$29.50

ANNALS OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND
The Journal of the Royal College of Surgeons of England.
Annual Subscription (six issues) \$49.00

BRITISH DENTAL JOURNAL
The Journal of the British Dental Association.
Annual Subscription (24 issues) \$55.00

JOURNAL OF MEDICAL ETHICS
The Journal of the Society for the Study of Medical Ethics.
Published quarterly. Annual Subscription \$25.00

TRANSACTIONS OF THE OPHTHALMOLOGICAL SOCIETIES OF THE UNITED KINGDOM
Volume Price (4 parts) \$49.00

All subscriptions to North America can be ordered from the:
BRITISH MEDICAL JOURNAL
1172 Commonwealth Ave, Boston, Mass. 02134,
or through any leading subscription agent or bookseller.

CONTRIBUTED PAPERS—AUTHOR/SPEAKERS' INDEX

All sessions are concurrent and take place between 9:00 a.m. and 10:30 a.m. on Wednesday, June 14.

NOTES

The first part of the paper discusses the general theory of the subject, and the second part discusses the special case of the subject. The first part is divided into two sections, the first of which discusses the general theory and the second of which discusses the special case. The second part is divided into two sections, the first of which discusses the general theory and the second of which discusses the special case. The first part is divided into two sections, the first of which discusses the general theory and the second of which discusses the special case. The second part is divided into two sections, the first of which discusses the general theory and the second of which discusses the special case.

NOTES

1. The first birding point is located at the intersection of the road and the stream. This area is a good spot for observing waterfowl and shorebirds.

2. The second birding point is located in the open field. This area is a good spot for observing songbirds and raptors.

3. The third birding point is located in the wooded area. This area is a good spot for observing forest birds and owls.

4. The fourth birding point is located in the meadow. This area is a good spot for observing grassland birds and butterflies.

5. The fifth birding point is located in the wetland. This area is a good spot for observing wetland birds and amphibians.

6. The sixth birding point is located in the marsh. This area is a good spot for observing marsh birds and insects.

7. The seventh birding point is located in the prairie. This area is a good spot for observing prairie birds and mammals.

8. The eighth birding point is located in the tundra. This area is a good spot for observing tundra birds and lichens.

9. The ninth birding point is located in the desert. This area is a good spot for observing desert birds and reptiles.

10. The tenth birding point is located in the mountains. This area is a good spot for observing mountain birds and mammals.

Map of the area showing the location of the birding points.
