Trusted evidence.
Informed decisions.
Better health.

Cochrane exists so that healthcare decisions get better.

Navigating the Cochrane Library

All aspects of the Cochrane Library have been redesigned to improve user experience.

You will find new options to browse and search, including access to other systematic reviews from Epistemonikos via a federated search feature; improved article design for Cochrane Reviews, CENTRAL records, and all other content; improved search results display; a new Spanish language portal; better access to translated content in multiple languages; and full integration of Cochrane Clinical Answers.

Easily navigate across Cochrane reviews, Trials and Clinical Answers.

Same search position, more powerful multi-lingual search.

Find Cochrane Library training materials easily.

For over 20 years, Cochrane has helped to transform the way healthcare decisions are made. Cochrane produces reviews that summarize the best available and up-to-date evidence generated through research to inform decisions about health.

The enhancements to the Cochrane Library have been developed based on user feedback and testing, ensuring that key features are more user-friendly.

The image shows a tablet displaying the Cochrane Library website. The interface is clean and organized, with a purple header bar containing the Cochrane Library logo and navigation links. The main content area displays search results for 'Interventions to increase the use of electronic health information by healthcare practitioners to improve clinical practice and patient outcomes'. The results are listed in a table with columns for title, authors, date, and access status. Callout boxes highlight specific features: 'Option to view a preview of the selected Cochrane Reviews.' points to the 'Show Preview' link; 'All your search results in one place, with tabs for the different content types.' points to the tabs for Cochrane Reviews, Protocols, Trials, Editorials, Special collections, and Clinical Answers; 'Easy filters help refine your results to add enhanced search limits.' points to the 'Filter your results' sidebar; and 'View non-English translated abstracts direct from the search results.' points to the 'Bahasa Malaysia' language filter.

Cochrane Reviews are systematic reviews of primary research in human health care and health policy, and are internationally recognized as the highest standard in evidence-based health care. Cochrane Systematic Reviews investigate the effects of interventions for disease prevention, treatment, and rehabilitation. They also assess the accuracy of a diagnostic test for a given condition in a specific patient group and setting.
