Experience firsthand how these innovative, solution-driven resources can help speed diagnosis and deliver better patient outcomes, while adding a new dimension in medical education and clinical practice.

Make sure you pick up a ticket to receive a **FREE massage at McGraw-Hill's Relaxation Station** when you view a product demonstration.

Welcome to the 2017 annual meeting of the Medical Library Association and Seattle! This year's theme—*Dream. Dare. Do.*—is particularly suited to our western environment. The Pacific Northwest is a land of adventure. It is all about exploring possibilities, taking the road less traveled, and going on new adventures.

Dream—as you listen to speakers and presenters, explore poster sessions, and attend late breaking lightning talks—about how you could implement new ideas or services in your environment.

Dare to share your knowledge and expertise. Dare to explore new ideas, network, and develop relationships with new colleagues.

Do take time from the meeting to explore all that Seattle has to offer and come back to the meeting refreshed and reenergized.

The 2017 National Program Committee assembled an excellent array of speakers, papers, and posters, while the Local Assistance Committee endeavored to ensure that you have useful information about the best of Seattle and the surrounding areas before and during the meeting.

Our plenary speakers will share their experiences and adventures, including Julie Angus navigating the open waters of the Atlantic Ocean in a rowboat and Hope Jahren following her dreams to become a research scientist. The new director of the National Library of Medicine, Patricia Flatley Brennan, will deliver the Joseph Leiter NLM/MLA Lecture, and Julia Sollenberger, AHIP, FMLA, will deliver the Janet Doe Lecture. Each speaker will share knowledge and perspective gained in these endeavors and about their adventures in leadership that are relevant to each of us.

On Sunday, I hope that you will participate in an open forum on activism and respond to the challenge to engage locally and nationally in these turbulent times. At the forum, Governmental Relations Committee Chair Cristina Pope, AHIP, will facilitate the panel discussion with Katie Gibbs from the Canadian nonprofit Evidence for Democracy and M.J. Tooey, AHIP, FMLA, past-president of MLA, who has a tremendous track record of engagement in responding to issues in her community and advancing our profession.

Please take time to explore the exhibit hall to learn from our sponsors and exhibitors to see what is new or changed in their products. As well as learning from our exhibitors, you will find that the exhibit hall is a great place to connect with colleagues or to take a few minutes to relax.

The meeting is also about reconnecting with *frolleagues**, developing new *frolleagues*, and making connections with thought leaders. Networking is one of the strongest benefits to meeting face-to-face. Dare to reach out to an MLA speaker or leader to establish a new relationship, engage a mentor, or just to enjoy someone's company.

Meetings are not just about the big moments with plenary speakers, they are also about your small moments reflecting on what you have learned and how new ideas might work for you. I hope that you will set a goal of taking away one great idea for every day that you are at MLA '17 so that you can return to your working life prepared to dream, dare, and do!

—Teresa L. Knott, AHIP
2016/17 MLA President

* With thanks to M.J. Tooey for coining the term "*frolleagues*" to describe people who are friends and colleagues.

Welcome

The MLA '17 National Program Committee and Local Assistance Committee welcome you to Seattle for six days of an alluring meeting. During our meeting, you will be encouraged to *Dream. Dare. Do.* in this entrepreneurial and exciting destination. We hope that you will take away many ideas from inspired programming and find memorable opportunities to connect with colleagues while you are here.

We librarians can relate to Seattle, a city that was born on entrepreneurial ideas. *Dreamers* created the concepts for companies like Boeing, Microsoft, and Starbucks and then *dared* to make these dreams happen in a very big way. Librarians also develop new ideas. Our services and the way we do our work have been in a constant state of change for many years. We are constantly *dreaming* of and reimagining our roles in our institutional missions. We continue to *dare* to present these dreams to our users so that we can *do* our best to provide imaginative, relevant, and useful resources and services.

Seattle is also a city of incredible sights, flavors, scents, sounds, and sensations that inspire locals and travelers alike to take full advantage of all it has to offer. Situated in the beautiful Pacific Northwest—surrounded by water, mountains, and evergreen forests of the Puget Sound Region—"Seattle" is a derivative of the Suquamish name "Seathl." Seathl was a chief of the tribe at the time the first white settlers arrived in 1851. Also known as the "Emerald City," Seattle will host several Memorial Day Weekend events, including the "nation's largest community-powered arts festival," called the Northwest Folklife Festival, held May 26–29 at the Seattle Center, home of the Space Needle. For sporting events, soccer and baseball fans can enjoy Seattle teams at fields just three miles south of the Washington State Convention Center, including the Sounders at CenturyLink Field on May 27 or the Mariners at Safeco Field on May 31. The Seattle International Film Festival, America's most highly attended film festival, runs May 18–June 11 at theaters throughout the city. And for the foodie in all of us, May menus brim with regional wild salmon, Olympic Peninsula chanterelles, and, thanks to a long growing season, spring strawberries.

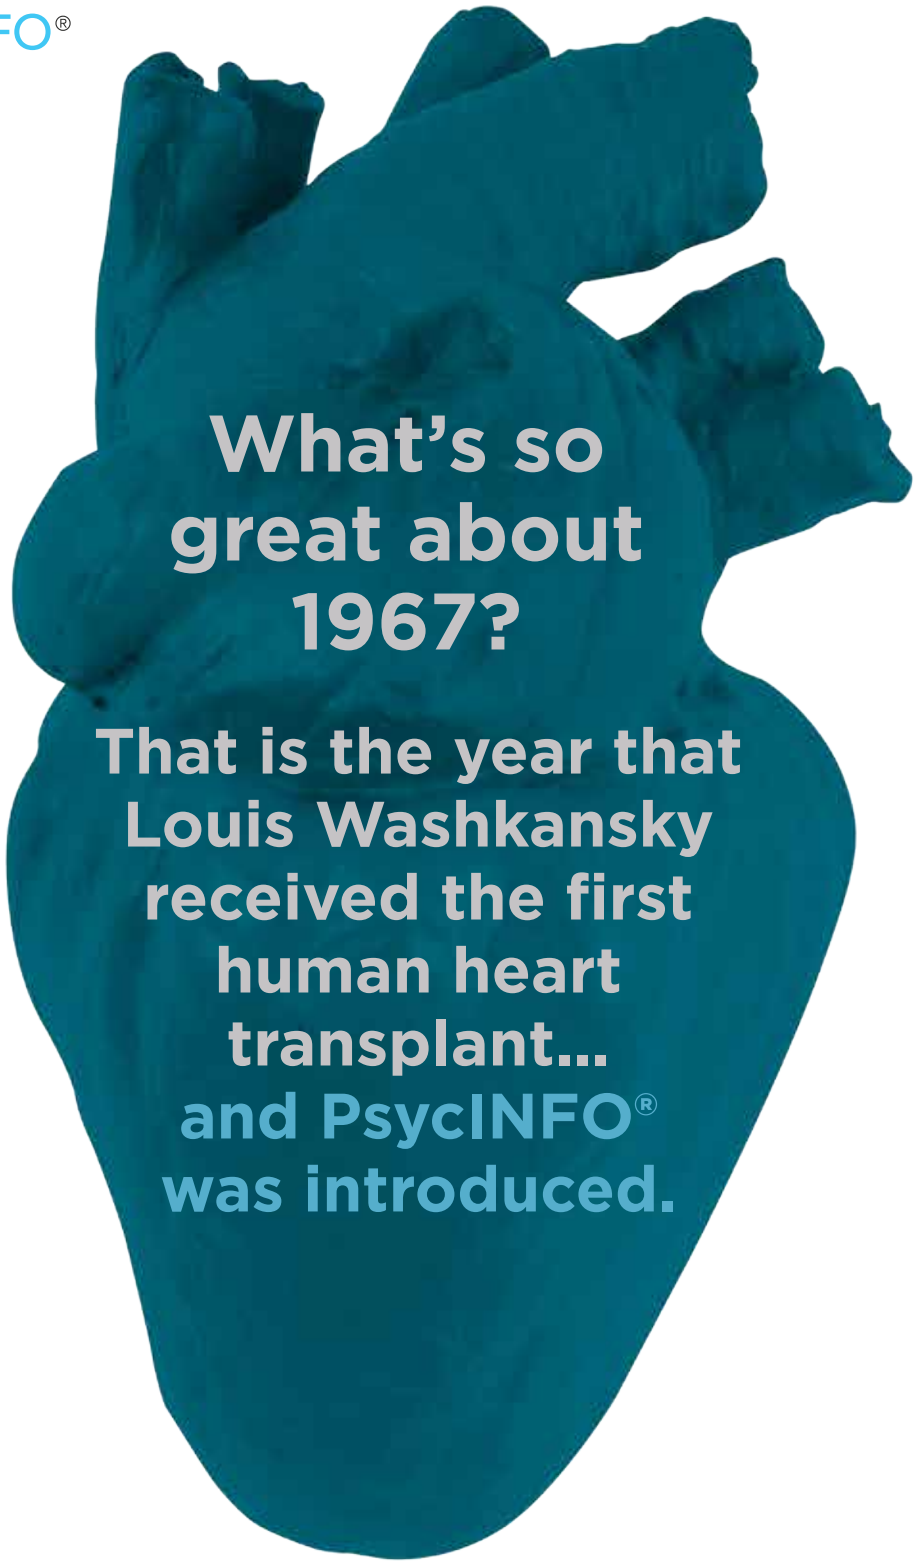

We are excited that you are here in Seattle and look forward to seeing you at MLA '17, a fun and educational meeting where we will *Dream. Dare. Do!*

Featured Speakers

Sunday, May 28, 10:30 a.m.–11:55 a.m.

John P. McGovern Award
Lecturer:
Julie Angus

Sponsored by EBSCO Health

“Rowing Across the Atlantic: Strategies to Reach Your Goals”

Julie Angus is an accomplished adventurer, bestselling author, and scientist. She is the first woman to row across the Atlantic Ocean from mainland to mainland and a recipient of the *National Geographic* Adventurer of the Year award. She has also cycled across continents, rowed thousands of kilometers of coastlines and rivers, and organized a *National Geographic* expedition that sailed ancient Phoenician trading routes. *Explore Magazine* listed her as one of North America's leading adventurers, and she is regularly seen on television shows such as *Canada AM*, *CBC News Sunday*, and *Daily Planet*. She is an engaging and entertaining speaker who inspires audiences and demonstrates techniques everyone can use to reach goals and overcome challenges.

Monday, May 29, 9:00 a.m.–10:00 a.m.

Janet Doe Lecturer:
Julia F. Sollenberger, AHIP, FMLA

“Looking Inside Ourselves: A Culture of Kindness”

Julia F. Sollenberger, AHIP, FMLA, is associate vice president and director, Medical Center Libraries and Technologies, and associate professor, Public Health Sciences, at the University of Rochester Medical Center, Rochester, NY. She has worked at the University of Rochester since 1980 in successively more responsible positions but began her career at the National Library of Medicine as an Associate Fellow.

Sollenberger has a notable record of publications, having authored numerous articles, book chapters, presentations, and posters. She has held leadership positions in a variety of professional associations, at local, regional, and national levels, including president of the Association of Academic Health Sciences Libraries and member of the MLA Board of Directors. Sollenberger has received several awards, including the MLA Estelle Brodman Award for the Academic Medical Librarian of the Year and the National Institutes of Health Award of Merit. In 2005, she became an MLA Fellow.

Sollenberger participated in the original 1992 Rochester Study on the value of hospital libraries, and she served as chair of the Planning Team for the multisite study of the value of information in patient care (the Value Study). Results of this study were published in the January 2013 issue of the *Journal of the Medical Library Association*, and the article received MLA's 2014 Ida and George Eliot Prize. Sollenberger has also been involved in leadership training for more than a decade, twice participating as a mentor in the National Library of Medicine/Association of Academic Health Sciences Libraries (AAHSL) Leadership Fellows program and serving as chair of the AAHSL Future Leadership Committee.

Wednesday, May 31,
9:00 a.m.–10:00 a.m.

Joseph Leiter NLM/MLA
Lecturer:
Patricia Flatley Brennan

Patricia Flatley Brennan, director of the National Library of Medicine (NLM), is the first nurse and first female to serve as permanent head of the library in its 180-year history. Brennan came to NLM from the University of Wisconsin–Madison, where she was the Lillian L. Moehlman Bascom Professor, School of Nursing and College of Engineering, and led the Living Environments Laboratory (wid.wisc.edu/research/lel/) at the Wisconsin Institute for Discovery (wid.wisc.edu). Her pioneering research in the use of information technology to support patients and care givers has been funded by the National Institutes of Health, the Agency for Healthcare Research and Quality, and the Robert Wood Johnson Foundation, among others.

Brennan is a past president of the American Medical Informatics Association, a member of the National Academy of Medicine, and a fellow of the American College of Medical Informatics, the American Academy of Nursing, and the New York Academy of Medicine.

Brennan received a bachelor of science degree in nursing from the University of Delaware, a master of science degree in nursing from the University of Pennsylvania, and a doctoral degree in industrial engineering from the University of Wisconsin–Madison. Following seven years of clinical practice in critical care nursing and psychiatric nursing, she held several academic positions at Marquette University, Milwaukee, WI; Case Western Reserve University, Cleveland, OH; and the University of Wisconsin–Madison. In addition, she spent a year at NLM in 2002 to 2003 as a visiting senior scientist at the Lister Hill National Center for Biomedical Communications.

Wednesday, May 31,
10:30 a.m.–noon

Plenary Session 5
Speaker:
Hope Jahren

Hope Jahren is an award-winning scientist who has been pursuing independent research in paleobiology since 1996, when she completed her doctorate at the University of California–Berkeley and began teaching and researching, first at the Georgia Institute of Technology and then at Johns Hopkins University. She has received three Fulbright Awards and is one of four scientists, and the only woman, to have been awarded both of the Young Investigator Medals given in the earth sciences. Currently, she is a tenured professor at the University of Hawaii–Mānoa in Honolulu, where in 2008, she built the Isotope Geobiology Laboratories, with support from the National Science Foundation, the Department of Energy, and the National Institutes of Health. At the conclusion, there will be a book signing with Jahren for *Lab Girl*.

Continuing Education Courses

Continuing Education Courses

Continuing education (CE) courses are a great way to stay at the forefront of the health information profession. Onsite registration of CE courses is available; however, some courses might have reached their attendance maximum and be closed. Visit the MLA Registration Center to view course descriptions, instructors, and MLA CE contact hours. Details are also available on MLANET (www.mlanet.org/mla17/continuingeducation).

Offsite Courses

Hands-on computer courses are held at the following offsite location, and not at the Washington State Convention Center (WSCC) or the Sheraton Seattle Hotel. See your ticket for meeting location and times. Maps are available at the MLA Registration Center and Hospitality Center for those attendees driving to the offsite location.

Sunrise Seminars

DynaMed Plus Updates and Case Studies

 Room 613

Learn about the latest updates in content, searching, and specialty editors. Review three case studies of health systems that have successfully made the switch.

Speakers: Christian Patrick and Tracey Bahia, EBSCO

Using Evidence to Inform Practice: The Solution at Point of Care, Point of Reference, and Point of Learning

 Room 620

Health care is evolving but one thing that has remained consistent is the goal of all nurses and health care professionals to provide the highest quality care that improves patient outcomes. Nurses and clinical professionals access and use the best available evidence at the point of care, the point of reference, and the point of learning, all of which have changed in recent years. The clinical setting changes have influenced how clinicians work, access, and use information in their workflow. Through use of case studies and clinical experiences, our keynote speaker will walk you through how the changing paradigm of health care has had an impact on

clinical decision making, and how you as a librarian can support quality care by providing health care professionals with the right information when and where they need it.

Speaker: Anne Dabrow Woods, Chief Nurse, Health Learning, Research and Practice, Wolters Kluwer

7:30 a.m.–8:30 a.m.

Sunrise Yoga

 Room 205

Members of Hospital Libraries Section—along with members of the Leadership and Management Section, Research Section, and Medical Library Education Section—invite you to join our very own certified yoga instructor, Joanne Gard Marshall, AHIP, FMLA, for Sunrise Yoga. What a great way to start our meeting by “greeting the sun” and flowing through postures with Marshall! Wear comfortable clothes, bring your mat or a towel, and get your breathing and spirit in the best place to take in all this meeting will have to offer.

Coming in spring 2017, MLA will launch its new learning management system. Via MEDLIB-ED, you can:

- Access all MLA education programs including orientations and training
 - Access on-demand webinars: MLA offers the very latest education for the health sciences librarian
 - Track your transcripts: Credits earned via MEDLIB-ED are maintained in an online transcript that you can access 24/7
 - Browse the MLA Clearinghouse, which lists all courses offered for MLA continuing education credit, and will be integrated into MEDLIB-ED, making it much easier to find learning opportunities
 - Gain self-assessment opportunities based on the newly, revised professional competencies

Open Forum

Activism in a Time of Turbulence

 Ballroom 6

Please join us in a special plenary open forum session sponsored by MLA's Governmental Relations Committee (GRC) to discuss how MLA as an organization and you as members can affect government decision making in the area of health information. The discussion will be moderated by GRC Chair Cristina Pope, AHIP, with two distinguished panelists.

Katie Gibbs is a scientist, organizer, and advocate for science and evidence-based policies. While completing her doctorate at the University of Ottawa researching threats to endangered species, she was one of the lead organizers of the "Death of Evidence" rally, which was one of the largest science rallies in Canadian history. Gibbs is a cofounder and executive director of Evidence for Democracy, a national, nonpartisan, not-for-profit organization that promotes science integrity and the transparent use of evidence in government decision making. She has a

diverse background organizing and managing various causes and campaigns. Gibbs is frequently asked to comment on science policy issues and has been quoted and published in numerous media outlets, including the *Guardian*, *Science*, *Nature*, and the CBC.

M.J. Tooe, AHIP, FMLA, associate vice president, Academic Affairs; executive director, Health Sciences and Human Services Library; and director, National Network of Libraries of Medicine, Southeastern/Atlantic Region, University of Maryland–Baltimore, was president of MLA in 2005/06, is a member of the Joint MLA/Association of Academic Health Sciences Libraries (AAHSL) Legislative Task Force, was a member of the MLA Futures Task Force, and led the Vital Pathways Project, which identified directions for hospital librarians to prove their worth. She has served on a number of publisher and consortial advisory boards advocating for the medical library community. Through these roles, she has had extensive experience furthering MLA's legislative priorities at the grassroots and federal levels, meeting with Congressional leaders during the Joint MLA/AAHSL Legislative Task Force's annual Capitol Hill Day.

Audience participation will be encouraged.

Note: MLA will organize online open forums in June and July to ensure members can contribute their thoughts to topics that were previously scheduled. Please watch for announcements.

We will wrap up with a review of training materials, including handouts, video tutorials, and webinars.

Evidence Synthesis and Systematic Review: Premier for Medical Librarians

Room 615

Evidence synthesis is the foundation of modern evidence-based medicine. Systematic review, a type of evidence synthesis, requires an exhaustive and comprehensive database search to identify all relevant literature on one or more research questions. However, not all evidence synthesis needs a comprehensive literature search. This presentation will give a brief introduction of different types of evidence synthesis and related requirements for literature search.

An "Inside/Outside" Look at Cochrane: Update from Carol Lefebvre

Room 603

Carol Lefebvre, independent information consultant and Cochrane Information Retrieval Methods Group co-convenor, will provide an "insider's" look at Cochrane from a library/information perspective and outline how the Cochrane Library continues to be an essential tool for evidence-based medicine (EBM). As an "outsider" from the publisher, Wiley, she will present an independent view.

Nature Masterclasses: Supporting Resercher Development

Room 611

Publication is really important to a researcher because it is the way that you get to tell the world what you have done and what you think it means. But getting published in a top-tier journal can be competitive. The number of researchers has been growing steadily by 4%–5% per year, yet the average acceptance rate at scientific journals is only around 50%. It is therefore vital that researchers understand how to write effectively and how the publishing process works. However in a 2014 survey of postdocs, 59% said they do not have well-developed writing skills, 54% received only informal training from thesis mentors, and 12% received no training at all. With the aim of providing researchers with a professional training solution, Nature Research has developed Nature Masterclasses, a training service devoted to scientific publishing and delivered by Nature journal editors. As a medical librarian, this session will teach you how Nature Masterclasses enable you to support your researchers with scientific writing and publishing training.

The Value of Visualization. See VisualDx in Action.

Room 612

VisualDx was developed to assist clinicians, residents, and students in medical decision making by providing peer-reviewed

evidence-based information at the point of care. Moreover, the tool is designed to think and work like a clinician in practice. VisualDx combines a diagnostic framework with visualization of disease. See how to quickly build a visual differential diagnosis across medicine as well as access patient-specific clinical information and images. The result is improved diagnostic accuracy and improved patient care.

The Evolving Role of the Library in Institutional and Faculty Assessment: A Discussion of Research Metrics

📍 Exhibit Hall 4AB, Technology Showcase Stage

Librarians have been redefining their role for the past twenty-five years. In today's electronic world, librarians position themselves beyond traditional search experts. They focus their activities, expertise, and understanding of complex metrics to now serve a new audience: research administration and research program strategy. In this session, we will review these analytical use cases through the InCites™ platform and hear from Kate Anderson from the Zalk Veterinary Medical Library, University of Missouri–Columbia, and Karen Gutzman from the Galter Health Sciences Library, Northwestern University, Chicago, IL, and their role in the use of

research performance metrics.

"I Make a Difference" Professional Competencies Story Booth

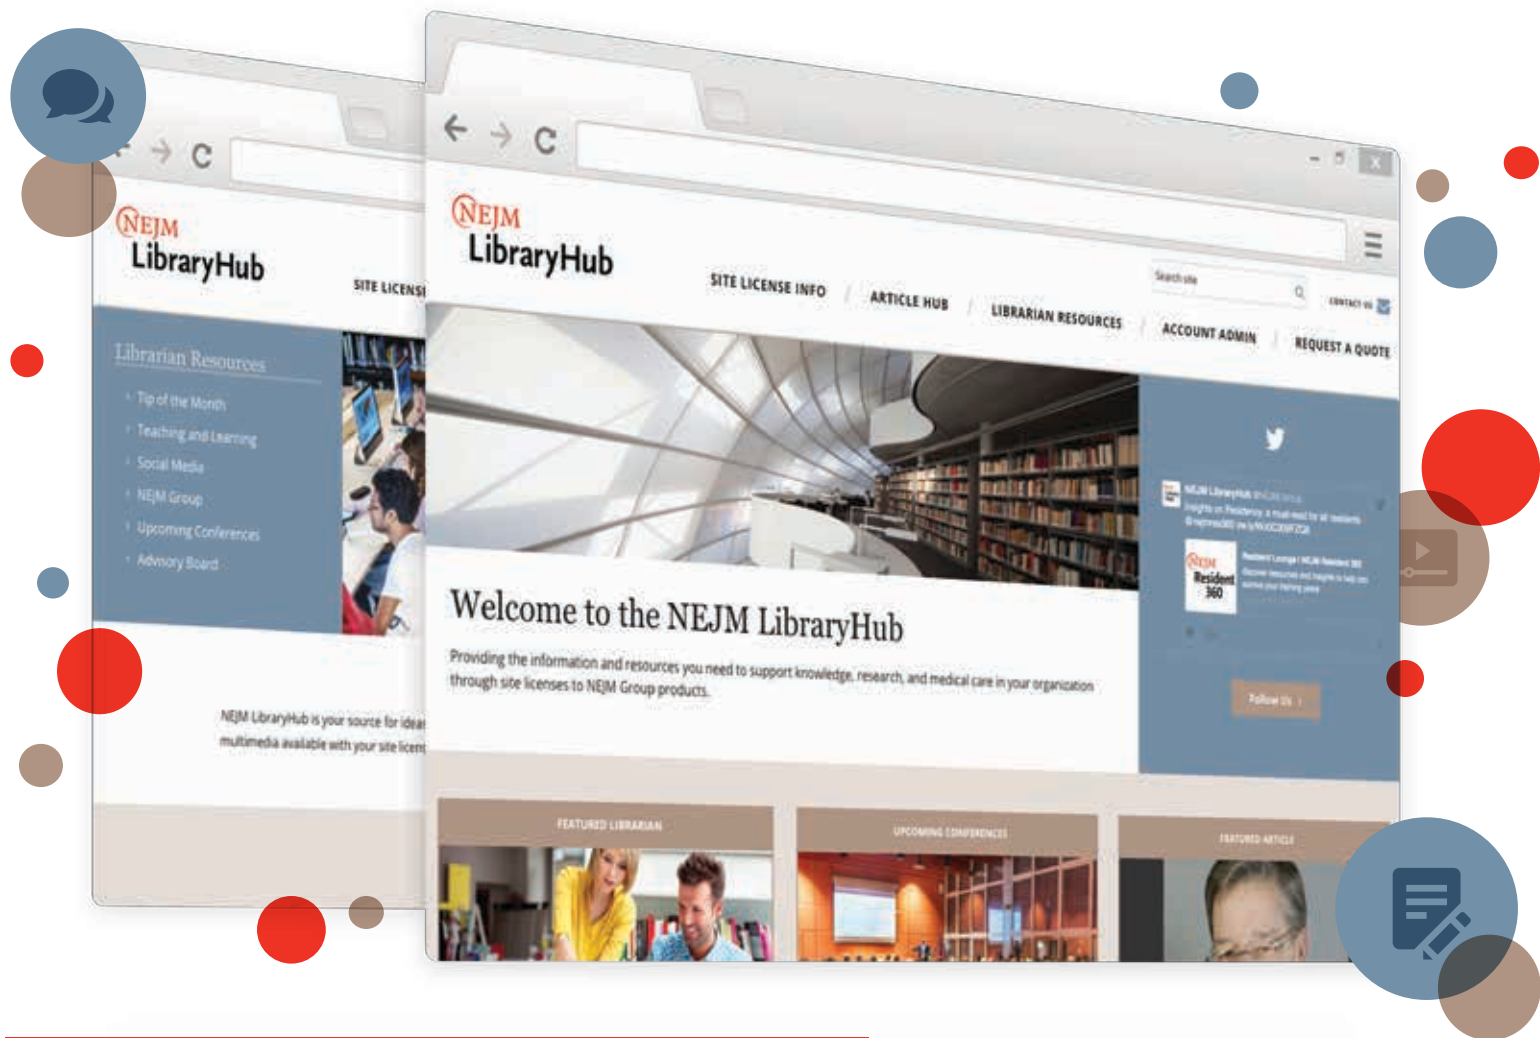

Professional competencies identify essential professional skills and abilities that can be observed, measured, and taught. MLA's 2017 *Competencies for Lifelong Learning and Professional Success* are a forward-looking guide to lifelong learning and success for health information professionals.

Tell us your story. Craft the story of your achievements based on one of the six professional competencies. Then share how you put that competency in action, how you made a difference, and how you changed your environment.

Harness the power of you! Don't be shy! Share your success story!

On-camera testimonials will be taken Sunday, May 28, through Tuesday, May 30, in the MLA Connections Booth.

We look forward to seeing you there!
