Take the right path: Partner with your medical librarian

Make Better Decisions With a Medical Librarian

A study of 118 hospitals with more than 16,122 participants found that:

45% reported that services ensured that interventions were based on best practice or current evidence

39% of users of clinical librarian services reported a positive impact on quality of patient care

25% reported improvement in patient and staff safety

Additional research and data have found that:

88% of respondents on the intervention team reported changing a treatment based on new information skills taught by a librarian

86% of post-study participants surveyed rated their level of satisfaction with the just-in-time information service as having a positive impact on the care they provided to their patients

79% changed a treatment plan based on a search done by the librarian
