Subject: [Research-mla] Two nominating committee members needed by Jan 10
Message-ID: <1388805269.56076.YahooMailNeo@web1216.biz.mail.gq1.yahoo.com>

Dear Research Section Members,

It is time for our Section Nominations and Elections process.? The first step is to create the Nominating Committee which we hope to complete by the end of next week.?

Research Section bylaws require the past-chair and two members, so we need two members to volunteer for the brief period of service from now until mid-February to help recruit nominations and coordinate elections via Survey Monkey.? The work of the Nominating Committee should be complete by mid-February.? So, please consider volunteering -- you can email me at kris at jeffalpi.net or kmalpi at ncsu.edu before Friday, January 10.? If you have questions, feel free to call me at 919-513-6219.

Once the Nominating Committee members are in place, we will be sending out a call for nominations - self-nominations are welcome!? So, think about your plans and consider stepping up to a leadership role in the Research Section!?? More details about available positions will be in the nominations message, but we will be looking for a Chair-Elect/Program Chair and a Nominee to the MLA Nominating Committee.

Thanks for reading and looking forward to hearing from you!
Kris Alpi
Past-Chair and Chair of the Nominating Committee

CALL FOR ABSTRACTS

SALIS 2014

Rutgers University, New Brunswick, NJ

April 29 -- May 2

*Looking forward, looking back: Reflections on the past and planning for the future
*

**

You are invited to submit an abstract for the forthcoming 36th Annual SALIS Conference hosted by the Center of Alcohol Studies (CAS) at Rutgers, the State University of New Jersey (http://alcoholstudies.rutgers.edu).

Our theme this year is *"*Looking forward, looking back: Reflections on the past and planning for the future". The conference organizers would like to encourage librarians to share their expertise through formal presentations, posters, panel discussions, workshops, or any innovative formats that would promote dialog to find solutions based on the vast knowledge in disseminating information accumulated in the past. We

strongly believe that by reviewing past achievements and best practices, we can explore opportunities to translate them into our information age and can address new challenges with more success.

Please submit abstracts of 250 words or less no later than February 15, 2014 using the online form at:
http://lib.adai.uw.edu/salis/2014/2014abstracts.html

In your abstract, please be sure to:

1. briefly describe your topic, issue or idea

2. indicate your preferred format for your session

3. explain how your proposed session relates to the conference theme

If you would like to discuss your idea with the conference host, Judit Ward (judit.ward at rutgers.edu <mailto:judit.ward at rutgers.edu>), or the Executive Director of SALIS, Andrea Mitchell (amitchell at salis.org <mailto:amitchell at salis.org>), please don't hesitate to contact us. We will be glad to assist you in any way we can.

*
HIGHLIGHTS*

Deadline for submissions: February 15, 2014
Contact person about abstracts:Judit Ward (judit.ward at rutgers.edu <mailto:judit.ward at rutgers.edu>) and Bill Bejarano (bejarano at rulmail.rutgers.edu <mailto:bejarano at rulmail.rutgers.edu>)
Call for papers: _http://salis.org/conference/call_for_abstracts.html_

**

HOTEL

The conference hotel of the annual meeting is the Heldrich Hotel (/www.theheldrich.com <http://www.theheldrich.com>) /in//downtown New Brunswick. The conference planners have negotiated a special hotel rate well below the usual East Coast rate. For single or double occupancy, the rate is $139 + tax, which includes breakfast. The conference registration will include lunch during the three days of the conference. The special rate will extend several days before and after the meeting.

Hotel registration deadline: MARCH 31, 2014

Alternate hotel: Hyatt Regency New Brunswick (newbrunswick/.hyatt.com), 8 minute walk from the Conference Hotel, room rates are not secured by contract./

*
PROGRAM*

The conference begins at 6:00 PM on Tuesday, April 29, with registration and a reception, and it will end in the afternoon on Friday, May 2. As conference sessions will end Friday afternoon, there should be enough to

allow time for sightseeing, a quick trip to New York City by train (only 45 minutes away by NJ Transit http://www.njtransit.com/), or making your flight home the same day. Stay tuned for suggestions to visit cultural and sports events during the conference from your hosts.

*
REGISTRATION*

Information on registering for the conference will be available soon on the SALIS web site: http://salis.org/conference/

Looking forward to seeing you at Rutgers!

/Judit Ward/, PhD, MLIS, SALIS Chair-Elect,
Director of Information Services
/Bill Bejarano/, MA, Information Specialist

From eblipjournal at gmail.com Mon Jan 6 18:51:11 2014
From: eblipjournal at gmail.com (EBLIP Journal)
Date: Mon, 6 Jan 2014 13:51:11 -0500
Subject: [Research-mla] Reminder: Call for Applications: Three Positions with Evidence Based Library and Information Practice
Message-ID:
<CAO1vucBjg5re9WKFpBf75V_GzosigLLFoE5_PThA9FPLtxm1Cw@mail.gmail.com>

The Evidence Based Library and Information Practice Journal would like to announce opportunities to fulfil three roles within the EBLIP Journal: Associate Editor (Articles), Index Support and Evidence Summary Writers. Evidence Based Library and Information Practice (EBLIP) is a non-profit, open access journal and all positions are voluntary and unpaid.

Associate Editor (Articles)

We are looking for a second Associate Editor (Articles) to share the workload with the current Associate Editor (Articles).

The Associate Editor (Articles) is responsible for:

- Overseeing the complete editorial process for items submitted to the Articles section (this includes assignment of peer reviewers, monitoring the peer review process, communicating with authors and peer reviewers, making acceptance decisions, ensuring required changes to manuscripts are made, communicating with copyeditors and the production editor to ensure the final copy is as expected).
- Communicating and consulting with the Editor-in-Chief on a regular basis.
- Attending Editorial Team meetings, via Skype, on a monthly basis and participating in the overall governance of the journal.
- Ensuring that all necessary deadlines are met.
- Communicating with potential authors and responding to queries.

The ideal candidate will be well-versed in evidence based practice and research methods. This position requires dedicated time on a regular basis, and it is therefore essential that interested persons ensure available time to devote to this position prior to applying. It is estimated that the workload is approximately 10-15 hours per month.

The current Associate Editor (Articles) is happy to answer specific queries about the role on request. Please email Lorie.Kloda at mcgill.ca.

Interested persons should send a statement of interest, summarizing experience and suitability for the role, as well as a brief resume to Editor-in-Chief Alison Brettle (A.Brettle at salford.ac.uk) by January 13, 2014.

*Indexing Support Role *

EBLIP is looking for a library and information professional with an interest in cataloguing and indexing to provide indexing support.

The EBLIP Indexing Support role involves 5-7 hours indexing per issue (4 per year), using author assigned keywords. The role would suit an LIS professional with experience in cataloguing or indexing, familiarity with the DOAJ, comfort level with computers and the Internet, knowledge of the various parts of a citation, and an eye for detail. Although previous experience in cataloguing or indexing would be an asset, it is not a requirement.

There is also an opportunity to undertake some development work, which could include: A review of where the journal is indexed and adjustments as necessary and retrospective standardized indexing for previous issues and application of this to subsequent issues.

Interested persons should send a statement of interest, summarizing experience and suitability for the role, as well as a brief resume to Editor-in-Chief Alison Brettle (A.Brettle at salford.ac.uk) by January 13, 2014.

Evidence Summary Writers

EBLIP seeks to add six writers to the Evidence Summaries Team. Evidence Summaries provide critical appraisal syntheses for specific research articles. These research synopses provide readers with information regarding the original research article's validity and reliability, thus providing information on the presence or absence of evidence with which to make informed decisions. Evidence Summaries Team members are required to write two evidence summaries per year, with a two year commitment to the journal. Evidence Summaries cover all areas of library and information studies and we encourage applications from information professionals in areas such as school, public, and special libraries, as well as academic settings.

Interested persons should send a statement of interest, indicating areas of strength they would bring to the role, as well as a brief resume to Heather Pretty (Associate Editor, Evidence Summaries) hjpretty at mun.ca by January 13, 2014. Applicants who are shortlisted will be asked to submit a sample evidence summary.

*** For all positions only those applicants who are selected or shortlisted will be contacted by the Editors.*

About the journal:

Published quarterly by the University of Alberta, this peer reviewed, open access journal is targeted at all library and information professionals interested in an evidence based model of practice. By facilitating access to library and information studies research via original research articles and evidence summaries of relevant research from the library literature, Evidence Based Library and Information Practice enables information professionals to practice their profession in an evidence-based manner.

Please visit the Evidence Based Library and Information Practice website (http://ejournals.library.ualberta.ca/index.php/EBLIP) for further information about the journal.

Subject: [Research-mla] Call for Nominees for Research Section Chair-Elect
        and Nominee to the MLA Nominating Committee- by Wednesday,
        January 15
Message-ID: <1389584735.93014.YahooMailNeo@web1215.biz.mail.gq1.yahoo.com>

Dear Research Section Members,

On behalf of the Research Section Nominating Committee Members listed below, I would like to invite you to nominate yourself or a deserving colleague for one of the two positions we are electing this year:

Chair-Elect/Program Chair - three year term beginning at MLA 2014 that includes 1 year as each of the following: Chair-Elect, Chair, and Past-Chair/Section Council Rep.

Nominee to the MLA Nominating Committee - one year possible commitment.? Our nominee goes on the ballot of nominees from all sections to be voted on by Section Council to identify five candidates; those five candidates then go on to be voted on by the entire membership in the national elections, and then serve on the MLA Nominating Committee for one year.? You must not have been on the Nominating Committee in the past five years to be eligible.

You can read more about the positions in the RS Bylaws at http://research.mlanet.org/bylaws.html or contact the Nominating Committee for more information.

We would like to have nominations by midnight EST on Wednesday, January 15 so that the Committee can confirm willingness to serve and be able to distribute a ballot this Friday, January 17.? Please send nominations to me and indicate whether the nomination has been discussed with the candidate.

Thank you for considering volunteering for an important leadership role in health sciences librarianship.

8th International Evidence Based Library and Information Practice Conference awarded to Brisbane, Australia for 2015
EBLIP8, the eighth in the successful series of international conferences to promote evidence based approaches to library and information practice, has been awarded to Brisbane, Australia to take place in 2015. The Australian bid vied with two strong competitors to secure the votes of the international selection committee.Saskatoon, Saskatchewan, Canada, January 9th, 2013 * The International Advisory Committee (IAC) for the International Evidence Based Library and Information Practice Conference Series [1] has awarded the EBLIP8 Conference to Brisbane, Australia [2]. The Brisbane bid was coordinated by Helen Partridge, a Professor in the Systems Information School at the Queensland University of Technology, Australia [3]. Criteria for selection included the location, facilities, regional and national support, the strength of the organizing team, and unique selling points.

Brisbane was commended for the overall quality of its proposal including a good understanding of the requirements of the conference and excellent support for the EBLIP movement.Virginia Wilson, Director of the Centre for Evidence Based Library and Information Practice at the University of Saskatchewan and Convenor for the IAC, stated that *while the International Advisory Committee was extremely pleased to see applications from new international locations, it was impossible to ignore the comprehensive and well-prepared application package from the Australian group.* In response to the IAC*s verdict, Helen Partridge, Chair of the Local Organising Committee stated that "Queensland University of Technology is thrilled to be hosting the 8th International Evidence Based Library and Information Practice conference in 2015. Through this event we seek to inspire, challenge, connect and stimulate our thinking and practice around EBLIP.*[4]

Information about the EBLIP8 Conference will be shared with the international community during 2014 and 2015 via the open access journal, Evidence Based Library and Information Practice (http://ejournals.library.ualberta.ca/index.php/EBLIP), the evidence-based-libraries jiscmail (http://www.jiscmail.ac.uk/lists/EVIDENCE-BASED-LIBRARIES.html) discussion list, the Evidence Based Librarianship Interest Group (http://lists.mun.ca/archives/eblig.html) listserv, and other social media venues.

About the EBLIP Conference Series:

The EBLIP Conference is a biennial event designed to promote the use of the best available evidence to improve library and information practice in all types of libraries. It aims to bring together practitioners, researchers, and students involved in critical and reflective information practice to think through new ways to address contemporary issues of evidence based practice in less isolated, more collaborative, ways. The first EBL(IP) Conference took place in Sheffield, UK in 2001. Subsequent conferences have been hosted in Edmonton (Canada, 2003), Brisbane (Australia, 2005), Chapel Hill (USA, 2007), Stockholm (Sweden, 2009), Salford (UK, 2011), and Saskatoon (Canada, 2013).

Notes for Editors:

1. The International Advisory Committee for the International Evidence Based Library and Information Practice Conference Series is comprised of the conference chairs from all previous conference hosting sites * Andrew Booth (Sheffield 2001), Denise Koufogiannakis (Edmonton, 2003), Joanne Marshall (North Carolina, 2007), Lotta Haglund (Stockholm, 2009) and Maria Grant/Alison Brettle (Salford, 2011). Selection of the EBLIP8 venue was co-ordinated by Virginia Wilson (Saskatoon, 2013), a non-voting convenor. Helen Partridge (Brisbane 2005) abstained from sitting on the IAC this year in order to lead the Brisbane 2015 bid.
2. With a population of 1.8 million, Brisbane is the capital and most populous city in the Australian state of Queensland and the third largest Australian city. For more information on Brisbane, Australia: http://www.visitbrisbane.com.au/Travel/Default.aspx
3. Queensland University of Technology (QUT) is a highly successful Australian university with an applied emphasis in courses and

research. Based in Brisbane, the university has a global outlook, some 42,000 students, including 6000 from overseas, and an annual budget of more than AU$750 million. The conference will be held at the Gardens Point Campus, which is located next to the Brisbane River and the Botanic Gardens. QUT Gardens Point is Brisbane's inner-city university campus. Public transport, accommodation, shopping and dining options are all within walking distance.
4. Queries about EBLIP8 can be directed to Helen Partridge (h.partridge at qut.edu.au). To find out more about QUT*s Information Studies Group (e.g. the conference hosts) follow them on Twitter @qutisg or visit their Facebook page at https://www.facebook.com/QUTISG

Message-ID: <E887BBF88D596C44A919D61C72FA2E7C11F640FC@vmw-excmbd1s03.dhe.duke.edu>

FYI
The deadline for applications is coming soon. Submit yours by February 1, 2014!
***
The William H. Hannon Library has received a three-year grant from the Institute for Museum and Library Services (IMLS) to offer a nine-day continuing education opportunity for academic and research librarians. Each year 21 librarians will receive instruction in research design and a full year of support to complete a research project at their home institutions. The summer Institute for Research Design in Librarianship (IRDL) is supplemented with pre-institute learning activities and a personal learning network that provides ongoing mentoring. The institutes will be held on the campus of Loyola Marymount University in Los Angeles, California. For more

information about the project, including the project partners, the School of Library and Information Science at San Jos? State University and the Statewide California Electronic Library Consortium (SCELC), please see the project website: http://irdlonline.org.
The first institute will be held on June 16-26, 2014, with arrival on campus on Sunday, June 15, and departure on Friday, June 27.
We are now issuing a call for applications for the IRDL 2014. We are seeking novice librarian researchers who are employed by academic libraries or research libraries outside an academic setting in the United States to participate in the institute. We define novice researchers as those who may have conducted research but have not yet had an article published or a presentation accepted by a peer-reviewed publication or conference; librarians who have presented peer-reviewed poster sessions will be eligible. Librarians of all levels of professional experience are welcome to apply.
We seek librarians with a passion for research and a desire to improve their research skills. The project is designed to bring together all that the literature tells us about the necessary conditions for librarians to conduct valid and reliable research in an institutional setting. The cohort will be chosen from a selective submission process, with an emphasis on enthusiasm for research and diversity from a variety of perspectives, including ethnicity and type and size of library.
The Advisory Committee, comprised of librarians with research experience in a variety of settings, will use an open review process to select participants who will travel to Los Angeles, California, participate in all institute activities, and conduct a research project during the 2014-2015 academic year. The online application requests a proposed research project that will be revised at the institute and will be the basis for the study to be completed in the coming year.
Selection criteria:

?	Significance of the research problem to the operational success of the applicant's library or to the profession of librarianship;

?	Clarity of the proposed methodology;

?	Enthusiasm for research and desire to learn;

?	Commitment to the year-long process of communicating with other participants and conducting the proposed study.

We will be accepting applications from December 1, 2013 to February 1, 2014. Scholars accepted to the Institute will be notified by March 1, 2014.
Please contact Project Directors with any questions about the Institute or the application process:

Dear Research Section Members,
Polling for 2014 Research Section Officers is now open. Current section members should have received an email with a ballot link and instructions. If you have not received a ballot and believe you are a current member, please contact the Nominating Committee Chair, Kris Alpi (kmalpi at ncsu.edu<mailto:kmalpi at ncsu.edu>) to verify your status. Please be sure to cast your vote no later than Thursday February 13th.

Thank you for your participation,
The Research Section Nominating Committee

Subject: [Research-mla] FYI - Very interest - The accuracy of Internet search engines to predict diagnoses from symptoms can be assessed with a validated scoring system
Message-ID: <5D9D96590AF1874E83AD48C46BBB88556CCBF9B2@SH-ExchMB2.master.lsuhsc.edu>

Sorry for crossposting.

This article is very interesting. While it is about validating the instrument for analyzing the webpages, they found that only 14% of the website gave a correct diagnosis. Seventy percent came up with the diagnosis as part of a differential. It sort of scares me that many medical students and other healthcare students might use search engines to find differentials. One implication is that patients who bring in webpages may actually hold the appropriate differential in their internet printout. Physicians might consider that information. The article is NOT an open access journal. The abstract does not discuss the findings of accuracy since they were testing the scoring system.

Shenker BS. The accuracy of Internet search engines to predict diagnoses from symptoms can be assessed with a validated scoring system. Int J Med Inform. 2014 Feb;83(2):131-9. doi: 10.1016/j.ijmedinf.2013.11.002. Epub 2013 Nov 19. PMID: 24315497 Link to PubMed abstract http://www.ncbi.nlm.nih.gov/pubmed/24315497

My apologies for cross-posting.

Georgia Regents University
Measuring the Value of Embedded Librarian Service Models

The librarians of the Robert B. Greenblatt MD Library invite you to participate in a research study: Measuring the Value of Embedded Librarian Service Models. The purpose of the study is to collect information to help create an evaluation instrument for embedded librarian models. If you agree to be part of the research study, you will be asked to complete the following survey asking about your status as an embedded librarian, the user groups you partner with, what projects you work on, and how you evaluate your program. The survey should take 5-10 minutes to complete.

Participating in this survey is completely voluntary. Even if you decide to participate now, you may change your mind and stop at any time. Because all

questions are voluntary, you can skip any question you do not wish to answer. There are no risks associated with this study. The data collection is anonymous and the topic is not of a sensitive nature. Data will be stored online for the duration of the research period and will be accessed by the investigators listed below.

If you have any questions or concerns about the "rights of research subjects", you may contact the Office of Human Research Protection at (706) 721-1483.

You can choose to leave your name and contact information at the end of the survey to receive survey results or you can email one of the investigators listed below. The deadline for survey response is Friday, February 21, 2014.

Please Access the survey here: https://www.surveymonkey.com/s/JMDXCNQ

Dear Colleagues,

Happy Friday! Thank you for your votes on the formation of the Latino SIG. I am happy to announce that there was great support of this SIG by Section Council, and it has been officially formed.

Have a nice weekend,
Jodi

Subject: [Research-mla] Congratulations to Research Section Chair-Elect and Nominee to the MLA Nominating Committee
Message-ID: <1392488935.63714.YahooMailNeo@web1208.biz.mail.gq1.yahoo.com>

Dear Research Section Members,

Please join me in congratulating our newly elected Research Section Chair-Elect and our Nominee to the MLA Nominating Committee!

Ninety-nine of our 250 members (40%!) participated in this year?s elections which concluded February 13, 2014.

Our Chair-Elect is Emily Mazure. Her bio is below.? She will serve a 3 year term as Chair-Elect,
Chair, and Past Chair/Section Council Representative.

Our Nominee to the MLA Nominating Committee is Sandy DeGroote. Her bio is below. ??All of the section nominees will be put forward to Section Council for voting to select those that will go forward to the MLA-wide election of Nominating Committee members.

Thank you to the wonderful nominating committee of Kim Powell (Emory University), Carol Perryman (Texas Woman?s University) and Linda
Hartman (University of Pittsburgh)!? Next year?s nominating committee will be chaired by Terrie Wheeler.? If you are interested in serving on next year?s

nominating committee, please contact Terrie at terrie.wheeler at nih.gov

Thank you everyone for your participation in the nomination and election process.

Kristine Alpi
RS Past-Chair and Chair of the Nominating Committee

Emily Mazure, MSI, AHIP? emily.mazure at duke.edu

Brief Bio: Emily Mazure has worked at the Duke University Medical Center Library & Archives in Durham, NC as the Biomedical Research Liaison Librarian since November 2010. She has been a member of both MLA and the Mid-Atlantic Chapter (MAC) since 2008. Emily served as the Chair of the MAC/MLA?s Research and Assessment Committee from 2009-2012. During that time the Committee developed new activities and resources for MAC/MLA members, including a Research Panel at the 2010 MAC/MLA Annual Meeting and a yearly-awarded Research & Assessment Grant.

Sandra De Groote, MLIS, AHIP sgroote at uic.edu
Brief Bio: As the Scholarly Communications Librarian at the University of Illinois at Chicago (UIC), Sandra oversees the Institutional Repository and UIC's online journal publishing service. Other areas of responsibility include author rights, copyright, evidence based medicine, and supporting the campus in complying with the NIH PAP. De Groote was a health sciences librarian at UIC for 10 years prior to her current position. She has served on several MLA grants and scholarship juries, and is currently the chair
of the MLA Grants and Scholarship Committee. She also co-chairs the Research Section's Research Awards Committee

Dear Research Section members,?

For the MLA Annual Meeting this year, there is the opportunity for Sections and Chapters to display a poster about the activities of the section to encourage new membership and increase knowledge about our activities.

We have to let them know by Friday, February 21 whether we want to have and staff a poster (see info below).

We want to know what you think, and whether you are interested in helping plan/design the poster (a great way to be involved that doesn't require you to attend MLA). ?Also, if you are attending MLA and would be interested in helping staff the poster during Poster Session 1.

You can share your thoughts back with the membership via this discussion list. ?If you are interested in helping design the poster, please email me at kmalpi at ncsu.edu by Wednesday, Feb. 19 to give the executive board time to discuss and get back to everyone. ?

Thanks for considering it!
Kris Alpi
Past Chair, Research Section

?

The posters for the Chapters and Sections will be located near the registration area and the rooms where the Section programming will be, not with the MLA member posters.? We will advertise that each poster will be "staffed" for questions during Poster Session 1 (Sunday, May 18, 3:30-4:25 PM).? The section and chapter council booth will also be near by.

Hi sounds like a great idea. just have a question about the poster content: will it be about the section or research projects by the members or both?

I won't be at MLA but would be happy to contribute some help.

Hello,

I am also new to the research section, but will be attending the MLA Conference. I would be happy to help anyway I can.

Thanks,

Angela Hardi

Dear Research Section members,

For the MLA Annual Meeting this year, there is the opportunity for Sections and Chapters to display a poster about the activities of the section to encourage new membership and increase knowledge about our activities.

We have to let them know by Friday, February 21 whether we want to have and staff a poster (see info below).

We want to know what you think, and whether you are interested in helping plan/design the poster (a great way to be involved that doesn't require you to attend MLA). Also, if you are attending MLA and would be interested in helping staff the poster during Poster Session 1.

You can share your thoughts back with the membership via this discussion list. If you are interested in helping design the poster, please email me at kmalpi at ncsu.edu<mailto:kmalpi at ncsu.edu> by Wednesday, Feb. 19 to give the executive board time to discuss and get back to everyone.

Thanks for considering it!
Kris Alpi
Past Chair, Research Section

The posters for the Chapters and Sections will be located near the registration area and the rooms where the Section programming will be, not with the MLA member posters. We will advertise that each poster will be "staffed" for questions during Poster Session 1 (Sunday, May 18, 3:30-4:25 PM). The section and chapter council booth will also be near by.

Hi, Kris,

I think marketing our section is very important. Having a section poster to recruit more members or at least let more librarians know about our section is a good idea.

I plan to attend MLA meeting this year and would like to contribute somehow. But now I have a family emergency and applied for family leave, so I can not fully comcentrate on this. Once I am back to work(probably beginning of March), I should be able to participate.

Thanks!

From sgroote at uic.edu Thu Feb 27 16:36:36 2014
From: sgroote at uic.edu (Sandy De Groote)
Date: Thu, 27 Feb 2014 10:36:36 -0600
Subject: [Research-mla] MLA 2014 : Research Award Judging - Request for
	Volunteers
Message-ID: <530F6994.6050001@uic.edu>

Dear Colleagues,

I am writing to you in your capacity as a member of the MLA Research Section. Aileen McCrillis, Diane Cooper and I, co-chairs of the Research Awards Committee, would like to invite you to serve as a judge (or pre-judge) for research papers and/or posters prior to and/or at the 2014 annual meeting in Chicago in May. If you are presenting a paper, you may still participate as a poster judge. Poster presenters may participate as paper judges. Even if you are not planning to attend the annual meeting, we will be reviewing the abstracts of the posters and papers prior to the meeting to narrow down the number of submissions to be judged onsite. We could use your help.

If you are willing to help, please simply fill out this online form by March 21:
https://docs.google.com/forms/d/12HtEejJ7FbDvrGMmZb_N6Mp4tfBkD-UJDAjTYW9Fwq8/viewform

Duties for those pre-judging are as follows:

1. View assigned paper or poster abstracts online before the meeting and rate the abstract using the abstract section of the judging evaluation forms that will be provided.

Duties for those judging at MLA are as follows:

1. If possible, attend the meeting of the Research Awards Committee on Sunday, May 18 from 8:00 a.m. -- 9:00 a.m. to receive judging

instructions. If this is not possible, other arrangements can be made.
2. The poster judges visit assigned posters during the poster session window to be able to talk with the presenters. The paper judges attend assigned paper sessions.
3. All judges complete the evaluation forms and submit the results online by May 30, 2014 or by an otherwise agreed upon deadline. If you are not able to submit the results online, results can be submitted in print by the end of the annual meeting.

Thanks,
Diane Cooper
Sandy De Groote
Aileen McCrillis

Message-ID: <53149E56.4020204@umich.edu>

If you will be attending MLA 2014 in Chicago consider attending the Research Section's panel discussion on Monday, May 19 @ 2pm.

Here is information:

Title: Research Survey Design for Librarians

Description: Libraries and librarians often use surveys to assess attitudes and evaluate services. However, there has been criticism of library surveys because they are often poorly designed, administered, and evaluated. In an editorial in the January 2012 Journal of the Medical Library Association, ?Survey Research: We Can Do Better,? Susan Starr, editor-in-chief, highlights common problems with library survey design and solutions to them.

Invited speakers:
Jodi Philbrick, Course Coordinator, Health Informatics Program, University of North Texas Department of Library and Information Sciences
Jonathan Eldredge, Associate Professor, School of Medicine Health Sciences Library and Informatics Center Evidence Based Practice and Translational Sciences Collaboration Coordinator, Associate Professor of Family and Community Medicine, University of New Mexico
Joanne Gard Marshall, Alumni Distinguished Professor, School of Information and Library Science, University of North

Carolina?Chapel Hill

Subject: Health IT Webinar: Adding Value to EHRs: Librarians and Infobuttons

Hello MLA section chairs,

Please distribute to your members.

Free Webinar

Title: Adding Value to EHRs: Librarians and Infobuttons

Time: March 19, 2014, 10:00 - 11:30 am EDT.

Course length: 1.5 hours

Registration Required;
http://nnlm.gov/ner/training/register.html?schedule_id=2751

This webinar is being planned as the first in a series sponsored by the
NN/LM, NER on ways librarians can add value to electronic health records.
Additional webinars are in development. The overall goal of this webinar is
to give medical librarians an understanding of clinical decision support
mechanisms in electronic health records (EHRs) and to increase awareness of
the ways that librarians can contribute. An understanding of the ways that
library resources can be integrated into clinical decision support will
empower librarians to pursue this in their own institutions.

Guilherme Del Fiol, MD, PhD, University of Utah, School of Medicine will present results of a systematic review on clinical questions raised by clinicians and tools that help answer these questions by integrating EHR systems with online knowledge resources.

He will also discuss how these tools are being disseminated via the "HL7 Context-Aware Knowledge Retrieval Standard" (a.k.a., Infobutton Standard) and the EHR Meaningful Use certification program.

Taneya Koonce, MSLS, MPH, Eskind Biomedical Library will share the Eskind Biomedical Library's successful approaches for integrating highly relevant evidence into the institution's electronic medical record, outpatient ordering systems, and online patient portal.

Lauren Yaeger, MA, MLIS, St. Louis Children's Hospital Medical Library will talk about clinical librarianship/rounding with the patient care team, Evidence Based Medicine Quality Initiative Project with the residents, and integrating clinical decision support at the point of care.
Thank you,

Jennifer Miglus, HMS Librarian

Message-ID: <EBE937419CBB7F4FB06BCC2638BB76DD0564CA3F@MLBXV09.nih.gov>

Hi Research Section members,

The MLA meeting in Chicago is coming soon and we plan to have an issue of the Hypothesis out before we leave for the meeting. Please consider writing a brief article for this upcoming issue on any Research Section activities for MLA 2014 or any Research Section news or the importance of highlighting research at the meeting. Also welcomed are contributions from Research Section members on any other research in librarianship topic or related item. We look forward to hearing from you by March 31.
Thanks,
Diane and Deidre

Dear Colleagues,
Thanks to everyone so far that has volunteered to help with judging the research papers and posters for MLA. We are still looking for more volunteers to either help with judging prior to MLA and/or judging at MLA. If you are able to spare some time, your help will be greatly appreciated. Please simply fill out this online form by March 21: https://docs.google.com/forms/d/12HtEejJ7FbDvrGMmZb_N6Mp4tfBkD-UJDAjTYW9Fwq8/viewform

More details about judging prior to MLA and at MLA itself are below.

Thanks!
Sandy

	position - director of Weill Cornell Medical Library
Message-ID: <1395625639.9421.YahooMailNeo@web120103.mail.ne1.yahoo.com>

Dear Research Section members,?

I'm excited to congratulate and share the announcement that Research Section chair Terrie Wheeler will be moving to New York City to direct the Samuel J. Wood Library of Weill Cornell Medical College. ? See the announcement which highlights Terrie's research collaborations and leadership in MLA at? http://library.weill.cornell.edu/LibNotes/2014/03/terrie-wheeler-announced-as-new-director-of-samuel-j-wood-library.html

Subject: [Research-mla] Research Expertise Areas - call for comments
Message-ID: <533473CA.704@uci.edu>

Dear Research Section Members,

The MLA Research Task Force is looking into enhancing the support for research and researchers in health sciences librarianship. Heather Holmes and I are specifically working on recommendations for updating the "research expertise areas' for the MLA mentor website and directory (see: https://www.mlanet.org/mentor/).

Below we have made a preliminary list of possible new Research Expertise Areas (in red text). We have also included the current research and research-related expertise areas for reference. Are the new proposed research sub-categories clear? Are there other important research expertise/mentor areas that are missing from the list?

New proposed:

Research: Survey research
Research: Content analysis
Research: Systematic reviews & meta-analyses
Research: Research design & methodology, including identifying & defining research question
Research: Research grant writing, including MLA grants & scholarships
Research: Statistical methods

Old/current:

Administration: grant writing (23 mentors)
Professional issues: papers & presentations (47 menotrs)
Professional issues: publishing & authorship (40 mentors)
Research: benchmarking (6 mentors)
Research: EBP (librarianship, medicine, etc.) (83 mentors)
Research: needs assessment & user surveys (31 mentors)
Research: research design & methodology (advanced) (20 mentors)
Research: support for librarians (16 mentors)
Research: support for researchers (biomed, clinical, marketing) (61 mentors)

Again this email is to gather your opinions and thoughts to take back to the MLA Research Task Force. We would appreciate you providing comments by THURSDAY, APRIL 3 so we can include them in our report.

Thank you in advance for taking the time to consider and provide thoughts on the research expertise areas for the RS mentorship program.

Hi, Susan,

I think preparing manuscript and publishing is part of the entire research process. From NIH and NLM grant application package, we can see these two things are always included. Therefore, I would still add papers & presentations and publishing & authorship to the new list.

My two cents!

Thanks!

Hi, Susan,

I think preparing manuscript and publishing is part of the entire research process. From NIH and NLM grant application package, we can see these two things are always included. Therefore, I would still add papers & presentations and publishing & authorship to the new list.

My two cents!

Thanks!

Dear Research Section Members,

The MLA Research Task Force is looking into enhancing the support for research and researchers in health sciences librarianship. Heather Holmes and I are specifically working on recommendations for updating the "research expertise areas' for the MLA mentor website and directory (see: https://www.mlanet.org/mentor/).

Below we have made a preliminary list of possible new Research Expertise Areas (in red text). We have also included the current research and research-related expertise areas for reference. Are the new proposed research sub-categories clear? Are there other important research expertise/mentor areas that are missing from the list?

New proposed:

Research: Survey research
Research: Content analysis
Research: Systematic reviews & meta-analyses
Research: Research design & methodology, including identifying & defining research question
Research: Research grant writing, including MLA grants & scholarships
Research: Statistical methods

Old/current:

Administration: grant writing (23 mentors)
Professional issues: papers & presentations (47 menotrs)
Professional issues: publishing & authorship (40 mentors)
Research: benchmarking (6 mentors)
Research: EBP (librarianship, medicine, etc.) (83 mentors)
Research: needs assessment & user surveys (31 mentors)
Research: research design & methodology (advanced) (20 mentors)
Research: support for librarians (16 mentors)
Research: support for researchers (biomed, clinical, marketing) (61 mentors)

Again this email is to gather your opinions and thoughts to take back to the MLA Research Task Force. We would appreciate you providing comments by THURSDAY, APRIL 3 so we can include them in our report.

Thank you in advance for taking the time to consider and provide thoughts on the research expertise areas for the RS mentorship program.

Hi Priscilla and Donghua,

Just to clarify...we are not proposing to update categories other than the Research Expertise categories. The categories under Administration and Professional Issues (as well as all other expertise areas) would remain the same. The task force is only dealing with areas that have been designated as 'research' on the MLA mentorship webpage.

Thanks so much for your comments.

Hi, Susan,

Sorry for the misunderstanding!

Does Survey research include Individual Interview/Focus group interview? Also, EBP is a kind of philosophy, but the process of it is equivalent to conducting research. Would this be included in the Systematic Review/Meta analysis category? Since we librarians are advocates of EBP/EBM and we are also very good at it, I just feel this should be reflected in some way in the Research Expertise categories.

Thanks!

I don't mind these newly proposed areas but I would like to make the possible suggestions. I hope you can see my black comments.

Research: Survey research
Research: Content analysis
Research: Systematic reviews & meta-analyses I like the idea of dividing this and adding alt-metrics and the other things mentioned but I don't know if we are getting to much.
Research: Research design & methodology, including identifying & defining research question
Research: Research grant writing, including MLA, government and other organization awards, grants & scholarships.
Research: Statistical methods Not sure how this differs from Research Design methodology - maybe a bit of description to distinguish it. Is this like using SPSS, SAS, etc? If it is ignore below.
Research: Results - writing abstracts, preparing papers and presentations for conferences, and publishing in journals or books.
Research: Quality Improvement (data for internal use)
Research: Institutional Review Board (serving on a board or applying to do a research project)
Research: Data Management (archiving, maintaining and maybe indexing???)
Research: Using SPSS, SAS, or other data analysis software (This is important because how you set up your data can make analysis very easy or hard)
Research: Focus Groups
Research: Ethics
Research: Teaching research

Professional issues: publishing & authorship (40 mentors)
Research: benchmarking (6 mentors)
Research: EBP (librarianship, medicine, etc.) (83 mentors)
Research: needs assessment & user surveys (31 mentors)
Research: research design & methodology (advanced) (20 mentors)
Research: support for librarians (16 mentors)
Research: support for researchers (biomed, clinical, marketing) (61 mentors)

Again this email is to gather your opinions and thoughts to take back to the MLA Research Task Force. We would appreciate you providing comments by THURSDAY, APRIL 3 so we can include them in our report.

Thank you in advance for taking the time to consider and provide thoughts on the research expertise areas for the RS mentorship program.

I like Julie's suggestions, and I added one more area to data management?data curation. One of our librarians would like to go into this field, and was quite excited that we might have someone with expertise in that area that she could contact.

Subject: Re: [Research-mla] Research Expertise Areas - call for comments

I don?t mind these newly proposed areas but I would like to make the possible suggestions. I hope you can see my black comments.

Research: Survey research
Research: Content analysis
Research: Systematic reviews & meta-analyses I like the idea of dividing this and adding alt-metrics and the other things mentioned but I don?t know if we are getting to much.
Research: Research design & methodology, including identifying & defining research question
Research: Research grant writing, including MLA, government and other organization awards, grants & scholarships.
Research: Statistical methods Not sure how this differs from Research Design methodology - maybe a bit of description to distinguish it. Is this like using SPSS, SAS, etc? If it is ignore below.
Research: Results ? writing abstracts, preparing papers and presentations for conferences, and publishing in journals or books.
Research: Quality Improvement (data for internal use)
Research: Institutional Review Board (serving on a board or applying to do a research project)
Research: Data Management (archiving, maintaining, curation, and maybe indexing???)
Research: Using SPSS, SAS, or other data analysis software (This is important because how you set up your data can make analysis very easy or hard)
Research: Focus Groups
Research: Ethics
Research: Teaching research

I would definitely keep stats as a separate category. It includes selecting the proper statistical test, setting up the data properly, carrying out the calculations, and interpreting the results. This and several other categories are subsets of research design and methodology, in my opinion, But, I think it is good to break it down into the subcategories to give the mentors a chance to volunteer for their true specialties. I would make identifying and defining a research question as a separate category. Ruth Fenske

Research: support for librarians (16 mentors)
Research: support for researchers (biomed, clinical, marketing) (61 mentors)

Again this email is to gather your opinions and thoughts to take back to the MLA Research Task Force. We would appreciate you providing comments by THURSDAY, APRIL 3 so we can include them in our report.

Thank you in advance for taking the time to consider and provide thoughts on the research expertise areas for the RS mentorship program.

Hi, Susan,

I think preparing manuscript and publishing is part of the entire research process. From NIH and NLM grant application package, we can see these two things are always included. Therefore, I would still add papers & presentations and publishing & authorship to the new list.

My two cents!

Thanks!

Dear Research Section Members,

The MLA Research Task Force is looking into enhancing the support for research and researchers in health sciences librarianship. Heather Holmes and I are specifically working on recommendations for updating the "research expertise areas' for the MLA mentor website and directory (see: https://www.mlanet.org/mentor/).

Below we have made a preliminary list of possible new Research Expertise Areas (in red text). We have also included the current research and research-related expertise areas for reference. Are the new proposed research sub-categories clear? Are there other important research expertise/mentor areas that are missing from the list?

New proposed:

Research: Survey research
Research: Content analysis
Research: Systematic reviews & meta-analyses
Research: Research design & methodology, including identifying & defining research question
Research: Research grant writing, including MLA grants & scholarships
Research: Statistical methods

Old/current:

Administration: grant writing (23 mentors)
Professional issues: papers & presentations (47 menotrs)
Professional issues: publishing & authorship (40 mentors)
Research: benchmarking (6 mentors)
Research: EBP (librarianship, medicine, etc.) (83 mentors)
Research: needs assessment & user surveys (31 mentors)
Research: research design & methodology (advanced) (20 mentors)
Research: support for librarians (16 mentors)
Research: support for researchers (biomed, clinical, marketing) (61 mentors)

Again this email is to gather your opinions and thoughts to take back to the MLA Research Task Force. We would appreciate you providing comments by THURSDAY, APRIL 3 so we can include them in our report.

Oops. See it's probably covered under 'statistical methods' but I like the
addition of the phrase 'data analysis' or 'statistical analysis' nonetheless.

I suppot adding data management and sharing, as well as data analysis, which can includes statistic methods. IRB is part of research ethics, as far as I understand. We can either combine them or create separate categories.

April 2014

From sgroote at uic.edu Wed Apr 2 23:12:42 2014
From: sgroote at uic.edu (Sandy De Groote)
Date: Wed, 02 Apr 2014 18:12:42 -0500
Subject: [Research-mla] MLA 2014 : Research Award Judging - Prejudging has begun
Message-ID: <533C996A.7070209@uic.edu>

Hello Colleagues,
I wanted to update you on where things are in terms of judging papers and posters for MLA 2014.

We have begun the prejudging process, and assignments were sent out to individuals this week. Those that volunteered to do prejudging were assigned either 9 or 10 posters or paper abstracts to assess. The results of those evaluations will be used to determine which papers and posters will be judged at MLA. I believe I assigned abstracts to everyone that volunteered for the prejudging, so my apologies if I missed someone. The due date for completing the prejudging is April 23, 2014.

To that end, we could use a few more judges on-site at MLA. If you are going and have not volunteered yet, please consider. The times of the papers and posters are included in the volunteer form, so you can indicate more specifically when you are free to offer assistance judging.
https://docs.google.com/forms/d/12HtEejJ7FbDvrGMmZb_N6Mp4tfBkD-UJDAjTYW9Fwq8/viewform
We hope we can send out preliminary assignments for the on-site judging the first week of May, to give time to shift assignments if conflicts arise. If you are not sure if you volunteered, just send me an email and I can confirm if we have you listed in the spreadsheet.

Duties for those judging at MLA are as follows:

1. If possible, attend the meeting of the Research Awards Committee on Sunday, May 18 from 8:00 a.m. -- 9:00 a.m. to receive judging instructions. If this is not possible, other arrangements can be made.
2. The poster judges visit assigned posters during the poster session window to be able to talk with the presenters. The paper judges attend assigned paper sessions.
3. All judges complete the evaluation forms and submit the results online by May 30, 2014 or by an otherwise agreed upon deadline. If you are not able to submit the results online, results can be submitted in print by the end of the annual meeting.

Thanks,
Diane Cooper

Science Boot Camp is heading south! *Registration is now open* for Science Boot Camp Southeast. Science Boot Camp is a fun and affordable 2 1/2 day immersion in advanced science topics for academic science librarians and library students.

*Topics: *We will spend 1/2 day engaging with researchers in each of these fields:

- ALTERNATIVE/SUSTAINABLE ENERGY
- DATA SHARING
- DATA VISUALIZATION
- CLIMATE CHANGE

When: July 16th - 18th 2014

Where: The James B. Hunt Jr. Library on North Carolina State University's

Centennial Campus, Raleigh, NC

There will be two scheduled times for librarian lightning talks about how science librarians are collaborating with researchers at their institutions, and a fun evening out at the Nature Research Center at NC Museum of Natural Sciences. Room and board are included in registration.

For more information and to register, see the Science Boot Camp Southeast guide at http://guides.ucf.edu/sciencebootcampSE

Subject: [Research-mla] FYI - After a fight for the release of data since 1979 - physician reimbursement files for Medicare payments made public today.
Message-ID: <5D9D96590AF1874E83AD48C46BBB88557D0F40B4@SH-ExchMB1.master.lsuhsc.edu>

Sorry for the crossposting but this is an extremely hot issue with physicians and is a lot of data that can be used for possible research. While there are a lot of press releases out about it coming out today, there have been few to actually provide this link.

Medicare Provider Utilization and Payment Data: Physician and Other Supplier
http://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/Medicare-Provider-Charge-Data/Physician-and-Other-Supplier.html

Files can easily be downloaded and opened. Not really organized well but the public can see what their doctor makes from Medicare.

Sorry for another crossposting.

Thanks to Eileen Erinoff at ECRI Institute who let me know that the New York Times has an easy look up system for the physician data. We have our accrediting body here so I hadn't seen this.

It is wonderful!

Subject: [Research-mla] Research Expertise Areas - call for comments
Message-ID: <88ADB35AB1AB3A4590A9948A2675733636349002@MLBXV08.nih.gov>

Hi Susan,

I know you have putt effort into a call for comments regarding mentoring expertise.

Would you care to update the paragraph below, or otherwise summarize your efforts

for the Section's annual report?

Informal mentee/mentor matching continues to take place. More formal mentoring efforts proposed to MLA
that will be considered by the MLA Research Task Force appointed in Summer 2013 include: 1) working with
headquarters to enhance information related to research mentoring, 2) including research mentor as a distinct
option with guidelines and rewards that can be used to encourage MLES and ALISE members to serve as
research mentors. The RS Mentoring Coordinator, Susan Lessick, is a member of the MLA Research Task Force.

Thanks so much, Susan! I should report this by the end of next week. Any comments

come in by Monday I will also include as an update in the Hypothesis as well.

Thank you for all your efforts on behalf of the Section this year!

Best,

Terrie

Subject: [Research-mla] FYI - New NCHS Data Online Query System Now Available - Designed for the general user without knowledge of commercial statistical databases
Message-ID: <5D9D96590AF1874E83AD48C46BBB88557D108E64@SH-ExchMB2.master.lsuhsc.edu>

Sorry for crossposting.

This may be of interest to you, your faculty or staff!

The National Center for Health Statistics (NCHS) is pleased to announce the beta release of our newest statistical tool, the NCHS Data Online Query System (DOQS). NCHS DOQS gives users the ability to generate and store statistical analyses customized to their specific requirements. The system provides dynamically generated statistical tables, charts, and graphs using NCHS public use data. NCHS DOQS is designed for the general user without knowledge of commercial statistical software packages. Currently, visit data from the Emergency Department component of the 2005-2010 National Hospital Ambulatory Medical Care Survey are available, with more datasets planned for the future.

In advance of our upcoming general release, we invite you to explore the beta version of NCHS DOQS and give us your feedback. Your insights will help us provide you with the best possible public health statistical tool.

To begin using NCHS DOQS http://www.cdc.gov/nchs/doqs/index.htm, we recommend that you start with a brief tutorial http://www.cdc.gov/nchs/ppt/doqs/nchs_doqs_overview.pdf. Once you have tried

out the system, please send your feedback, using the Contact Us section of the website. Thanks for your assistance!

In-Reply-To: <533C996A.7070209@uic.edu>
References: <533C996A.7070209@uic.edu>
Message-ID: <53584A89.90707@uic.edu>

Hi MLA research awards pre-judges,

This is just a nudge to anyone who volunteered for prejudging assignments for MLA 2014 posters and papers (you would have received an email from me with your assignments) to please complete your assignments by the end of the day tomorrow (April 24th). Thanks to all of you who have completed your assignments.

The committee will be in touch next week with preliminary assignments for judging at MLA itself.

If you haven't volunteered yet but want to, here is your last chance: https://docs.google.com/forms/d/12HtEejJ7FbDvrGMmZb_N6Mp4tfBkD-UJDAjTYW9Fwq8/viewform

Thanks for all your help in making this process a success.

Sandy

Subject: [Research-mla] Call for Librarian Lightning Talk Proposals for
        Science Boot Camp Southeast

Message-ID: <CAJd9U13q3N4MR2OA1_rde5jsvd4v0-
mB=tBFFjEc560=h+1Vbg@mail.gmail.com>

Dear Colleagues,

The Science Boot Camp Southeast Planning Committee is pleased to announce a call for Librarian Lightning Talk proposals. We invite librarians to submit proposals on how they are collaborating with science researchers at their university. The Lightning Talk will last 5 minutes per presenter and a laptop with a projector will be provided. The deadline for proposals is Friday, June 6, 2014. Proposal Submission
Form<http://guides.ucf.edu/content.php?pid=581806&sid=4817972>

Science Boot Camp Southeast will be a the Hunt Library at N.C. State University on July 16-18, 2014.
Registration<http://guides.ucf.edu/sciencebootcampSE>and housing are still available!

If you have questions about the Librarian Lightning Talks, please contact Sarah Jeong (jeongsh at wfu.edu) or Jeanne Hoover (hooverj at ecu.edu).

Good evening RS members,

Brooke Billman has moved over the content that is on the existing section website to the new WordPress site- http://research.mlanet.org/wp/

We are seeking a minimum of three volunteers to work with Brooke to review the new site, and offer usability suggestions to enhance it. It would be great to have the volunteers begin to look at the site before MLA, and perhaps even have it completely reviewed in time to report for the annual meeting.

Please let Brooke and I know if you would be interested in working with her to review the new RS website in WordPress.

Thank you very much for your gracious consideration.

Sincerely,

Terrie Wheeler

RS Chair 2013 - 2014

Hi everyone,

The Hypothesis for Spring 2014 is now available. We hope this issue is interesting to read and provides something useful to you on research methods and processes. Let us know what you think.

Thanks,
Diane Cooper and Kathleen Amos

Diane and Kathleen,
This looks great! Thanks for all the hard work you have done to update Hypothesis and make it more 'user friendly'. Haven't made it all the way through, but thought what I did read was very interesting.

See you in a few das.
Carole

Subject: [Research-mla] 2015 program brainstorming
Message-ID: <E887BBF88D596C44A919D61C72FA2E7C11FD187C@vmw-excmbd1s03.dhe.duke.edu>

Hello!

I will be attending the 2015 program planning meetings next week at MLA. Hopefully we will have time to discuss ideas at the Research Section Board meeting. For those of you not joining us in Chicago and in order to get the creative thoughts flowing I wanted to start the conversation by email. Below are some of the relevant snippets from the 2014/15 Presidential priorities and 2015 Meeting theme. Please share any ideas you have with the group!

2014/15 Presidential priorities
... During my year as president, I will be focusing on two of the goals, advocacy and lifelong learning.

* Based on the recommendations of the Futures Task Force, work on the structure and focus of the association to ensure it is meeting the future needs of the membership.

* Develop and implement an environmental scan of our current membership to look at reporting structures, staffing, and retention of our members in the workforce so we have a clear picture of what our priorities need to be in redefining the health sciences librarian.

* Develop credentialing programs that recognize special expertise in areas such as e-science and big data, instructional skills, and clinical research. This may involve collaborating with other organizations to develop classes and workshops that may be online or in person.

2015 Meeting theme: "Librarians without Limits"
"Our expertise, training, and innovative nature have taken us into new roles well beyond what is typically thought to be library work. Inspired by Austin's independent flair, culture and atmosphere we will discover more about how we are shaping a new normal; reaching beyond the conventional and away from what was traditionally defined as the library."

Thank you!
Emily

Congratulations Diane!

I know that you've been working diligently on the new peer reviewed component of Hypothesis. It looks great!

Have we ever considered adding Hypothesis to PubMed Central? I looked at the page and it seems eligible:

http://www.ncbi.nlm.nih.gov/pmc/pub/pubinfo/

See you in Chicago!

Jon

Subject: [Research-mla] Research Section Business Meeting - Tuesday, May 20, 7:00 - 9:00am
Message-ID: <88ADB35AB1AB3A4590A9948A267573363638629E@MLBXV08.nih.gov>

Greetings Research Section Members,

I cordially invite you to attend our annual business meeting at MLA on Tuesday, May 20 from 7:00 - 9:00am in the Comiskey Room, Bronze Level, West Tower. If 7:00am seems a bit early, Merle Rosenzweig has graciously arranged for a continental breakfast to reward you for attendance!

Attached is an agenda, reports from committee chairs unable to attend in person, and the minutes from last year's meeting. Please bring copies for yourself as you prefer, electronically or in paper.

Since our agenda is long, I want to offer my thanks here, in case I don't have time to do this at the meeting!
I want to thank EVERYONE on the Executive Committee for their support and efforts throughout this past year. I especially want to thank Beatriz Varman, Merle Rosenzweig, Diane Cooper, Brooke Billman, Sandy DeGroote, Aileen McCrillis, and Kris Alpi.

Beatriz redesigned the welcome letter sent to new members this year, and to gather more information about new members, she sent them a brief questionnaire. She had some responses that we wanted to share with all of you, so you can welcome these new members. It is a great idea to highlight their efforts, and why they chose to join the Research Section. Thanks so much, Beatriz.

Merle has arranged awesome section programming that will benefit both Research Section members and the larger organization. In addition, Merle compiled a listing of Research Section members' presentations, which she shared with this list yesterday. I am including it again in the attachments. Merle, this was a great service to the section, and I appreciate it.

Diane has a vision for a Research Section newsletter that is rigorously peer-reviewed, as is fitting for the Research Section. She has worked for several years to make this vision a reality. The issue she sent last week highlights her efforts, and is a very informative read. She and the editorial board are noting articles that are peer-reviewed. This is an opportunity for our profession to begin to communicate their work in a professional and peer-reviewed manner. The articles do not need to be lengthy, but of course they can be if the author chooses. Please consider submitting a research piece to Diane and her team, so that her efforts can continue to develop the Hypothesis into a newsletter of excellence. My sincere thanks, Diane.

Brooke has been constantly available to assist, to answer questions about the section, and to ensure that our web presence is continually updated. She has been proactive in ensuring information communicated was correct. Most recently, she migrated the section's website to Wordpress, and I sent a message for volunteers to assist her with evaluating usability of the new site. I am most grateful for Brooke's contributions to the section this year.

One of the biggest efforts of the Research Section each year is coordination and review of MLA papers and posters for the Research Section Awards that we offer to the best papers and posters. Sandy and Aileen took this on and have made a very challenging task look quite simple. They have effectively recruited and organized two reviewers to each poster and paper that the author has indicated is a report of research. Please consider being a judge in the coming year if you haven't already. It is a rewarding experience, and gives you an opportunity to look at a presentation or poster a bit differently than you might if you were just walking by, or sitting in the audience. Thank you very much, Sandy and Aileen, for such consumate leadership.

Kris has been a great mentor for me this year as I have led the section. She embodies much institutional knowledge about the section, and has benefitted many section chairs. As she has been elected to the MLA Board of Directors, I have performed some of her functions as past-chair, and she has been very helpful in advising with regard to those duties as well as chair duties. I reached out to Kris early in my term to consider section projects that we might nominate for the Section Project of the Year. I thank Kris for suggesting and leading the effort to nominate the section for its leadership to develop and update the MLA Research Agenda. This was an effort by Jonathan Eldredge, Molly Harris, Marie Ascher and Heather Holmes, which is highly deserving of recognition. Kris also organized the group of volunteers to develop the Research Section poster to raise awareness of our

Section among MLA members. Kris, my humble thanks for all you have done for the section this year.

Sincerely,

Terrie Wheeler

Dear Research Section members,?

Please join me in congratulating and thanking our RS colleagues who took the time to author or edit content for MLA books this year. ?I was looking at the new publications and so excited to see the contributions by our members to these new works. ?RS members are bolded in the lists below.?
If you are looking for publication mentors - these members definitely have the writing experience! ?:)

Subject: [Research-mla] Research defintion
Message-ID:
<26E415AD2CF87D438E892895D415849C87ED246B@ACEXCDB0001A.health.summa.inet>

Hi everyone,

While at MLA during the Research Section business meeting, one of the people in attendance was a student - Michelle Bass - sent out a tweet (as many of us were) and mentioned that she was unable to find the definition of research on the Section's website.

I looked too, and I also was unable to find it. In fact, I couldn't find it anywhere even on MLA's site. If it does exist, someone please tell me where and I will pass that along to Michelle, and I would also suggest making it more visible.

We (the collective "we") have used a couple of definitions in our publications over the years.

One being from the CFR:

45 CFR 46.102(d)

Research means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

[as an aside, I think the government made up the word generalizable]

The Institute of Medicine [I have been unable to locate exactly where this definition comes from, but it is widely quoted, so I don't know if using it on our public website is a good idea, yet it is a good definition]

A systematic pattern of actions that is constantly optimizing productivity, communication, and value within an organization in order to achieve the aim of measuring attributes, properties, and characteristics of a project/service in the context of the expectations and needs of customers and users of that product.

The New Oxford American Dictionary

The systematic investigation into and study of materials and sources in order to establish facts and reach new conclusions.

So, I'm throwing this out there for discussion as to which definition we want to use (I vote for CFR), and get it on the website where it is prominently displayed.

Thoughts?

I agree with Heather. I think the CFR definition is most helpful and specific and would also align with most IRB definitions of research (although they're interested in the human stuff only, mostly). The IOM definition has too many quality improvement connotations, in my opinion. Not QI is bad, but there could be a serious debate about the difference between research v. QI v. EBP (at least at my institution).

Subject: [Research-mla] Research defintion

Hi everyone,

While at MLA during the Research Section business meeting, one of the people in attendance was a student - Michelle Bass - sent out a tweet (as many of us were) and mentioned that she was unable to find the definition of research on the Section's website.

I looked too, and I also was unable to find it. In fact, I couldn't find it anywhere even on MLA's site. If it does exist, someone please tell me where and I will pass that along to Michelle, and I would also suggest making it more visible.

We (the collective "we") have used a couple of definitions in our publications over the years.

One being from the CFR:

45 CFR 46.102(d)

Research means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

[as an aside, I think the government made up the word generalizable]

The Institute of Medicine [I have been unable to locate exactly where this definition comes from, but it is widely quoted, so I don't know if using it on our public website is a good idea, yet it is a good definition]

A systematic pattern of actions that is constantly optimizing productivity, communication, and value within an organization in order to achieve the aim of measuring attributes, properties, and characteristics of a project/service in the context of the expectations and needs of customers and users of that product.

The New Oxford American Dictionary

The systematic investigation into and study of materials and sources in order to establish facts and reach new conclusions.

So, I'm throwing this out there for discussion as to which definition we want to use (I vote for CFR), and get it on the website where it is prominently displayed.

Thoughts?

The Credentialing Committee for AHIP (I'm the Board of Directors liaison to the committee) is interested in this issue for categorizing research articles vs. other articles. This has become an issue with the changes to the JMLA with the Brief Communication section.

It would be great if Research Section would adopt/suggest a definition. I can always take it to the board to see if it would be something MLA would adopt as well.

Here is the AHIP section in question.

Publishing

Clarification for all publications: Works in press may not be counted for points. The work must be completed (i.e. published) before points can be awarded.

Authoring

Clarification for all journal articles: Letters to the editor do not count as publications.

Peer-reviewed Journal
Activity

Points

Research article author (three or fewer) 25 points
Research article author (four or more) 15 points
Brief article, column, review author (three or fewer) 10 points
Brief article, column, review author (four or more) 6 points
Book or media review author 3 points

Brief column; less than 1,000 words
3 points

Documentation required: Copy of pages indicating that journal is peer-reviewed (this is not required for library science journals), copy of title page of journal, and a copy of the title page of the article.

Clarifications:

* Articles published in the Brief Communications section of the JMLA are brief articles. Articles in similar sections of other peer-reviewed journals would also be considered brief articles.
* Must include word count with the copy of the brief column.

Non-peer-reviewed Journal
Activity

Points

Research article author (three or fewer) 7 points
Research article author (four or more) 4 points
Brief article, column, review author (three or fewer) 3 points
Brief article, column, review author (four or more) 2 points
Book or media review author 2 points

Documentation required: Copy of title page of journal and a copy of title page of article.

Bylined Contribution in Newsletter
Points Awarded

1 point

Documentation required: Copy of title page of newsletter and a copy of page where author's name appears.

Clarifications:

* MLA News is considered a newsletter.
* Newsletter articles written as part of committee responsibilities are not awarded points. Points can be claimed, however, for committee work.

* Aricles in any publication of the employing institution are not awarded points.

Hi,

I'm glad to hear is considering that there are now new kinds of articles in JMLA that are not accounted for in the credentialing guidelines. For instance, I just submitted my AHIP application and one of my publications in JMLA is a new form called a Research Report. I put it with point values corresponding with a brief communication to be on the safe side, although the type of article has the word "research" in the title. I have some context for it because I was on JMLA's editorial board when the changes were made but I imagine it'd be very confusing for others applying for AHIP. There are no longer brief communications in JMLA; there are letters to the editor, editorials, case studies, research reports, systematic reviews, and full-length papers. Perhaps the credentialing committee can revise their guidelines to address the new JMLA article categories, and also the Research Section could take JMLA's descriptions into account while drawing up their own definition.

https://www.mlanet.org/publications/jmla/jmlainfo.html#categories

Thanks,
Megan Rosenbloom

Dear Research Section members,

The team of RS members who worked on our section's poster at MLA would like to share the poster with all of you.? Attached is a PDF of the poster and two photos of it on display.? The photo with people is L to R - Jennifer Staley, Angela Hardi, Erla Heyns, and Kris Alpi.

Please thank the RS members who worked on the Section poster:

Design: Gisela Butera (George Washington Univ), Lori Fitterling (Kansas City Univ of Medicine & Biosciences)?
Content and Staffing: ?Erla Heyns (Cornell Univ), Angela Hardi (Washington Univ. School of Medicine), Tara Brigham (Mayo Clinic, Jacksonville, FL), Jennifer Staley (Rainbow Babies & Children's Hospital), Emily Mazure (Duke Univ). ?
Content: Debra Revere (Univ of Washington), Donghua Tao (St. Louis Univ.), Elisabeth Marrapodi (Trinitas Regional Medical Ctr), Susan Lessick (retired), Kristine Alpi (North Carolina State Univ)

The poster is a foldable fabric poster that can be easily shipped and carried. I currently have it and can make it available if any of you are interested in taking it to MLA chapter or other meetings.?? We are still figuring out where it will live permanently.?? Let me know if you are interested in borrowing it.

Thanks and enjoy!
Kris Alpi (former past-chair of RS)

        Science Boot Camp SE
Message-ID: <CAJd9U12-
k41i1YFOu5wKRH2ufic0+W5+Ncm2J+qPqi=AMKNwHg@mail.gmail.com>

Apologies for cross-posting

Please consider attending Science Boot Camp Southeast. Modeled closely on the wildly successful Science Boot Camps that originated in the Northeast US and have spread West and to the far North, Science Boot Camp Southeast is a unique and affordable 2 ? day in-depth immersion in current science topics for librarians and library students who support scientific researchers. Room and board are included in the ?camper? registration fee of $250. Commuters register for $150.

Lightning Talk Proposals: We invite librarians to submit proposals on how they are collaborating with science researchers at their university. The Lightning Talk will last 5 minutes per presenter and a laptop with a projector will be provided. *The deadline for proposals is Friday, June 6, 2014.* Proposal Submission Form
<http://guides.ucf.edu/content.php?pid=581806&sid=4817972>

Registration Deadline: Noon July 1.

Agenda and Registration: http://guides.ucf.edu/sciencebootcampSE

Topics: We will spend ? day engaging with researchers in each of these fields:

-

ALTERNATIVE/SUSTAINABLE ENERGY
-

DATA SHARING
-

DATA VISUALIZATION
-

CLIMATE CHANGE

When: July 16th ? 18th 2014

Where: The James B. Hunt Jr. Library on North Carolina State University?s Centennial Campus, Raleigh, NC

Benefits & Outcomes of Science Boot Camp Southeast:

For each of the focus topics covered at Science Boot Camp?s science sessions, Science Boot Campers will be able to:

-

Explain the structure of the field and its foundational ideas
-

Understand and be able to use terminologies for the field
-

Identify the big questions that this field is exploring
-

Discuss new directions for research in this field
-

Discuss what questions research in this field is addressing
-

Understand how research is conducted, what instrumentation is used, and how data is captured
-

Identify how researchers share information within their fields beyond publications
-

Share insights into what current research in the field is discovering and implications of these discoveries

-

Share insights into the current and future state of how researchers in specific fields collaborate with librarians
-

Identify new ways that librarians can support their research communities

Professional Networking: There will be two scheduled sessions for librarian lightning talks focused on collaboration between science librarian and researchers at their institutions, and a fun evening out at the Nature Research Center at NC Museum of Natural Sciences.

Message-ID: <E887BBF88D596C44A919D61C72FA2E7C12400C06@vmw-excmbd1s03.dhe.duke.edu>

Hi everyone,

I'd love to hear input from the Section on 2015 program planning. Below I have described the sessions I proposed as well as sessions other Sections proposed which I thought we may be interested in collaborating on. I will need to decide what programs are worth pursuing and begin to formalize their format, title, and description in the next few weeks. Please feel free to send ideas you have about the sessions described or anything else to the list or directly to me.

Thanks!
Emily

Sections proposed by Research Section

? Systematic Reviews

o In the Research Section business meeting it was suggested that we plan a program to provide an opportunity for groups currently working on the systematic review projects to report on their work.

? Different formats were proposed, including a lightning round with posters; invited papers; and/or a contributed papers session.

? This could potentially involve 2 separate sessions

o At the program planning meeting the Cancer section expressed a strong interest in partnering on this. They specifically mentioned being interested in focusing on the 'pain points' of the systematic review process.

? Publishing & How to Write

o In the Research Section business meeting another suggestion made was to host a session on best practices for finishing your research and then writing it up and getting it published. We didn't really flesh this out much more, so I'd love to hear how other's envisioned this.

o In the program planning meeting there was some discussion as to whether this topic would be better as a CE. Apparently there has been a CE offered previously on this topic. So we may need to argue how our session would be different/better than a CE. Someone suggested a 'flipped webinar series'.

o Several other sections indicated they were interested in partnering on this, particularly NAHRS - although they had a slightly different take on it and had an invited speaker in mind.

Sections proposed by others

? Library Involvement in Research Data Management - proposed by the Cancer Librarians Section

? Collaboration without Limits - proposed by the Dental Section

o Their description: Finding new ways to reach out and partner with other libraries/librarians/others

? e.g., Medlibs twitter chat, Quint chapter, Quad

? Collab outside formal organ.

o After they described this I wasn't sure it made sense anymore, but if we could convince them to focus more broadly on collaborations, then research collaborations certainly could fit.

? Big Data, Little Data: There are no limits - proposed by the Medical Informatics Section

o Their description: Data presentation with more emphasis on hospital libraries (2014 focus was more academic)

? Also interested in presentation of research data?

? wondering if library data to tell our story would be of interest

o The presentation of research data seemed like it could fit.

I am interested in the two sessions proposed by the Research Section.

The systematic review would seem to be great for paper presentations aimed at how to, focusing on the process, getting started, finding faculty to work with, problems, etc.

For the publishing and how to write, I think an invited speaker would be fine or maybe a panel discussion.

I'm not sure I understand how we would fit into the collaboration one as much, unless they expand to community collaboration, then research in that area could be included.

For both the data ones, paper presentations seem useful, similar to systematic reviews. It seems like something many of us want to be involved

in, but we're not sure how to get started because it seems so overwhelming from the outside.

Hi,

Great ideas! Systematic reviews are always a hot topic but I especially like the idea of adding a panel to the publishing proposal.

Would you try to focus on how to publish "research" studies or keep it general? Perhaps include librarians who have worked on IRB studies, interdisciplinary teams, systematic reviews...I would enjoy hearing from those who can share their experience beginning from the IRB process, lit review, how best to find journals to submit the study as well as working with editors.

Hi everyone,

I?d love to hear input from the Section on 2015 program planning. Below I have described the sessions I proposed as well as sessions other Sections proposed which I thought we may be interested in collaborating on. I will need to decide what programs are worth pursuing and begin to formalize their format, title, and description in the next few weeks. Please feel free to send ideas you have about the sessions described or anything else to the list or directly to me.

Thanks!

Emily

Sections proposed by Research Section

? Systematic Reviews

o In the Research Section business meeting it was suggested that we plan a program to provide an opportunity for groups currently working on the systematic review projects to report on their work.

? Different formats were proposed, including a lightning round with posters; invited papers; and/or a contributed papers session.

? This could potentially involve 2 separate sessions

o At the program planning meeting the Cancer section expressed a strong interest in partnering on this. They specifically mentioned being interested in focusing on the ?pain points? of the systematic review process.

? Publishing & How to Write

o In the Research Section business meeting another suggestion made was to host a session on best practices for finishing your research and then writing it up and getting it published. We didn?t really flesh this out much more, so I?d love to hear how other?s envisioned this.

o In the program planning meeting there was some discussion as to whether this topic would be better as a CE. Apparently there has been a CE offered previously on this topic. So we may need to argue how our session would be different/better than a CE. Someone suggested a ?flipped webinar series?.

o Several other sections indicated they were interested in partnering on this, particularly NAHRS ? although they had a slightly different take on it and had an invited speaker in mind.

Sections proposed by others

? Library Involvement in Research Data Management ? proposed by the Cancer Librarians Section

? Collaboration without Limits ? proposed by the Dental Section

o Their description: Finding new ways to reach out and partner with other libraries/librarians/others

? e.g., Medlibs twitter chat, Quint chapter, Quad

? Collab outside formal organ.

o After they described this I wasn?t sure it made sense anymore, but if we could convince them to focus more broadly on collaborations, then research collaborations certainly could fit.

? Big Data, Little Data: There are no limits ? proposed by the Medical Informatics Section

o Their description: Data presentation with more emphasis on hospital libraries (2014 focus was more academic)

? Also interested in presentation of research data?

? wondering if library data to tell our story would be of interest

o The presentation of research data seemed like it could fit.

Lucky you! I have worked with faculty on IRB's that have been challenging!

We needed to either explain "why" we are doing things a certain way or revise it (i.e. how participants can opt out of the study...). It can be brutal and I have seen it drag on for months. :(

Hi,

Great ideas! Systematic reviews are always a hot topic but I especially like the idea of adding a panel to the publishing proposal.

Would you try to focus on how to publish "research" studies or keep it general? Perhaps include librarians who have worked on IRB studies, interdisciplinary teams, systematic reviews...I would enjoy hearing from those who can share their experience beginning from the IRB process, lit review, how best to find journals to submit the study as well as working with editors.

The systematic review would seem to be great for paper presentations aimed at how to, focusing on the process, getting started, finding faculty to work with, problems, etc.

For the publishing and how to write, I think an invited speaker would be fine or maybe a panel discussion.

I?m not sure I understand how we would fit into the collaboration one as much, unless they expand to community collaboration, then research in that area could be included.

For both the data ones, paper presentations seem useful, similar to systematic reviews. It seems like something many of us want to be involved in, but we?re not sure how to get started because it seems so overwhelming from the outside.

Sent: Monday, June 09, 2014 5:24 PM
To: research-mla at research.mlanet.org
Subject: [Research-mla] MLA 2015 programming

Hi everyone,

I?d love to hear input from the Section on 2015 program planning. Below I have described the sessions I proposed as well as sessions other Sections proposed which I thought we may be interested in collaborating on. I will need to decide what programs are worth pursuing and begin to formalize their format, title, and description in the next few weeks. Please feel free to send ideas you have about the sessions described or anything else to the list or directly to me.

Thanks!

Emily

Sections proposed by Research Section

? Systematic Reviews

o In the Research Section business meeting it was suggested that we plan a program to provide an opportunity for groups currently working on the systematic review projects to report on their work.

? Different formats were proposed, including a lightning round with posters; invited papers; and/or a contributed papers session.

? This could potentially involve 2 separate sessions

o At the program planning meeting the Cancer section expressed a strong interest in partnering on this. They specifically mentioned being interested in focusing on the ?pain points? of the systematic review process.

? Publishing & How to Write

o In the Research Section business meeting another suggestion made was to host a session on best practices for finishing your research and then writing

it up and getting it published. We didn?t really flesh this out much more, so I?d love to hear how other?s envisioned this.

o In the program planning meeting there was some discussion as to whether this topic would be better as a CE. Apparently there has been a CE offered previously on this topic. So we may need to argue how our session would be different/better than a CE. Someone suggested a ?flipped webinar series?.

o Several other sections indicated they were interested in partnering on this, particularly NAHRS ? although they had a slightly different take on it and had an invited speaker in mind.

Sections proposed by others

? Library Involvement in Research Data Management ? proposed by the Cancer Librarians Section

? Collaboration without Limits ? proposed by the Dental Section

o Their description: Finding new ways to reach out and partner with other libraries/librarians/others

? e.g., Medlibs twitter chat, Quint chapter, Quad

? Collab outside formal organ.

o After they described this I wasn?t sure it made sense anymore, but if we could convince them to focus more broadly on collaborations, then research collaborations certainly could fit.

? Big Data, Little Data: There are no limits ? proposed by the Medical Informatics Section

o Their description: Data presentation with more emphasis on hospital libraries (2014 focus was more academic)

? Also interested in presentation of research data?

? wondering if library data to tell our story would be of interest

o The presentation of research data seemed like it could fit.

It depends on the institution. I am on the IRB for UT Medical Center. We review Stage III drug and diagnostic trials and do a lot of expedited reviews. Some proposals require a lot of revision but most are approved.

It is definitely a learning process. For our nurses in a Magnet environment, we have a Nursing Research Guide, a PhD nurse advisor, and a nurse member on the IRB. The nursing research proposal must first pass Nursing Research Council before going to institutional IRB. It?s a good model, since most nurses are unfamiliar with the research process.

Hi,
Great ideas! Systematic reviews are always a hot topic but I especially like the idea of adding a panel to the publishing proposal.

Would you try to focus on how to publish "research" studies or keep it general? Perhaps include librarians who have worked on IRB studies, interdisciplinary teams, systematic reviews...I would enjoy hearing from those who can share their experience beginning from the IRB process, lit review, how best to find journals to submit the study as well as working with editors.

I am interested in the two sessions proposed by the Research Section.

The systematic review would seem to be great for paper presentations aimed at how to, focusing on the process, getting started, finding faculty to work with, problems, etc.

For the publishing and how to write, I think an invited speaker would be fine or maybe a panel discussion.

I?m not sure I understand how we would fit into the collaboration one as much, unless they expand to community collaboration, then research in that area could be included.

For both the data ones, paper presentations seem useful, similar to systematic reviews. It seems like something many of us want to be involved in, but we?re not sure how to get started because it seems so overwhelming from the outside.

Subject: [Research-mla] MLA 2015 programming

Hi everyone,

I?d love to hear input from the Section on 2015 program planning. Below I have described the sessions I proposed as well as sessions other Sections proposed which I thought we may be interested in collaborating on. I will need to decide what programs are worth pursuing and begin to formalize their format, title, and description in the next few weeks. Please feel free to send ideas you have about the sessions described or anything else to the list or directly to me.

Thanks!
Emily

Sections proposed by Research Section

? Systematic Reviews

o In the Research Section business meeting it was suggested that we plan a program to provide an opportunity for groups currently working on the systematic review projects to report on their work.

? Different formats were proposed, including a lightning round with posters; invited papers; and/or a contributed papers session.

? This could potentially involve 2 separate sessions

o At the program planning meeting the Cancer section expressed a strong interest in partnering on this. They specifically mentioned being interested in focusing on the ?pain points? of the systematic review process.

? Publishing & How to Write

o In the Research Section business meeting another suggestion made was to host a session on best practices for finishing your research and then writing it up and getting it published. We didn?t really flesh this out much more, so I?d love to hear how other?s envisioned this.

o In the program planning meeting there was some discussion as to whether this topic would be better as a CE. Apparently there has been a CE offered previously on this topic. So we may need to argue how our session would be different/better than a CE. Someone suggested a ?flipped webinar series?.

o Several other sections indicated they were interested in partnering on this, particularly NAHRS ? although they had a slightly different take on it and had an invited speaker in mind.

Sections proposed by others

? Library Involvement in Research Data Management ? proposed by the Cancer Librarians Section

? Collaboration without Limits ? proposed by the Dental Section

o Their description: Finding new ways to reach out and partner with other libraries/librarians/others

? e.g., Medlibs twitter chat, Quint chapter, Quad

? Collab outside formal organ.

o After they described this I wasn?t sure it made sense anymore, but if we could convince them to focus more broadly on collaborations, then research collaborations certainly could fit.

? Big Data, Little Data: There are no limits ? proposed by the Medical Informatics Section

o Their description: Data presentation with more emphasis on hospital libraries (2014 focus was more academic)

? Also interested in presentation of research data?

? wondering if library data to tell our story would be of interest

o The presentation of research data seemed like it could fit.

Martha,

That is a great model. I love hearing how other institutions handle the IRB process.

Hello again!

First, thanks to everyone who shared ideas and feedback to my first request! I really appreciate your input and am trying to incorporate as much of it as I can while negotiating with other Sections to develop the sessions.

I have discussed the idea for a session on writing and publishing with the Nursing and Allied Health Resources Section. Below is a rough draft of what we are thinking of proposing. Our idea is to invite journal editors and possibly also some librarian authors with experience publishing (maybe 1 who has published their research and another who has published in nursing and allied health). The editors could talk about what they look for and tips they might have for authors. The authors could discuss their experiences with writing and publishing.

Please send your suggestions or comments to me! I'll be meeting to discuss the Systematic Review session tomorrow and will send an update on those plans soon afterward for input, but if you have other ideas or suggestions related to that session please let me know.

Title: Writing & Publishing -- we need something more interesting and creative so feel free to make suggestions

Program format: Invited speakers (journal editors and librarian authors)

Description: You wrap up a project - maybe a brilliant research study, a hugely successful outreach effort, an analysis of collection statistics, or an evaluation of a new instruction method. Now what? All the time and energy you put into that effort should be shared! But how do you go from project to publication? This session will explore the following issues from the perspective of the journal editor and authors:

* Determining if a topic or project is worth writing about.

* Finding the time for writing.

* Framing and formatting your writing for best chances of publication.

* Deciding what to include and exclude.

* Selecting a journal to publish in. (maybe?)

* Troubleshooting issues that may arise. (i.e. author disagreements, copyright, ???)

Thanks!
Emily

Hi Marie,

Thanks for mentioning the idea that was discussed at the meeting. I hadn't heard from anyone after my first message went out and wondered if that was still an interest. Right now the tentative idea for the session on systematic reviews is to focus on 'pain points' in the process and both the Cancer Section and now the Health Assn Libraries Section (their original interest was in librarian involvement in creating evidence based guidelines) are interested in co-sponsoring. As I mentioned, I'll be meeting with them tomorrow to discuss our collective ideas for the session.

I am hoping that however we design the session, it will provide a venue for groups involved in the section's systematic review project to present. Since I'm not working on any of the systematic reviews I'm not very familiar with the project. So I would love to hear from anyone that is working on the reviews or more familiar with them how to best ensure that the session provides an opportunity to report on the work being done.

If it was an invited papers session in which we asked for abstracts focused on the 'pain points'/challenges faced, would that focus allow for systematic review teams to submit and present? Or should we design the session to be invited speakers in which we ask different groups to speak on some of the 'pain points'/challenges faced?

Thanks!
Emily

I want to check in about the program idea that was discussed at the section business meeting that I hope is still on the table. That is, a program dedicated to reports from the section's systematic review project. These teams are working very hard for the section and for MLA. I'm sorry if I missed your first message as I just pulled this one out of yesterday's spam report. My spam filter is way over-eager. I put you on my allowed list now. :)

Hello again!

First, thanks to everyone who shared ideas and feedback to my first request! I really appreciate your input and am trying to incorporate as much of it as I can while negotiating with other Sections to develop the sessions.

I have discussed the idea for a session on writing and publishing with the Nursing and Allied Health Resources Section. Below is a rough draft of what we are thinking of proposing. Our idea is to invite journal editors and possibly also some librarian authors with experience publishing (maybe 1 who has published their research and another who has published in nursing and allied health). The editors could talk about what they look for and tips they might have for authors. The authors could discuss their experiences with writing and publishing.

Please send your suggestions or comments to me! I'll be meeting to discuss the Systematic Review session tomorrow and will send an update on those plans soon afterward for input, but if you have other ideas or suggestions related to that session please let me know.

Title: Writing & Publishing -- we need something more interesting and creative so feel free to make suggestions

Program format: Invited speakers (journal editors and librarian authors)

Description: You wrap up a project - maybe a brilliant research study, a hugely successful outreach effort, an analysis of collection statistics, or an evaluation of a new instruction method. Now what? All the time and energy you put into that effort should be shared! But how do you go from project to publication? This session will explore the following issues from the perspective of the journal editor and authors:

* Determining if a topic or project is worth writing about.

* Finding the time for writing.

* Framing and formatting your writing for best chances of publication.

* Deciding what to include and exclude.

* Selecting a journal to publish in. (maybe?)

* Troubleshooting issues that may arise. (i.e. author disagreements, copyright, ???)

Thanks!
Emily

I agree that it is important to offer a venue for those working on the systematic reviews to present. At the same time I'm trying to balance the priorities of the program planning, where we have been asked to develop broad sessions.

I can see if the other Sections currently interested would still be interested in co-sponsoring that with us. If they feel that would not fit their interests, I can suggest they work together to co-sponsor a separate session on systematic reviews. Then we can sponsor a separate invited speaker session for the purpose of having presentations from the systematic review teams. That assumes there will be room in the program for 2 sessions on systematic reviews. We are currently trying to consolidate sessions, so I'm not sure how that will work.

Are others in agreement that we prioritize ensuring that the people working on the systematic review projects have a session dedicated to their reports?

I've said enough about my desire to provide a venue for these teams (over 200 MLA members participating, lol, okay I'll stop), but I think the reason programmers are asked to develop broad themes is for those contributing papers to have a place where their idea "fits." If we were to do an invited speaker session, then that's really not an issue.

Another idea, how does one procure one of those Special Forum time slots?

I had thought of the special forums as an option too! I'll send a message to the papers committee members to see if they have any idea. If anyone else here knows, please chime in!

Thanks!
Emily

Subject: RE: 2015 program plans - writing and publishing

I've said enough about my desire to provide a venue for these teams (over 200 MLA members participating, lol, okay I'll stop), but I think the reason programmers are asked to develop broad themes is for those contributing papers to have a place where their idea "fits." If we were to do an invited speaker session, then that's really not an issue.

Another idea, how does one procure one of those Special Forum time slots?

Marie

Subject: RE: 2015 program plans - writing and publishing

I agree that it is important to offer a venue for those working on the systematic reviews to present. At the same time I'm trying to balance the priorities of the program planning, where we have been asked to develop broad sessions.

I can see if the other Sections currently interested would still be interested in co-sponsoring that with us. If they feel that would not fit their interests, I can suggest they work together to co-sponsor a separate session on systematic reviews. Then we can sponsor a separate invited speaker session for the purpose of having presentations from the systematic review teams. That assumes there will be room in the program for 2 sessions on systematic reviews. We are currently trying to consolidate sessions, so I'm not sure how that will work.

Are others in agreement that we prioritize ensuring that the people working on the systematic review projects have a session dedicated to their reports?

Wasn't there a motion at the meeting to go ahead and plan that session as an invited speaker session on behalf of the work they have been doing?

I'm sorry I didn't respond to your earlier message. I just want the people on these teams to be given an opportunity to present to their colleagues on the huge amount of work they have done on behalf of the section initiative.

Subject: RE: 2015 program plans - writing and publishing

Hi Marie,

Thanks for mentioning the idea that was discussed at the meeting. I hadn't heard from anyone after my first message went out and wondered if that was still an interest. Right now the tentative idea for the session on systematic reviews is to focus on 'pain points' in the process and both the Cancer Section and now the Health Assn Libraries Section (their original interest was in librarian involvement in creating evidence based guidelines) are interested in co-sponsoring. As I mentioned, I'll be meeting with them tomorrow to discuss our collective ideas for the session.

I am hoping that however we design the session, it will provide a venue for groups involved in the section's systematic review project to present. Since I'm not working on any of the systematic reviews I'm not very familiar with the project. So I would love to hear from anyone that is working on the reviews or more familiar with them how to best ensure that the session provides an opportunity to report on the work being done.

If it was an invited papers session in which we asked for abstracts focused on the 'pain points'/challenges faced, would that focus allow for systematic review teams to submit and present? Or should we design the session to be invited speakers in which we ask different groups to speak on some of the 'pain points'/challenges faced?

Thanks!
Emily

I want to check in about the program idea that was discussed at the section business meeting that I hope is still on the table. That is, a program dedicated to reports from the section's systematic review project. These teams are working very hard for the section and for MLA. I'm sorry if I missed your first message as I just pulled this one out of yesterday's spam

report. My spam filter is way over-eager. I put you on my allowed list now. :)

Subject: [Research-mla] 2015 program plans - writing and publishing

Hello again!

First, thanks to everyone who shared ideas and feedback to my first request! I really appreciate your input and am trying to incorporate as much of it as I can while negotiating with other Sections to develop the sessions.

I have discussed the idea for a session on writing and publishing with the Nursing and Allied Health Resources Section. Below is a rough draft of what we are thinking of proposing. Our idea is to invite journal editors and possibly also some librarian authors with experience publishing (maybe 1 who has published their research and another who has published in nursing and allied health). The editors could talk about what they look for and tips they might have for authors. The authors could discuss their experiences with writing and publishing.

Please send your suggestions or comments to me! I'll be meeting to discuss the Systematic Review session tomorrow and will send an update on those plans soon afterward for input, but if you have other ideas or suggestions related to that session please let me know.

Title: Writing & Publishing -- we need something more interesting and creative so feel free to make suggestions

Program format: Invited speakers (journal editors and librarian authors)

Description: You wrap up a project - maybe a brilliant research study, a hugely successful outreach effort, an analysis of collection statistics, or an evaluation of a new instruction method. Now what? All the time and energy you put into that effort should be shared! But how do you go from project to publication? This session will explore the following issues from the perspective of the journal editor and authors:

* Determining if a topic or project is worth writing about.

* Finding the time for writing.

* Framing and formatting your writing for best chances of publication.

* Deciding what to include and exclude.

* Selecting a journal to publish in. (maybe?)

* Troubleshooting issues that may arise. (i.e. author disagreements, copyright, ???)

Thanks!
Emily

If we are going to have a session focusing and "writing & publishing"
definitely think copyright should be addressed.

Dear Futures TF members,

The draft of our recommendations presented at the MLA Open Forum is now posted and ready for comments: http://blog.mlanet.org/future/

MLA HQ will be sending out a Focus announcement about the blog this week but feel free to send out the link to your friends and colleagues and invite feedback.

Thanks!

Anne and Margo

We are in the beginning stage of working on a page for the project. Thanks for affirming this need.

The questions come from the research agenda and can be seen here: http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3411260/

Note that some of the questions have been slightly reframed by the teams.

The questions are listed in Table 1 of the the article we published in JMLA on the New Research Agenda. The complete list of questions before the final 15 were decided on are in Hypothesis.

Sent: Monday, June 30, 2014 11:04 AM
To: 'research-mla at research.mlanet.org'
Subject: [Research-mla] Listing of SR projects/questions being addressed?

Is there a place that lists all the systematic review projects affiliated with the research section? I couldn't find it on the web site. I'm interested in the actual questions being addressed. Thanks.

Stephanie

July 2014

From emily.mazure at duke.edu Tue Jul 8 15:18:14 2014
From: emily.mazure at duke.edu (Emily Mazure)
Date: Tue, 8 Jul 2014 15:18:14 +0000
Subject: [Research-mla] 2015 MLA programming
Message-ID: <E887BBF88D596C44A919D61C72FA2E7C124348F2@vmw-excmbd1s03.dhe.duke.edu>

Hello again!

An update on planning for MLA 2015. We ended up mixing up some things but I'm excited about how everything turned out. Below is a brief list of the sessions we are planning to sponsor. I've included the description of the session we will be leading and would welcome any comments.

Co-sponsoring:

* Librarians, Evidence and Systematic Reviews: Limitless Possibilities

* Data Curation and Open Access: From Records Management to Metadata services to Preservation: the Life Cycle of Making Scholarly Research Open and Available

* Writing & Publishing - this is still in flux but will hopefully be worked out soon

* New Voices

Sponsoring:

* Failing Forward: Leveraging the unexpected to create new opportunities (contributed papers)

o Humans learn through trial and error, yet many fear failure and neglect to plan for things to go wrong before they go right. Professions espouse critical reflection on unanticipated outcomes as a way to improve practice

and achieve desirable results. Case studies, theory review/commentary, and research about responding to disappointing or unexpected outcomes are welcome. Embracing failure within our learning organizations, communities of learners, and individual mindsets may open paths to greater success in a host of areas: careers, project management, library services, research projects, or collaborations/partnerships. How can we think about failures or "results different than expected"? Should failures be presented in balance with successes? How does failure impact the choice and design of future activities? These are just some of the questions that may be discussed in this program.

In addition, instead of sponsoring a paper session on the systematic review projects focused on library issues we will be hosting an open forum on it.

Thanks for all of the helpful feedback throughout this process.
Emily

Subject: [Research-mla] Two faculty positions posted: Innovation Librarian, Research Librarian
Message-ID:
<CAFsmzEk217s6qbuN9aBq=aUJeReyo27cFUdASYw55yidenF=ZA@mail.gmail.com>

PLEASE EXCUSE CROSS-POSTINGS

The Spencer S. Eccles Health Sciences Library, University of Utah, seeks creative, energetic, and collaborative individuals to fill two faculty librarian positions.

Innovation Librarian

The Innovation Librarian will directly support students, faculty, and staff working on medical gaming, innovation, and medical entrepreneurism, and may directly supervise innovation fellows and other part-time employees. In addition to the specific innovation focus, the Innovation Librarian will be part of a team responsible for literature searching, general reference, education, and outreach. The Innovation Librarian shares

responsibility for innovation and gaming-related event planning and social media promotion of the Library?s value. This position is a full-time, tenure track faculty position, reporting directly to the Associate Director for Education and Research and indirectly to the Library Director. Salary: Minimum $44,000.

Application Instructions, Qualifications, and Complete Job Description online at: http://utah.peopleadmin.com/postings/33290

Research Librarian

The Research Librarian is responsible for supporting clinical and bench science biomedical researchers through reference, literature searching, outreach, and education. Primary domains for the Research Librarian?s outreach and education are biomedical scholarly communication, grant cycles and compliance responsibilities, data management planning, and research impact measurement. Depending on the qualifications and interest of the successful candidate, the Research Librarian may be embedded within the Health Sciences campus. Candidates with bench research experience and outgoing personalities are particularly sought. This position is a full-time, tenure track faculty position, reporting directly to the Associate Director for Education and Research. Salary: Minimum $47,000.

Application Instructions, Qualifications, and Complete Job Description online at: http://utah.peopleadmin.com/postings/33442

<http://utah.peopleadmin.com/postings/33442>

The mission of the Spencer S. Eccles Health Sciences Library is to advance and transform education, research, and health care through dynamic technologies, evidence application, and collaborative partnerships. The Library contributes to the success of health professionals, students, researchers and the community. The Library is recognized locally and nationally as a leader of intellectual exploration and as a catalyst for innovative discovery.

The Spencer S. Eccles Health Sciences Library (http://library.med.utah.edu) serves University of Utah Health Care, the Intermountain West's only academic health sciences center, including the Schools of Medicine and Dentistry and the Colleges of Nursing, Pharmacy and Health as well as the University Hospitals and Clinics. The Library also serves as headquarters for the National Network of Libraries of Medicine, MidContinental Region and the National Library of Medicine Training Center. It is a member of the Utah Academic Library Consortium, the Medical Library Association, the Association of Academic Health Sciences Libraries, and the Association of Research Libraries.

The University of Utah is an Affirmative Action/Equal Opportunity employer and does not discriminate based upon race, national origin, color, religion, sex, age, sexual orientation, gender identity/expression, status as a person with a disability, genetic information, or Protected Veteran

status. Individuals from historically underrepresented groups, such as minorities, women, qualified persons with disabilities and protected veterans are encouraged to apply. Veterans? preference is extended to qualified applicants, upon request and consistent with University policy and Utah state law. Upon request, reasonable accommodations in the application process will be provided to individuals with disabilities. To inquire about the University?s nondiscrimination or affirmative action policies or to request disability accommodation, please contact: Director, Office of Equal Opportunity and Affirmative Action, 201 S. Presidents Circle, Rm 135, (801) 581-8365.

The University of Utah values candidates who have experience working in settings with students from diverse backgrounds, and possess a strong commitment to improving access to higher education for historically underrepresented students.

The University of Utah Health Sciences Center is a patient focused center distinguished by collaboration, excellence, leadership, and Respect. The University of Utah HSC values candidates who are committed to fostering and furthering the culture of compassion, collaboration, innovation, accountability, diversity, integrity, quality, and trust that is integral to the mission of the University of Utah Health Sciences Center.

Subject: [Research-mla] Call for participation in technology survey by August 15
Message-ID: <de6a2fa6ff71478a9088b9f3baba1ef1@BN1PR07MB262.namprd07.prod.outlook.com>

Hello all,

Passing this call for participation on behalf of my partners in this project. This project has already resulted in one publication in JMLA and an honorable mention from MLA's Research Paper Award for MLA 2014. We'd love for you to join us in gathering this useful data! - Megan Rosenbloom

The Emerging Technologies Committee (ETC) for the Health Sciences Libraries at the University of Southern California is charged with investigating and integrating new technologies to improve library services. Our committee is interested in determining what devices and software entering health sciences students own, and therefore, what instruction they need in order to use library resources effectively.

We have created a 16-item survey* to gather this data and will administer it in fall 2014. We are seeking partner institutions who are interested in using this instrument with students entering health professional degree programs. Using the same instrument in a variety of schools will permit us to compare different programs, providing insight into commonalities and differences in technology adoption and comfort between student populations.

This survey was begun in 2012 and conducted again in 2013. We update the survey annually with new technologies. The data has received national attention. You can see the data we collected in 2012 and 2013, a bibliography of presentations and publications, and a copy of the 2014 survey instrument at http://norris.usc.libguides.com/techsurvey.

If you choose to participate, we will host the survey for you on USC's subscription to Qualtrics and provide you with a URL to share with your students. In this way, we can ensure that each question is constructed correctly to provide consistent data that can be easily compared to other institutions. Review the survey instrument as linked above to examine questions 2 and 16; we will personalize these questions with degree programs and topics pertinent to your library, and we can add up to 3 additional questions for your school alone (you'll provide us with the questions and answers). We will provide you with the data collected from your students in Excel format at the conclusion of the survey period in October 2014, and will also provide you with data on request at any time during the survey's open period.

USC reserves the right to publish articles on the collective data first. We will acknowledge all of the librarians and institutions involved in collecting the survey data. After we publish the first article or conduct the first presentation using collective data gathered in 2014, we will share the collective data with all the participating institutions. All participating institutions may publish their own data at any time. When you publish your own data, we would appreciate your giving credit to the USC Health Sciences Libraries since we created the survey instrument and initiated this project.

If you are interested in conducting this survey at your institution, please contact Lynn Kysh, at kysh at usc.edu<mailto:kysh at usc.edu> , by August 15, 2014.

August 2014

From lorie.kloda at mcgill.ca Wed Aug 13 14:18:18 2014
From: lorie.kloda at mcgill.ca (Lorie Kloda, Dr)
Date: Wed, 13 Aug 2014 14:18:18 +0000
Subject: [Research-mla] Invitation to participate in a study on librarian journal clubs
Message-ID: <D010EBE5.5F51%lorie.kloda@mcgill.ca>

Hello,

We are conducting a research study exploring the value of journal club participation for librarians.

As part of this research, we invite academic librarians who are currently or have recently participated in a journal club for an interview of approximately 30 minutes to one hour. The interview will be conducted online using either Skype or VSee software (free to use).

Sometimes referred to as ?discussion groups? or ?reading groups,? journal clubs can be defined as meetings where participants engage in critical appraisal of research publications. The various purposes of journal clubs include developing a community of practice, learning about research trends and methodologies, and integrating evidence into practice. Journal clubs therefore can be linked to informal learning in the workplace.

To be eligible to participate in the study, you must be an academic librarian, comfortable speaking in English, and have attended two or more journal club meetings in the last 12 months. Any type of journal club, whether specifically for librarians or not, is acceptable. This study has received ethics approval from the Research Ethics Board at McGill University.

If you are interested in participating, please contact Lorie Kloda, Associate Librarian at McGill University, at lorie.kloda at mcgill.ca<mailto:lorie.kloda at mcgill.ca> for more information.

Sincerely,

Lorie Kloda, MLIS, PhD (McGill University)

Subject: [Research-mla] Exhibiting Research Section poster at Chapter Meetings
Message-ID: <1410123485.70847.YahooMailNeo@web120103.mail.ne1.yahoo.com>

Hi RS Members

Hope you are having a great fall gearing up for Chapter meetings! This year we made a Research Section poster for MLA and it is one of those new cloth posters that is easy to fold and ship. At MLA, it was suggested that RS members might see about displaying the poster at some of the chapter meetings. I am willing to approach the Mid-Atlantic Chapter about a space to display it and take it to that meeting, Oct. 19-22.

Would anyone be willing to see about whether it could be displayed at your chapter meetings like the Quint meeting on Oct. 12-16 or the Southern Chapter meeting Oct 26-30? It could basically be mailed from meeting to meeting since it is so light. Shipping is just a few dollars and I or the section could provide pre-stamped envelopes so that those willing to host the poster wouldn't incur any shipping costs.

The list of meetings is at 2014-2015 MLA Chapter Meeting Schedule | MLANET --- sadly there is some overlap and we only have the one poster, but being able to cover at least a few of the big meetings would be terrific. Thanks for considering it! You can reply to me directly at kris at jeffalpi.net and I will try to coordinate since the poster is in my office now. Thanks again!

Kris Alpi

Checking the schedules for Chapter meetings the Mid-Atlantic and Mid West overlap so would not work, unfortunately.

We have some great programs scheduled for MLA 2015 in Austin! Scroll down for descriptions and the deadline for submissions. The Research Section is the main sponsor for one paper sessions and co-sponsor for four others, so there are many of opportunities to be involved!

If you are interested in reviewing paper submissions, please let me know by Monday Sept. 29th.

The Research Section is sponsoring section program 30 and co-sponsoring programs 12, 21, 22, and 32. I would like to encourage our members to submit

abstracts for any relevant session, but hope the sessions we are sponsoring will be particularly attractive! The deadline for abstract submission by authors is Monday, November 3rd.

Subject: [Research-mla] Question: book proposals
Message-ID: <A15614441649304EAA9199B5B9361EC0145D69FA02@EXMBOX-VP05.OSUMC.EDU>

Hello,

I'm interested in anyone's experience in pitching a book (about libraries/librarian 'stuff') with a publisher. I have several specific questions that come to mind, but feel free to share other items I've not thought of. You can contact me off list if you prefer.

1. How did you get started? Did you come up with an idea, gather a few collaborators, and write a proposal? Or something else?

2. How did you choose your publisher? Any magic to that?

3. Did you negotiate royalties or other payment for your work?

4. For those working in universities, did you write your book off the clock so you could collect royalties? Or were there other loopholes that

allowed you to be paid for your work? (obviously unlike journal articles) Are there typical royalties? Or does one need an agent (I'm being completely serious here!)?

5. Timeframe: how long from the pitch to the publisher to the completion of the book?

6. Can edited works with multiple authors still garner income? And how is that handled if so?

If you have thoughts to share, send me way! Thanks!

RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROJECT GRANTS

Practicing health sciences librarians are encouraged to apply for the MLA Research, Development or Demonstration Project Grants. Through grants ranging from $100.00 to $1,000.00, the Medical Library Association (MLA) aims to support projects that promote excellence in the field of health sciences librarianship and information sciences. Grants will not be given to support an activity that is operational in nature or has only local usefulness. More than one award may be granted in a year.

Applications must be received by December 1st. Application form, eligibility criteria and submission details are available at: https://www.mlanet.org/awards/grants/research.html.

Looking for examples? Research, Development or Demonstration Project Grants have funded the following:

* "A research study: Does exemplary library services to patients and their family members, friends, and caregivers influence patient satisfaction scores?"
* "The efficacy of digital conversion of audiotape collection to CD format measuring change in use and evaluating user satisfaction"
* "An investigation of electronic book use in an Academic Medical Center"
* "The publication rate of poster entries and abstracts from MLA annual meetings in peer-reviewed or respective professional and trade journals"
* "A study of the experiences and opinions of Loansome Doc Libraries and end-users in the Midwest United States"
* "Issues surrounding the administration of a credit course for medical students: Survey of US academic health science librarians"

Message-ID:
<F133EA821308F9409484FFF4E58FFEB83DE9D897@FTWEXCMB01.txhealth.org>

Please see the announcement below about the Garfield Research Fellowship Award.

Thank you!
Jamie Furrh Quinn
Eugene Garfield Research Fellowship Jury member
.....
.....

The Medical Library Association Eugene Garfield Research Fellowship promotes and supports research on topics in the history of information science. The $5000 fellowship, established in 2013, is to be used for research-related purposes regarding the history of information science to increase the underlying knowledgebase in this area and enhance the current and future practice of the information professions, particularly health sciences librarianship. Health sciences librarians and information scientists, health professionals, researchers, educators, and administrators are eligible. Applicants must have a master's or doctor's degree or be enrolled in a program leading to such a degree and demonstrate a commitment to the health sciences. The fellowship is not designed to support research for a doctoral dissertation or master's thesis.

The award is not restricted to disbursement in a single year and funding may be disbursed over a period of up to two years depending on the needs of the research fellow. The award may be used to supplement or extend other awards, including other private or government-supported fellowships, but is not contingent on receiving other awards. Please see the MLA Grants and Scholarships page (http://www.mlanet.org/awards/grants/) on MLANET for more information. The submission deadline is December 1.

Inquiries: E-mail, telephone or written inquiries are welcomed. Please direct inquiries to Maria Lopez, 312.419.9094 x15

Subject: [Research-mla] MLA Fellow and Honorary Member nominations due November 1
Message-ID: <5B12CD73D528844993A226B6ADA1AB28B7529BF35C@MEDCCR.uscmed.local>

MLA Research Section Colleagues,

Nominations for MLA Fellow and Honorary Member are due by November 1, 2014:

Throughout its history MLA has recognized individuals who have made outstanding contributions to the advancement of the purposes for which the Association stands by conferring a special membership status. "Honorary Member" was the term used until 1976, when a distinction was then made between MLA members and non-members who made contributions.

Fellows:
Fellows are Regular MLA Members who are elected by the Board of Directors for sustained and outstanding contributions to health sciences librarianship and to the advancement of the purposes of MLA. Fellows may use the initials "FMLA" following their names.

Honorary Members:
Honorary Members are individuals who are not Regular MLA Members and who are elected by the Board of Directors for their outstanding contributions to the advancement of the purposes of MLA.

Complete information and nomination forms may be found at:
https://www.mlanet.org/about/awards-and-honors

Nominations are due to MLA Headquarters by November 1st. Please consider nominating a colleague for one of these honorable distinctions!

For additional information or questions, please contact the MLA Fellows and Honorary Members Jury Chair, Joan Gregory, University of Utah Eccles Health Sciences Library - Joan.Gregory at utah.edu<mailto:Joan.Gregory at utah.edu>

October 2014

From jod at uic.edu Tue Oct 7 13:46:13 2014
From: jod at uic.edu (Jo Dorsch)
Date: Tue, 07 Oct 2014 08:46:13 -0500
Subject: [Research-mla] Evidence Based Practice Online Course Registration Open
Message-ID: <5433EEA5.9030907@uic.edu>

Evidence Based Practice: Online Continuing Education Course

**

**

Overview

This asynchronous online course is designed to introduce health and information professionals to the principles of Evidence Based Practice (EBP) including the steps of the EBP process, understanding the literature of evidence, and an overview of epidemiological concepts. Recorded lectures, independent readings, assignments, and threaded

discussions provide an opportunity for assimilation, interaction, and exchange of ideas. Formative feedback will be given throughout the course.

It will take approximately 20-30 hours to complete the course.Consider reserving 3 hours of dedicated time per unit for optimum benefit.The course is approved for 21 Medical Library Association (MLA) Continuing Education credits.

Instructors

An experienced group of University of Illinois at Chicago instructors from the Library of the Health Sciences, Department of Pediatrics, and Department of Medical Education will lead the course.They are:Sandy DeGroote, MLIS; Jo Dorsch, MALS; Carmen Howard, MSLS; Jordan Hupert, MD; Alan Schwartz, PhD; and Peg Burnettte, MLIS (UIUC Library). Course instructors will be available by e-mail to answer questions or provide guidance.

Requirements

Access to the course is through UIC's Blackboard system. Once you are registered you will receive a temporary UIC NetID and password for access. If you are in a hospital environment, you should check with your IT department to determine if there are firewalls that would interfere with your ability to access all aspects of the class.

You will also need:

Internet Access

Word or Open Office

Adobe Acrobat Reader

Windows Media Player or comparable media software

A short tutorial <http://bit.ly/q0pKpt> is available for those not familiar with Blackboard.

All readings will be available from the course site.

There is no required text, but having one of these texts for reference is recommended:

1. Straus SE, et al. Evidence-Based Medicine: How to Practice and Teach EBM
2. Badenoch D, Heneghan C. Evidence-based Medicine Toolkit
3. Glaxziou P, et al. Evidence-Based Practice Workbook.

4.Guyatt G., et al. Users' Guides to the Medical Literature.Essentials of Evidence-Based Clinical Practice.

Registration

**

Cost is $150.00.

The course runs from October 27th - December 5th, 2014.
Registration deadline is October 20th.

The course is limited to 25 registrants.

To register:

Visit the course registration site at
https://appserv7.admin.uillinois.edu/FormBuilderSurvey/Survey/UIC_Library/Hea
lth_Sciences/Evidence_Based_Practice/.You
will be asked for information that is required to establish access to
the course site.

Payment may be made online or by sending a check for $150.00 made
payable to the University of Illinois at Chicago to:

EBP Online -- Emama Muhlim

UIC Library of the Health Sciences

MC 763

1750 W. Polk St.

Chicago, Illinois 60612

*For additional information, email Jo Dorsch jod at uic.edu

Hey Merle - Can you send the message below to the Research Section? I'm on the MIS/MLA Career Development Grant Jury and would like to promote the grant to your section's members. Thanks!

Medical Informatics Section/MLA Career Development Grant

Application Deadline: December 1, 2014.

MLA members,

Consider applying for the Medical Informatics Section/MLA Career Development Grant!

Looking for support for a career development activity? The Medical Informatics Section/MLA Career Development Grant provides one individual up to $1500 to support a career development activity that will contribute to advancement in the field of medical informatics. The application deadline is December 1, 2014. The full grant application, including eligibility requirements, is available at: http://www.mlanet.org/awards/grants/.

Hello,

Please consider nominating a colleague for this award.

The Medical Library Association is seeking nominations for the annual Carla J. Funk Governmental Relations Award. This award recognizes a librarian who has demonstrated outstanding leadership in governmental relations at the federal, state, or local level. The nominee must have been a member of MLA at the time the governmental relations activities occurred. The awardee is granted $500 and a certificate.

Nominations must be received by November 1, 2014. Self-nominations are welcome. For complete information about the criteria for this award see: mlanet.org>Login>About>Awards and Honors>Carla J. Funk Governmental Relations Award>Nomination Details.

Email nominations to: awards at mlahq.org<mailto:awards at mlahq.org>.

Subject: Re: [PHHA-LIB] Effects of librarian-provided services in healthcare settings: a systematic review

Thanks Jean -- I was just about to mention this article and the related project to the PHHA section.

NLM/NICHSR is glad to be supporting this on-going demonstration project, the Public Health Information Access Project, which is now operating in 17 states and 1 local public health department.? Among its? goals is identifying how formal relationships between public health departments and designated

libraries -- as a key adjunct to the desktop digital access to licensed "core" e-resources available through special pricing, as described in the article below -- together contribute to increased evidence-based public health practice.? We would be happy to talk further about this project!

It is challenging to identify the metrics and approaches that support the association of "information access" interventions and specific outcomes in public health.? That said, identifying metrics that are actionable and compelling,? and assembling the literature that uses those metrics, would benefit practitioners and researchers in both the public health and library communities.? We would welcome the opportunity to work with members of the PHHA section and the Research Section's Systematic Review Project who would be interested in helping us identify relevant metrics, projects and literature, including grey lit.

Please let us know if you are interested!
Lisa

Subject: Re: [PHHA-LIB] Effects of librarian-provided services in healthcare settings: a systematic review

Dear Elaine and Marie,

You might want to read about this project which? applies only to the public health department on the state level? not individual county public health departments.

Am J Public Health. 2014 Jan;104(1):77-80. doi: 10.2105/AJPH.2013.301404. Epub
2013 Nov 14.

Overcoming inertia: increasing public health departments' access to evidence-based information and promoting usage to inform practice.

LaPelle NR(1), Dahlen K, Gabella BA, Juhl AL, Martin E.

Author information:
(1)Nancy R. LaPelle is with the Division of Preventive and Behavioral Medicine, University of Massachusetts Medical School, Worcester. Karen Dahlen is an independent consultant based in Fort Collins, CO. Barbara A. Gabella and Ashley L. Juhl are with the Prevention Services Division of the Colorado Department of Public Health and Environment, Denver. Elaine Martin is with the Lamar Soutter Library at the University of Massachusetts Medical School.

In 2010, the New England Region-National Network of Libraries of Medicine at University of Massachusetts Medical School received funding to improve information access for public health departments in 6 New England states and Colorado. Public health departments were provided with desktop digital access to licensed e-resources available through special pricing. In January through mid-April 2012, we evaluated the effectiveness of providing access to and training for using e-resources to public health department staff to motivate usage in practice. We found that additional strategies are needed to accomplish this.

PMCID: PMC3910033 [Available on 2015/1/1]
PMID: 24228662? [PubMed - indexed for MEDLINE]

I'd like to make a request that the team look to the public health setting outside of the heatlhCARE setting, unless CARE applies to the work of municipal health departments.
An analysis need to conducted about the work of organizations engaged in primary prevention (IMHO).

**Cross-posted, apologies for any duplication! **

I'm looking for authors to contribute to an MLA-published book on librarians and translational research, scheduled for publication in late 2015. The book will highlight examples of librarian involvement in various phases of the translational research enterprise, including best practices, challenges and emerging opportunities. Librarians from various institutions are contributing case studies, organized thematically around the different phases of translational research. These case studies will highlight the great work we do, and demonstrate that librarians play important roles in the research enterprise.

If you've been working with researchers or administrators affiliated with your institution's Clinical and Translational Science Award, or if you've got experience working with or supporting any phase of translational research, please consider writing a case study for this book! Sample case

studies may include descriptions of projects or experiences working with:

- basic/bench/preclinical investigators on translational research projects
- clinical researchers
- community members or community health organizations
- health services, health policy or effectiveness research
- national CTSA workgroups, task forces or committees (including former Key Function Committees)
- development or training/promotion of research tools, resources or services
- collection development of resources and tools to support all phases of translational research
- research networking tools, including portals, profile systems, software programs and apps
- organizational infrastructure to support research, including regulatory committees, research administration services, compliance (NIH Public Access Policy, data management plans)
- assessment or evaluation of research impact
- teaching/training health sciences students, practitioners or faculty in translational research programs
- training MLIS students (health sciences research, translational science, etc.)

If you are interested in contributing a case study to the book, or have any questions about this call for contributors, please contact Marisa (meese at umich.edu) by Wednesday, 26 November. Please provide a working title and a brief (~200 words) description of the topic, project or experience you would like to write about.

Thanks for considering!

Best, Marisa

Hi all

Thought you might be interested in this....
Kris
   ? Carroll Preston Baber research grant call for proposals Do you have a project that is just waiting for the right funding?? Are you thinking about ways that libraries can improve services to users? The American Library Association (ALA) gives an annual grant for those conducting research that will lead to the improvement of services to users.? The Carroll Preston Baber Research Grant is given to one or more librarians or library educators who will conduct innovative research that could lead to an improvement in services to any specified group of people. The grant, up to $3,000, will be given to a proposed project that aims to answer a question of vital importance to the library community that is national in scope. Among the review panel criteria are:
   - The research problem is clearly defined, with a specific question or questions that can be answered by collecting data. The applicant(s) clearly describe a strategy for data collection whose methods are appropriate to the research question(s). A review of the literature, methodologies, etc. is not considered research (e.g., methodology review rather than application of a methodology) for purposes of the award, except where the literature review is the primary method of collecting data.
   - The research question focuses on benefits to library users and should be applied and have practical value as opposed to theoretical.

- The applicant(s) demonstrate ability to undertake and successfully complete the project. The application provides evidence that sufficient time and resources have been allocated to the effort. Appropriate institutional commitment to the project has been secured.

Any ALA member may apply, and the Jury would welcome projects that involve both a practicing librarian and a researcher. Deadline isJanuary 9, 2015. Check out this web site to find procedures and an application form:? http://www.ala.org/offices/ors/orsawards/baberresearchgrant/babercarroll See the section onHow to Apply.? ? Also see related documents linked near the bottom of the page for: Schedule and Procedures http://www.ala.org/offices/ors/orsawards/baberresearchgrant/schedandprocedures Proposal Requirements and Application Cover Sheet: http://www.ala.org/offices/ors/orsawards/baberresearchgrant/requirements ? Full press release: http://www.ala.org/news/baber-submissions-2015 ? Questions??? Contact Anne Houston, Smith College Libraries, at annehouston2 at gmail.com
