

# Core Cancer Library 2021, 5<sup>th</sup> Edition

A Resource of the Medical Library Association's Cancer Librarians Caucus

Welcome,

The Core Cancer Library is one of the public resources maintained by the Cancer Librarians Caucus, created in support of collection development at professional and patient cancer libraries.

This resource provides an overview of books on cancer to consider when building or adding to a collection, with a focus on more recent titles published by academic publishers. Each book title in the Core Cancer Library has the following fields: title, edition if applicable, last name of first author or editor, publisher, year published, eBook ISBN if available in this format, publisher's price at the time of data collection, and a link to the title on the publisher's website. Book series include the following fields: title, last name of first series editor, publisher, ISSN, and a link to the series on the publisher's website.

This is not an exhaustive list, but a thoughtful selection across different areas in the field of oncology. Please note that some titles span multiple topics. Published in January 2021, our 5<sup>th</sup> edition simplifies and updates past content, and introduces new headings, including Caregiving; Death and Dying; Disparities, Communities, and Society; and Ethics. We are indebted to the work of past and current caucus members, especially 2010-2011 Chair Christine Marton, PhD.
