PREFACE

The ***Cancer Librarians Section Core Cancer Library*** is a focused list of books on cancer published by the foremost publishers in a five-year period, from 2013-2017. The intended readership is academics, students, clinicians and researchers. Each entry contains the following bibliographic fields: title, authors/editors, publisher, publication date, edition, International Standard Book Number (ISBN), and the publisher's price for the print publication (the e-version price may differ). Published in June 2016, this edition of the Core Cancer Library includes newer works and updated links to each book's webpage on publisher websites. Please note that prices are subject to change; readers should consult the individual publisher's website for the current price at the time of purchase.

The ***CLS Core Cancer Library 2016*** serves as a collection development and management tool for academic and hospital medical librarians. Feedback from readers is welcomed.
